		Market Report and Statements.	549-560
		Return of Fires	561-569
		Return of Street Accidents	570-572
5.	AUDITORS' REPORT		573-624

Review by the Standing Committee of the Administration Report of the Municipal Commissioner for the City of Bombay for the year 1888-89.

Act (Bombay III) of 1888 came into operation on 14th September 1888, and in accordance with section 124 (3) thereof, the Standing Committee now submit to the Corporation the accompanying "Review" of the Commissioner's Administration Report for the year 1888-89.

2. The year was remarkable on account of the following circumstances : (1) the introduction of the new Act, which provides for many improvements in administration, enlarges the number of representatives returned by the Rate-payers and enfranchises the University and the Chamber of Commerce ; (2) the welcoming to Bombay of the Marquises of Dufferin and Lansdowne, the late and present Viceroys ; (3) the death of one of the oldest and most valued members of the Corporation, the late Sir Frank H. Souter ; and (4) the progress made with the Tansa Water Works and many other undertakings of importance and utility, including the commencement of the new Municipal Offices at Bori Bandar.

3. It is very satisfactory to the Committee, that in this, their first "Review," they are able to congratulate the Corporation on the healthy condition of the Municipal finances for, although, consequent on the reduction of the duty on grain, sugar and ghee and from other causes, there was a falling off, as compared with the previous year, of Rs. 2,70,853 from Town Duties, and of Rs. 22,422 from Wheel Tax, there was still a net increase, generally, of Rs. 3,19,442 over the estimates. This increase was due to enhancement of revenue from rates and taxes, interest on investment of loan funds, sale of land, &c. It is important to note that, whilst the revenue to Government from Liquor Licenses is nearly 3 lakhs a year, Government, under the terms of Act V of 1878, only pay Rs. 1,43,750 thereof to the Municipality, and the remarks of the Chief Accountant on this subject will doubtless receive the attention of the Corporation. The Committee are of opinion that a further effort should be made to induce the Legislature to make such equitable alter-

ation of the law as would enable Government to make over to the Corporation a yearly sum that would fairly represent the average revenue derived. The Corporation may fairly ask for the concession, having regard to the large outlay which the further improvements of the city will involve, the probability of the Municipality being called on to make a large contribution towards additional police charges, the fact that the duty on Petroleum which was estimated to yield one lakh of rupees, was abolished as a Municipal duty from 1st April 1889, and the circumstance that, consequent on the action of the Government of India in reducing the duration of the Tansa Water Works loan and all future loans from 60 to 40 years, half a lakh per annum more than was originally agreed to has to be provided for the sinking fund of the Tansa Loan, and about one half per cent. more for sinking fund charges of all future loans. On the subject of loans generally, the Committee cannot but express entire concurrence with Mr. Ollivant's para. 20 as to the extreme hardship inflicted on the Municipality by the Secretary of State in restricting the duration of Loans to 40 years, notwithstanding the magnitude and the lasting nature of the Tansa Works, and that the Act provides for a limit of 60 years.

4. The total ordinary revenue was Rs. 49,66,192, or with balances from the previous year Rs. 63,30,791 as against the expenditure of Rs. 52,01,258. During the year the outlay from Loan Funds on Tansa Water Works, on Sewerage, Markets and other undertakings was Rs. 31,92,096; and as a proof of the efforts, which are being made to provide for the ever-increasing requirements of the city in the direction of sanitation and otherwise, the Committee draw attention to the statement that the expenditure on such special works from Loans, during the last 5 years alone has been Rs. 99,48,830, or nearly a krore. On 31st March last, the total assets were valued at Rs. 3,87,63,442 and the liabilities at Rs. 2,51,35,733 (of which, Rs. 2,38,29,801 were on account of Loans), the balance in favour of assets being thus shown at Rs. 1,36,27,709.

5. The steady increase in building operations during the year and the growth of the city in population, combined with the improvements effected in the Assessment and Collection

Department, as explained in previous reports, have brought about an increase in the valuation of property. On the 31st March the total rateable value was increased by Rs. 11,58,667, making a grand total of Rs. 2,39,51,043, of which Rs. 2,11,38,534 were chargeable with the General Tax.

6. The Engineering works in progress are fully described in the reports of the several Engineers. These works included the erection of ventilating shafts in various districts, completion of house connections in Khetwadi, progress of pipe sewers and house connections in Queen's Road district, sundry new branch sewers, surveys for house connections, of a large portion of Agripada, of the entire sewerage of Colaba, and for pipe sewers and ovoid sewers in Umbarkhari, Bhuleshwar, Kharatalao, Tarwadi, Mazagon, Byculla, Chinchpokli and Parel districts. The Commissioner begs the Corporation to remember, that apart from the evils inherent to a want of systematic sewerage, there is an ever-increasing risk of disaster from allowing, even as an inevitable temporary expedient, the new sewers and the new pumping machinery to be applied to a purpose which they were never designed to serve. The rapid extension of buildings makes the sewerage of the northern districts a matter of pressing importance, and no time should be lost in arriving at a definite conclusion as to the best sewage outfall for those districts. Satisfactory progress was made at Tansa although the excavations for the dam foundations continued to give trouble, and will cause an excess on the estimate, and although there was a panic among the workpeople consequent on an outbreak of cholera at Atgaon. The duct works and the bridges at Bassein Creek for the mains, were also well advanced. The works for the prevention of leakage at Vehar waste weir, repairing dam No. 2, and the construction at Tulsi of additional catch-water channels, were completed or advanced, and in Bombay itself, nearly 8 miles of 27″ and other mains were laid (in addition to the 27″ one in Arthur Road). Fire hydrants were fixed to all new mains, and 200 hydrants added to the old mains. Dipping wells are being abolished, and the substitution of taps and fountains is being carrjed out. Additional filtration, both for Vehar and Tulsi water, and further reservoir accommodation are urgently

needed. New 9″ and 12″ mains will have to be laid down in various districts.

7. The Commissioner's observations regarding the necessity for improving the state of some of the roads, the question of street lighting, regulation of streets and buildings, list of municipal buildings completed or in course of construction, improvement of the Victoria Gardens, &c., will be found at pages 25 to 29.

8. It is unsatisfactory to note that the state of public health was not so good as in the previous year, the total number of deaths being 22,421 equal to a death-rate of 25·16 per 1,000 of population as against the average of 24·97 during the past five years. There were 379 cases of cholera or 11 above the average of the past five years, but some of the increase was clearly traceable to importation in a scandalous manner by a coasting steamer from Bhavnagar. Small-pox was epidemic and carried off 482 persons although a special hospital was opened and the usual measures adopted on such occasions were enforced. From fever, the deaths were 6,642, or 332 more than the average as above.

9. For a great part of the year, the city was infested by a crowd of paupers, mostly sturdy vagrants from Kathiawar and Guzerat, who refused honest work that was offered to them, and, as beggars, were a source of nuisance and danger to the health of the city. They were ultimately induced to depart, and it is to be hoped that measures will be devised to protect Bombay from a recurrence of this infliction.

10. So far, the efforts which have been made to improve the Registration of Births have not resulted in great improvement, the average birth-rate per 1,000 of population being returned at 21·67 although in some instances the rate was remarkably high. Thus, Eurasians 81·33, Jews 40·95, Jains 33·62, Parsees 30·88, Hindoo low-castes 29·31. It has to be remembered, too, that among some classes there is an immense preponderance of males. The Commissioner asks that reference may be made to his remarks regarding birth registration and vaccination in the Reports for 1881, 1883-84 and 1885-86, and expresses the opinion that it is quite time that these two services should be worked together, whether under the direct supervision of the Sanitary Commissioner or as a branch of the Health Department.

11. The Health Department's record of work done is satisfactory. On an average nearly 4,000 workpeople were employed daily, 823 carts were in work, 822 tons of garbage and 348 tons of night-soil collected and removed daily. It is becoming a pressing question, however, where the garbage is to be disposed of when the piece of swamp on the Flats which was recently purchased by the Municipality has been all used up; and the Committee are, therefore, glad to know that a scheme is in hand for ultimately disposing of town sweepings on the tract of swamp between Kurla and Thana. Notwithstanding the largeness of the staff of the department, a considerable increase therein is inevitable, consequent on the rapid extension of buildings, especially in unsewered districts.

12. There was a considerable increase in the revenue from Markets and Slaughter Houses, and the Corporation will find in the Report, details in connection with the working of those establishments, of the Fire Brigade—in respect of which the new Act has imposed additional obligations on the Commissioner—of the number of street accidents, of the receipts and expenditure on primary schools, number of scholars, &c.

13. The Auditors' Report is, as usual, carefully prepared and will be found of value on several points. Under section 39 of the new Act, the management of Primary Schools is entrusted to a Joint Committee of the Corporation and of gentlemen nominated by Government. Of this Committee, Dr. Blaney was appointed Chairman.

14. A Sub-Committee of the Standing Committee went carefully into the question of the "Appendices" with a view to shortening them, and the Standing Committee have decided to omit for the future a few unimportant "Statements" in the Executive Engineer's Report, as also the "Dead Stock Return." Accordingly, under the terms of section 124 (3) of the Act, the Standing Committee direct that the Appendices *minus* these statements be appended to the compilation in the usual way.

DOSABHAI FRAMJI,
Chairman, Standing Committee.

The above Review is circulated to the Members of the Municipal Corporation of Bombay, under the terms of section 124 (3) of the City of Bombay Municipal Act, 1888.

H. WYNFORD BARROW,
Municipal Secretary.

ADMINISTRATION REPORT

OF THE

MUNICIPAL COMMISSIONER.

Annual Administration Report of the Municipal Commissioner for the City of Bombay for the year 1888-89.

INTRODUCTORY.

1. I held the appointment of "The Municipal Commissioner for the City of Bombay" throughout the year, but from 1st April to 25th November 1888, during my absence on furlough (which was in continuation of the furlough of last year), Mr. F. L. Charles acted for me.

2. The most important event in the municipal history of the year was the introduction of the new City of Bombay Municipal Act, which, notwithstanding some defects, may claim, in respect of its general arrangement and contents, to be the most complete Municipal Code that has yet been elaborated. In its administrative provisions, long-needed improvements have been introduced in the regulations affecting drainage, water works, and other sanitary matters, the procedure relating to the registration and assessment of properties has been systematized, exemptions from liability to the taxes in respect of immoveable property have been restricted, and better security given for the recovery of arrears, whilst a somewhat larger measure of financial independence has been obtained in regard to loans and investments.

3. The most important constitutional changes are, that the number of members elected by the rate-payers was increased from 32 to 36, the apportionment of the city into wards for electoral purposes received for the first time legal sanction, the right of returning two members each was accorded to the University and to the Chamber of Commerce, and complete regulations were prescribed for the conduct of elections. The powers and duties of the Municipal Authorities were more clearly defined, the general control of the Corporation extended and emphasized, and the responsibilities of the Commissioner rendered less ambiguous. The designations "Chairman of the Corporation" and "Town Council" were changed to "President" and "Standing Committee," respect-

ively, as more accurately expressing the functions exercised. Members of the Corporation are legally styled "Councillors" as in England, and "Municipal Secretary" has taken the place of the more cumbersome appellation "Clerk, Municipal Corporation, and Secretary, Town Council." The chairmanship of the Standing Committee was made elective instead of being as hitherto a Government appointment, and the Councillors serving on the Standing Committee are to retire by rotation, one-third at the end of each year.

I.—Corporation and Standing Committee.

4. Mr. Rahimtula Mahomed Sayani was elected Chairman (President) of the Corporation at the Quarterly Meeting held on the 4th April 1888, and he held the appointment until the end of the year. Mr. Sayani is the first Mahomedan who has held this office.

5. The Corporation asked Government to attach some title, such as "Hon'ble," to the office of President, but this suggestion was not acceded to.

6. Fifty-eight Meetings of the Corporation were held and nine more were convened, but not held for want of a quorum. Besides these, thirteen Committee Meetings were held and four others convened, but not held for want of a quorum.

7. During the same period the Standing Committee, of which Mr. Dosabhai Framji, C.S.I., was again Chairman throughout the year, held fifty-four Meetings. There were also nine Sub-Committee Meetings, and one hundred and seventy-five attendances for cheque-signing and the audit of the weekly statement of accounts, &c.

8. The changes in the personnel of the Corporation were as follows:—Sir Frank H. Souter, Kt., C.S.I., C.I.E., died, and was succeeded by Mr. Gilbert, appointed by Government. Mr. Cornforth resigned, and was succeeded by Mr. Wyer, also appointed by Government. Dr. P. Peterson resigned and was succeeded by Mr. Narayen Ganesh Chandavarkar, elected. Major Gerald Martin resigned on the 7th January 1889, and his seat remained vacant to the end of the year.

9. In the Standing Committee, Major H. O. Selby, R.E., was elected to the seat rendered vacant by the death of Sir Frank H. Souter.

10. Lists of Members of the Corporation and Standing Committee, as existing on 31st March 1889, are given elsewhere.

11. The Members of the Corporation had the pleasure during the year of presenting addresses to their Excellencies the Earl of Dufferin and the Marquis of Lansdowne, the retiring and newly-appointed Viceroy and Governor-General respectively.

II.—Heads of Departments.

12. Mr. Rienzi Walton, Executive Engineer, was on leave throughout the year, in continuation of the leave of last year, and Mr. James W. Smith, Deputy Executive Engineer, Drainage, acted for him.

13. Mr. W. Clerke, Executive Engineer, Tansa Works, was granted special leave on full pay (in accordance with his agreement) from 12th June to 29th October 1888, and Mr. T. C. H. White, Deputy Executive Engineer, Tansa Works, was in charge of the works without extra pay.

14. Mr. R. P. Brunton, Assessor and Collector, was on privilege leave for 18 days from 14th October, and Rao Bahadur Virprasad Tapiprasad acted for him.

15. All heads of departments have continued to discharge conscientiously the laborious duties assigned to them.

III.—Financial.

16. The Income and Expenditure of the year were as follows:—

	Rs.	a.	p.
Opening balance	13,64,599	1	5
Revenue from all sources	49,66,192	6	10
Total available for expenditure	63,30,791	8	3
Spent during the year	52,01,257	14	5
Difference	11,29,533	9	10
Actual closing balance after making allowance for adjustments, advances recoverable, &c., as detailed at pages 62 and 63 of Chief Accountant's Report	11,26,056	2	3

The opening balance was greater by Rs. 8,21,599-1-5 than that given in the Budget Estimate. Of this amount, the sum of Rs. 5,25,940-15-8 represents the unexpended balance of lapsed grants for 1887-88 renewed in 1888-89. The remainder, Rs. 2,95,658-1-9, not having been appropriated during the year now under report formed part of the opening balance of 1889-90.

The revenue fell short of the estimates under certain head by Rs. 74,505-4-11, and under the other heads it was better than the estimates by Rs. 3,93,947-11-9. The total revenue in excess of the estimates was, therefore, Rs. 3,19,442-6-10, of which Rs. 1,06,300 have already been taken credit for in the current year's Budget.

The total grants sanctioned for expenditure during the year amounted to Rs. 58,44,135-11-5 as shewn below:—

	Rs.	a.	p.
Originally sanctioned in the Budget... ...	50,50,185	0	0
Lapsed grants renewed	5,25,940	15	8
Additional grants sanctioned	2,68,009	11	9
Total sanctioned ...	58,44,135	11	5
Deduct—Spent ...	52,01,257	14	5
Balance (expenditure less than sanctions) ...Rs.	6,42,877	13	0

This balance includes the sum of Rs. 4,05,083-10-1 on account of unpaid liabilities of the year.

The amount actually available for further requirements is as shown below :—

	Rs.	a.	p.	Rs.	a.	p.
Actual closing balance...				11,26,056	2	3
Deduct—						
For renewal of lapsed grants ...	4,05,083	10	1			
Appropriated in Budget, 1889-90 (including the 1 lakh required by law)	4,50,000	0	0			
				8,55,083	10	1
Actually available ... ... Rs.				*2,70,972	8	2

* Of this amount, Rs. 30,000 have been utilized up to date for extra grants.

17. The following tables **A** and **B** shew the main heads of Revenue and Expenditure, as compared with the Budget Estimates for 1888-89, and the Actuals for 1887-88 :—

* Exclusive of Rs. 12,000 shown under Fire Brigade on account of debt.

18. From Statement **A**—Revenue—it will be seen that the item, Town Duties, yielded less by Rs. 63,102-13-0 than the estimated amount, and less by Rs. 2,70,853-1-9 than the receipts of the previous year. This falling off is due partly to the reduction of the duty on grain, sugar and ghee, and partly to the importations of grain and sugar, timber and firewood, being less than in the previous year. The duty on petroleum amounted to Rs. 2,30,271 or Rs. 1,23,538 more than in 1887-88. The increase was owing to a larger quantity having been imported. This item of revenue will now disappear as the municipal duty on petroleum has been abolished from the 1st April 1889, in consequence of legislation prompted by the desire of the Government of India to monopolize for Imperial purposes all taxation on this commodity. Under Wheel-tax and Toll Fees, the revenue fell short of the estimate by Rs. 7,229-4-0 and less by Rs. 22,421-12-7 than the receipts for 1887-88.

The Property Rates (Consolidated Rate, Halalkhor Cess, and Water Rate, known under the new Act as General Tax, Halalkhor Tax and Water Tax respectively) produced Rs. 1,39,997-2-8 more than the estimate. This is owing to a large number of new buildings having been erected, existing properties having increased in value, and to increased Halalkhor and Water Service. The increase of Rs. 11,296-11-4 on Tobacco Duty Licenses is presumably due to a larger consumption owing to increased population. Owing to a greater number of stalls being occupied, increased rent, and to a larger number of animals having been slaughtered, the Market Receipts shew an increase of Rs. 31,563-6-7. The increase of Rs. 2,06,917-3-3 on Returns from Property and Miscellaneous is due to the sale of land near Victoria Gardens, Cooper Street, and Malabar Hill, sale of reclamation produce and rents of Milch Cattle Stables, and rent of Telephone lines being greater than estimated; interest on investments (Rs. 1,10,715-4-10), owing to the expenditure on loan works being met out of floating cash balances, whilst the invested loan funds were left untouched, and to the sale of 6 lakhs of 4½ per cent. Paper of the Municipal Building Fund which was sanctioned by the Standing Committee, and the interest on the Fund realising a profit of Rs. 55,576-10-10.

The amount of Rs. 1,43,750, as fixed by section 63 of Act V. of 1878 in lieu of Liquor Licenses, was paid by Government whilst the revenue derived by Government from

the licenses is close on 3 lakhs a year. The remarks of the Chief Accountant on this subject will doubtless receive the attention of the Corporation.

19. Turning to Statement **B**—Expenditure—the actuals have been less in all items than the estimates, but of the unexpended balance of Rs. 6,42,877-13-0, the sum of Rs. 4,05,083-10-1 represents cost of unpaid liabilities and of works deferred and is required during the current year. The actual saving on the estimates is therefore Rs. 2,37,794-2-11. Of this sum, Rs. 30,000 were unexpended in consequence of the conservancy establishment of the Health Department not being at its full sanctioned strength throughout the year, in consequence of a faulty system which must now be improved; Rs. 22,400 represent savings on new works executed; Rs. 41,000, provided in the Water Works Department for advances in respect of work to be done for private properties, were not required; and Rs. 71,000 under the head of Debt were saved owing to certain loans not having been taken up as soon as was anticipated. As compared with the previous year, the actual expenditure shews decreases under General Superintendence, Assessment and Collection Department, New Works, Police, Municipal Debt, Pensions, Education and Hospitals, amounting in all to Rs. 9,85,435-2-1. The increases are under Public Health Department, Public Works, Public Gardens, Fire Brigade and Miscellaneous, amounting in all to Rs. 3,74,002-11-8. The total net decrease in expenditure therefore, as compared with 1887-88, is Rs. 6,11,432-6-5.

20. The following statement exhibits the expenditure during the last 5 years on the principal loan works in progress, the details of which have not hitherto been included in the annual Budget Estimates :—

	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	TOTAL.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

Total..	11,88,241 10 3	13,88,212 10 9	18,11,433 13 4	23,68,846 10 0	31,92,095 12 10	99,48,830 9 2

Any reference to the subject of loans would be incomplete if I did not make a passing allusion to the fact that, notwithstanding the change of law which has freed the Municipality from the provisions of the Local Authorities Loans Act, and which has prescribed sixty years as the maximum period for which a loan is to run, the Secretary of State and the Government of India have, in spite of the repeated representations of the Corporation, restricted this privilege to a term of 40 years even in the case of the Tansa project, which is believed to be the largest sanitary work that any city in India has yet ventured upon, and as costly at least as any that we are likely to be called on to undertake. The new Act therefore has in this respect been rendered a dead letter almost as soon as it was out of the printer's hands.

21. The following statement shows the total Assets and Liabilities at the end of the year :—

ASSETS.

	Rs.
I.—Investments, Loan Funds and Building Fund	74,75,493
II.—Advances, Departmental and to Contractors	2,71,369
III.—Municipal Property :—

III.—Adjustment items (Reserved for Loan Works Establishment)	36,446
Total Liabilities ... Rs.	2,51,35,733

22. The statement given below shows our financial position at the beginning and end of the year respectively, with regard

	1 Balance due on 1st April 1888.	2 Amount raised in 1888-89.	3 Total.	4 Amount repaid in 1888-89.	5 Balance due on 31st March 1889.	6 Interest paid in 1888-89.	7 Total of Columns 4 & 6.	Remarks.
LOANS RAISED FROM GOVERNMENT.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	
1 Balance of the Consolidated Loan	50,77,745 4 1	.....	50,77,745 4 1	1,29,256 7 11	49,48,149 12 2	2,27,686 12 11	3,56,682 4 10	* The balance of these Loans on 1st April 1888 was Rs. 14,03,000, out of which Rs. 13,81,500 were repaid during 1888-89, leaving an unpaid balance of Rs. 21,500 (not carrying interest) at the close of the year owing to the bond-holders not having applied for the repayment of the debentures on the stipulated dates. Out of the latter amount Rs. 17,000, have been repaid during 1889-90, and the balance of Rs. 4,500, which has been deposited at the Bank of Bombay, will be repaid when the parties apply for payment. The net interest paid on these Loans during 1888-89 amounted to Rs. 5,705-2-2.
2 Vehar Water Works Debt	28,98,843 2 8	.....	28,98,843 2 8	60,353 7 8	28,38,490 11 0	1,14,847 8 0	1,75,200 0 0	† As under the terms of these Loans the bonds issued could not be repaid to the holders before the dates stipulated in the debentures, the Sinking Fund for 1888-89, amounting to Rs. 96,433-14-6, together with Rs. 83,370-14-8, set apart in 1887-88 on account of Sinking Fund of the 44 Lakhs Loan has been invested in 4 per cent. Municipal Debentures for Rs. 1,48,500, and Rs. 244-12-6 have been deposited in cash at the Bank of Bombay.
TOTAL OF LOANS RAISED FROM GOVT. ..Rs.	79,76,588 6 9	.....	79,76,588 6 9	1,89,647 15 2	77,86,940 7 7	3,41,804 5 8	5,31,852 4 10	‡ The Sinking Fund for this Loan will be set apart from 1893 i.e. after the completion of the works as per conditions of the Loan.
LOANS RAISED FROM THE PUBLIC.								
3 House Rate and Market Loans of 1867 and 1868			Fully invested.*					§ If from this sum the interest, amounting to Rs. 63,779-12-0 received on the Tansa Loan investments during 1888-89 and credited against the payment of interest, were deducted, the net payment would amount to Rs. 1,61,256-12-0.
4 Drainage Loan of 1873	24,56,000 0 0	.....	24,56,000 0 0	42,900 0 0	24,13,100 0 0	1,21,550 0 0	1,64,050 0 0	¶ In addition to this sum the balance of Rs. 2,10,818-3-8 remaining out of the provision of Rs. 3,70,000 for the Tansa Loan interest for 1888-89, together with Rs. 27,283-12-9 received as interest on the Tansa Loan Interest Invested Fund have been invested to meet interest payments in future years in excess of the annual provision of Rs. 3,70,000.
5 The Sanitary Works Loan of 1865-66 (44 Lakhs)	39,50,000 0 0	.....	39,50,000 0 0	.....	† 39,50,000 0 0	1,91,075 0 0	1,91,075 0 0	a Exclusive of Rs. 1,87,650-8-6 received as net premia on the different Loans.
6 The Tansa Water Works Loan	47,00,000 0 0	a 25,00,000 0 0	72,00,000 0 0	.....	‡ 72,00,000 0 0	2,25,814 9 0	2,25,814 9 0	b This Loan was raised at the end of 1888 and the Sinking Fund will be set apart when due in 1893. The first half-yearly interest did not become due until 1st April 1889.
7 The Drainage and Water Works Loan of 1883 (12 Lakhs)	6,00,000 0 0	a 6,00,000 0 0	12,00,000 0 0	.....	† 12,00,000 0 0	36,987 8 0	36,987 8 0	c This amount, together with Rs. 56,428-14-4 set apart as Sinking Fund during 1888-89, brings up the total disbursements for that year on account of repayment of Capital to Rs. 3,28,881-12-6 (as shown in the Statements forwarded to the Accountant General and Government).
8 The Sanitary Works Loan of 1883 (7 Lakhs)	7,00,000 0 0	.....	7,00,000 0 0	.....	† 7,00,000 0 0	54,416 10 8	54,416 10 8	d If to this sum the amount of Rs. 1,87,650-8-6 received on account of net premia were added, the total balance would amount to Rs. 7,58,08,301-0-1.
9 The Miscellaneous Works Loan of 1888 (Drainage and Water Works, Markets and Roads)	.....	a 3,70,500 0 0	3,70,500 0 0	.....	b 3,70,500 0 0	b	.....	e If to this sum the amount of Rs. 2, 9,507 paid on account of Tansa Loan Interest Investment (vide ¶) Rs. 8,705-2-2 paid on account of interest on the Local Loans (vide *) and Rs. 19,937-14-0 paid on account of exchange, printing, &c. charges on the different Loans were added and the sum of Rs. 63,779-12-0 received on account of interest on the Tansa Loan Investment (vide ¶) were deducted, the total payments would aggregate Rs. 17,63,258-1-6 as shown in the Statements forwarded to the Accountant General and Government.
TOTAL OF LOANS RAISED FROM THE PUBLIC..Rs.	1,24,06,000 0 0	a 34,70,500 0 0	1,58,76,500 0 0	42,900 0 0	1,58,34,000 0 0	6,30,643 13 8	6,73,543 13 8	
GRAND TOTAL ..Rs.	2,03,82,588 6 9	a 34,70,500 0 0	2,38,53,088 6 9	c 2,32,547 15 2	d 2,36,20,540 7 7	e 9,71,548 1 4	12,03,996 0 6	

to the various Loans raised from the public and borrowed from Government :—

23. The revenue, expenditure and balances of the past five years have been contrasted in the following table*:—

	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	42,18,867	44,73,978	49,01,815	51,66,530	49,66,192
Expenditure	38,81,020	40,66,940	41,76,862	58,12,690	52,01,258
Closing balance (including advances to loan works, &c., and minor deposits)	11,60,586	15,62,410	20,58,938	13,64,599	11,26,056
Add—Recoverable Revenue outstanding	3,41,115	90,000	90,000	1,10,000	*1,60,000
	15,01,701	16,52,410	21,48,938	14,74,599	12,86,056
Deduct— Uncompleted works, &c., for which grants had to be renewed in the following year	6,65,803	9,84,524	11,42,824	5,25,941	4,05,084
Net Balance available for requirements of following year ...	8,35,898	6,67,886	10,06,114	9,48,658	8,80,972

* Includes G. I. P. Railway disputed bills, amounting to Rs. 80,976, which have now been paid.

IV.—Assessment and Collection of Revenue.

Registration of Properties.

24. The number of properties on the Assessment Book at the close of 1888-89 was 49,884 against 49,313 in 1887-88, showing a net increase of 571. The details are contrasted in the following table :—

Years.	Classification of properties according to description.					Classification of properties according to liability to pay Consolidated Rate.			
	Buildings.	Salt pans.	Cocoanut plantations.	Vacant lands including Tanks, &c.	Total.	Number Assessed to Consolidated Rate.	Number exempt or compounded for on special terms.	Small plots of unproductive land for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9	10
1887-88	32,098	199	1,273	15,743	49,313	34,488	5,607	9,218	49,313
1888-89	32,639	199	1,273	15,773	49,884	36,833	5,331	7,720	49,884

In the year under report, 351 buildings were demolished, while 892 new buildings were erected and 339 existing buildings were enlarged. The other difference is due to the sub-division or re-adjustment of Assessment numbers.

Valuation.

25. The gross recorded value of these properties for the year under report is shown in the following table in contrast with that of the preceding year :—

Closing Valuation of 1887-88.	Opening Valuation for 1888-89.	Valuation after Complaint.		Subsequent Amendments.		Closing Valuation of 1888-89.				Increase.
		Number of Complaints.	Amount after disposal of Complaints.	Reductions.	Enhancements.	Valuation chargeable with Consolidated Rate.	Valuation exempt from Consolidated Rate.	Valuation for which no Consolidated Rate Bills issued.	Total.	
1	2	3	4	5	6	7	8	9	10	11
Rs. 2,27,92,346	Rs. 2,34,29,607	2,798	Rs. 2,36,13,132	Rs. 3,01,319	Rs. 7,89,230	Rs. 2,11,88,534	Rs. 27,94,088	Rs. 18,421	Rs. 2,39,51,043	Rs. 11,58,697

The increase in column 11 is thus accounted for :—

		Rs.
1.	Rise in rents and correction of under-assessments	3,89,484
2.	Erection of new buildings	4,65,890
3.	Enlargements	3,03,323
	Rs...	11,58,697

Property Taxes.

26. The following comparative tables show the increase in Property Rates :—

Consolidated Rate (General Tax).

1887-88.			1888-89.			Increase.
8 per cent. on Value.	Compounded sum payable by Government and Port Trust.	Total.	8 per cent. on Value.	Compounded sum payable by Government and Port Trust.	Total.	
Rs. a. p. 12,29,613 12 1	Rs. a. p. 2,12,990 0 0	Rs. a. p. 14,42,603 12 1	Rs. a. p. 13,09,805 7 8	Rs. a. p. 2,12,990 0 0	Rs. a. p. 15,22,795 7 8	Rs. a. p. 80,191 11 7

The value of the exemption from payment of Consolidated Rate in virtue of section 77 of the old Act does not

appear in the above table. It amounts to Rs. 2,01,174-4-10. The amount for 1887-88 was Rs. 1,97,948-12-8.

Water Tax.

1887-88.				1888-89.				Increase.
On Value.	Compounded.	On Meter Measurement.	Total.	On Value.	Compounded.	On Meter Measurement.	Total.	
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
4,00,024 4 5	3,303 12 3	4,36,177 6 2	8,39,505 3 10	4,26,500 12 7	3,728 9 6	4,80,695 8 8	9,10,924 14 4	71,419 10 6

Halalkhor Tax.

1887-88.			1888-89.			Increase.
On Value.	Special Service.	Total.	On Value.	Special Service.	Total.	
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
3,09,526 10 5	56,387 0 3	3,65,913 10 8	3,28,887 2 11	63,369 5 9	3,92,256 8 8	26,342 14 0

The total demand on account of Property Rates for 1888-89 amounted to Rs. 28,25,976-14-8 as against, Rs.26,48,022-10-7 in 1887-88. To this sum must be added Rs. 12,874-1-0, demands on account of previous years brought to account for the first time in the year under report, making a total demand of Rs. 28,38,850-15-8.

Collection.

27. Of the above total demand, Rs. 2,270-11-11 were allowed as drawback or remission under section 76 of the old Act, and Rs. 2,12,990, being the amounts payable by Government and the Port Trust, were paid direct into the Commissioner's Office. For the recovery of the remainder, Rs. 26,23,590-3-9, bills were issued by the Assessment Department as under:—

Years.	Bills to be issued.		Bills issued.		Bills remaining to be issued.	
	No.	Amount.	No.	Amount.	No.	Amount.

Total	68,599	26,23,590 3 9	68,599	26,23,590 3 9	..	....

As at the end of the preceding years commencing from 1883-84, in which the scheme of reorganization first took effect, so at the end of the year under report no bills remained to be issued at the close of the year.

28. The outstanding balance on account of Property Rates at the end of 1887-88, as shewn in the Reports for that year, was Rs. 1,29,732-13-8 which, with the total demand for 1888-89 and former years, as ascertained in the year under report, less the amount of drawback or remission under section 76 of the old Act, *viz.* Rs. 2,270-11-11, makes a total of Rs. 29,59,313-1-5 for collection as against Rs. 27,96,333-3-11 in 1887-88.

29. The details of the amount for 1888-89 and the progress made in collecting it are as follows :—

Rates.	To be collected.				Collected			Uncollected.	Deduct Irrecoverable Bills.					Balance outstanding at the end of 1888-89.		
									On account of former years.							
	Opening Balance outstanding.	Total of Bills issued during 1888-89.	Amount paid by Government and Port Trust without Bills.	Total.	On account of former years.	On account of 1888-89.	Total. Out of the above balance of Rs. 1,70,097-7-1, Rs. 70,000 were held in deposit in the Municipal Treasury at the close of the year under report pending the settlement of the question of the valuation of the Victoria Terminus Buildings of the G. I. P. Railway Company. The real balance was thus only Rs. 1,00,097-7-1, of which Rs. 66,948-11-3 have since been collected up to the end of September 1889, leaving a balance to be collected of Rs. 33,148-11-10.

Wheel Tax.

30. The opening outstanding balance on account of this Tax was Rs. 4,812-3-0. The demand for the year under report was Rs. 1,79,478-12-0 as against Rs. 1,75,423-7-0 in the preceding year, showing an increase of Rs. 4,055-5-0 for the year under report. The details of the increase for 1888-89 are as under:—

For 1887-88.	Number at the end of 1887-88.	4-wheeled Carriages.	2,787	
		2-wheeled Carriages.	460	
		Horses.	3,185	
		Ponies.	278	
		Labour Carts.	274	
		Native Haokeries.	16	
		Amount.	Rs. 1,75,423 7 0	
For 1888-89.	Number at the end of 1888-89.	4-wheeled Carriages.	3,109	
		2-wheeled Carriages.	452	
		Horses.	3,547	
		Ponies.	285	
		Labour Carts.	398	
		Native Haokeries.	25	
		Amount.	Rs. 1,79,478 12 0	
Increase.		4-wheeled Carriages.	322	
		2-wheeled Carriages.		
		Horses.	862	
		Ponies.	7	124
		Labour Carts.		
		Native Haokeries.	9	
Decrease.		4-wheeled Carriages.		
		2-wheeled Carriages.	8	
		Horses.		
		Ponies.		
		Labour Carts.		
		Native Haokeries.		
Increase.			Rs. 4,055 5 0	

31. To the amount given above must be added Rs. 633-14-0 ascertained in the year under report to be due for previous years. The total number of Bills issued during the year for the demand thus arrived at, *viz.*, Rs. 1,80,112-10-0 was 10,398, and the process of recoverey was attended with the following results :—

To be Collected.			Collected.			Uncollected.	Deduct Irrecoverable Bills.						Balance outstanding at the end of 1888-89.		
							On account of former years.				On account of 1888-89.				
Opening Balance outstanding.	Total of Bills issued during 1888-89.	Total to be collected.	On account of former years.	On account of 1888-89.	Total.		Time-barred Bills.	Bills cancelled as erroneous. 32. Since the close of the year Rs. 2,341-12-0 have been collected up to the 30th September 1889, leaving a balance to be collected of Rs. 2,390-0-0. The amount recovered on account of licensed public conveyances was Rs. 1,21,633-2-0 as against Rs. 1,44,289-4-0 for 1887-88. Rs. 14,210-6-0 were realized from the tolls at Mahim and Sion Causeways.

33. *Property Taxes and Wheel Tax.*—The following tables show the total assessments, collections and outstanding balances under these heads for the year under report, as compared with those of the preceding five years, during which the new scheme has been working. Table No. **II.** shows also the cost of such assessments, collections and refunds for each of the years in question :—

I.—Total Assessments on account of Property Taxes and Wheel Tax.

Year.	No. of properties.	Gross annual value at the end of the year, including value represented by Government and Port Trust payments.			ASSESSED DEMAND.											REMARKS.
					Property Rates.					Total of property rates.			Wheel tax, including public conveyances and the toll on the causeways.	Total assessed demand.

* Of this sum, Rs. 70,000 were held in deposit in the Municipal Treasury at the close of the year under report pending the settlement of the question of the valuation of the Victoria Terminus Buildings of the G. I. P. Railway Company. The real balance was thus only Rs. 1,04,829-3-1, the collections paid into the Treasury really amounting to Rs. 31,56,298-9-0.

Miscellaneous Revenue.

34. The receipts from notice and other process and inspection fees amounted in the year under report to Rs. 5,621-9-7 against Rs. 6,374-0-10 for 1887-88. Rs. 5,902-9-5 were collected on account of the hire of water meters against Rs. 3,886-9-6 in the preceding year.

Tax on Fire Insurance Companies.

35. The collections under this head amounted to Rs. 34,708 including Rs. 500 for 1887-88 against Rs. 33,626 for 1887-88.

Refunds.

36. The total of refunds allowed on account of vacancies and over-collections under all heads amounts to Rs. 13,456-15-4, the details of which are as follows :—

V.—Public Works.

DRAINAGE.

39. Full details of the works in progress during the year will be found in Mr. Smith's report. The most important to be noticed are : the erection of ventilating shafts in various districts ; the completion (departmentally) of the Khetwadi house connections ; the progress, under contract with Messrs. Bulkley & Co., of the pipe sewers and house connection work in the Queen's Road district ; new branch sewers in Bellasis Road, Foras Road, and Gilder Street ; surveys (completed) for house connections in a large portion of the Agripada district ; surveys (completed) of the entire sewerage of Colaba, and surveys (in progress) for pipe sewers and ovoid sewers in Umarkhadi, Bhuleshwar, Kharatalao, Tarwady, Mazagon, Byculla, Chinchpogli and Parel districts. Any special comments on these various works, will find a more fitting place when these several reports are presented. Any general remarks as to the necessity of providing proper sewers for undrained or illl-drained districts, must needs be a mere repetition of what I have said on so many previous occasions. I fully concur in the observations made by Mr. Charles last year in this branch of his report, and I beg the Corporation to remember that, apart from the evils inherent to a want of systematic sewerage, there is an ever-increasing risk of disaster from allowing, even as an inevitable temporary expedient, the new sewers and the new pumping machinery to be applied to a purpose which they were never designed to serve. The rapid extension of buildings makes the sewerage of the northern districts a matter of pressing importance, and no time should be lost in arriving at a definate conclusion as to the best sewage outfall for those districts.

WATER WORKS.

40. Good progress was made with the dam works, the outturn of the year, representing a value of Rs. 6,80,105-0-2 as compared with Rs. 4,61,510 9-4 in the preceding year. The excavations for foundations still continue to give trouble owing to considerable faults being met with, and the estimate on this account will be exceeded. At the end of the year, the greater part of the dam across the river bed had been raised to R. L. 364, the final level being R. L. 408 for project as now being carried out, capable of being raised to R. L. 425 at any future time.

Tansa.

Duct Works.

Notwithstanding many difficulties—amongst which I regret to have to include the death from exposure and hard work of Mr. James one of the most active members of the firm—the progress on these works has been fair; the work done during the year representing a value of Rs. 11,50,000 for pipe-laying only. The total length of tunnelling executed during the year was 4,800 lineal feet. Bassein Creek Bridges, Nos. 1 and 3, consisting of four spans each, have been completed; 4 miles of the 48″ main on Siphon Track, No. 6, were laid and jointed.

Cast-iron Pipes.

Of the 35,000 tons tested and passed in England during the year, 30,000 tons had been delivered.

Land Acquisition.

The greater part of the land required for the lake and duct has been acquired, certain properties in the Island of Salsette remain to be settled for, and the land for the pipe line from Ghatkupar into Bombay still has to be acquired. The progress which has been made up to the close of the year in the several main branches of the work is approximately represented as follows:—

Conduit and Tunnels.	Dam.	Pipe-laying.	Bridges.
·3	·4	·5	·8

Health.

An outbreak of cholera of a virulent type occurred in April at Atgaon, but, owing to the precautions taken, it did not spread to the dam works. It, however, occasioned a panic amongst the work-people, and a consequent interference with the progress of the works. Malarious fever was prevalent throughout the districts, from which the municipal staff suffered to a slight extent.

Vehar.

41. The rainfall for the year was 76·71 inches, the average for the preceding 27 years being 81·59 inches. The rainfall was not of a character favourable to a large percentage collection in the lake, and on the 31st October 1888, the water level was only at 257·15 T. H. D., the level at which the water overflows being 262·50 T. H. D.

The first section of the work of replacing the puddle trench in the waste weir was completed. The object of this work is to stop the leakage of 1,250,000 gallons per day, which took place when the lake was full. Although the water in the lake failed to rise to the levels where the heaviest leakage took place, the gaugings show that the work done has

materially reduced the leakage. The second section of the work remains to be completed.

The following other works were completed during the year:—Repitching and repairing of Dam No. 2. Chawl for workmen. Catch-water channels. A site near the existing filters was surveyed and contoured with a view to the extension of the filter beds. The bungalow is being thoroughly repaired, and rooms have been erected over several sluice houses along the line of pipe.

Tulsi.

42. The rainfall for the year was 89·08 inches being about an average one. The lake was filled on the 21st August 1888, but as the close of the monsoon was a very light one, the lake was on the 31st October 1888 one foot lower than on the 31st October 1887. This difference was gradually reduced by the supply to the city being restricted by about 20 per cent., and the height of the lake was the same on the 31st March 1889 as on the 31st March 1888.

On the 7th January 1889 a sum of Rs. 10,000 was sanctioned by the Corporation for the excavation of a catch-water channel along the hill on the south of the Kennery valley to the west of Dam No. 2, it having been estimated that by this means the gathering ground will be increased by 250 acres and an addition of 10 per cent. obtained to the present lake supply. Work was commenced at once, and fair progress had been made by the close of the year. It is proposed during the ensuing season to line the channel with masonry.

Leakage from the different dams has been gauged and watched during the year, and it is satisfactory to find that there is no cause for anxiety.

Service Reservoirs.

43. At the Bhandarwada Reservoir, the quarters for the Inspector have been completed. The leakage of the Bhandarwada and Malabar Hill Reservoirs has been the subject of reports separately printed and issued during the year, and the subject was under consideration at the close of the year.

Distribution Mains.

44. The total length of new mains laid during the year, exclusive of the Arthur Road 27″ main, was nearly 8 miles. The 18″ main in Frere Road is the most important one. By the laying of this main,

the character of the water-supply in that district has been entirely changed. There are now no complaints, and the shipping is supplied without any difficulty.

The laying of the Arthur Road 27″ main (which, it will be remembered, is to form the last link of the Tansa supply main) was completed on the 31st March 1889. Its total length is 14,338 feet. The first section of the main was put into use on the 23rd January 1889, and materially improved the supply to the Agripada, Dhobiwada and Warden Road districts. All the connections with existing service mains are so made that the 27″ main can be used either as a distributing main, or as a leading main to the reservoir, and Tulsi water can now be sent to the city direct if required.

On all the new mains laid down, fire hydrants have been fixed at intervals of from 300 to 500 feet, and 200 fire hydrants have also been fixed to old mains. One of the most important undertakings of the year has been the re-surveying of the whole of the water mains and their fittings, and the preparation of revised plans of them.

The total number of new connections made during the year was 962; after deducting 228 disconnections, the net increase is 734. The total number of connections is now 16,098. The increase of 734 is equal to 4·8 per cent. of the whole. The increased demand on account of the new connections is about ¾ million gallons per day or about 1,000 gallons for each connection.

The abolition of dipping wells and the substitution of taps and fountains is being carried out as the distribution arrangements permit.

A new fountain at Hornby Vellard called the "Wadia Fountain" was opened. This is in substitution of the old Pao Market Well in Bazaar Gate Street, which was closed and the site added to the roadway, and a drinking fountain with cattle trough has been erected in Lady Jamsetji Road, Mahim, by Mr. Haji Vydina Kassum.

Waste Prevention.

45. The measures which have been adopted in accordance with the Liverpool system for the detection of waste, were continued throughout the year.

Bursts.

46. Of these, the only one of a serious nature was that which occurred near Kurla sluice-house on the Vehar Line on the 12th January 1889.

A long length of the original 32″ main, subjected to specially deteriorating influences where it crosses the salt land, will shortly require renewal. Frequent bursts occurred in those of the 3″ mains which were also laid about 30 years ago. The staff are not as well provided, as they should be, with appliances for dealing promptly with bursts in the large mains, and one or two portable pumps and engines of adequate capacity must be provided.

47. The new works required, but which have yet to be considered, are the following:—Additional filtration, both of the Vehar and Tulsi waters. Additional Reservoir accommodation. Road from Vehar to Tulsi. Laying of 9″ and 12″ mains at suitable distances apart throughout the city. Better arrangements for road watering and the substitution of sea water for lake water for this purpose wherever it can be economically effected.

ROADS AND LIGHTING.

Roads.

48. The state of the roads still continues to leave much room for improvement, and a reorganization of the staff is under consideration. Four new steam-rollers have been purchased, and a considerable addition was made to the stock of carts for watering and scraping. 102,411 square feet of footpaths were paved with blue stone. Eight roads in A Ward and five in B Ward were taken over from the Port Trust. The road from the Mahaluxmi Station to Haines Road was taken over from the B. B. & C. I. Railway Company, in exchange for certain municipal land, and a new road from Clerk Road to Haines Road is in course of construction. Negotiations for the proposed road through Nowroji Hill having failed owing to difficulties raised by the owners of the properties, it has been decided to acquire the whole of the land required under the Land Acquisition Act. A overbridge at Falkland Road has been determined upon, but the precise width and gradients remain at present unsettled. The construction of retaining walls at certain points on the Gibbs and Walkeshwar roads, where landslips occurred, were completed. There was no extension of the tramway during the year.

Lighting.

49 The illuminating power of the gas was up to the contract standard, but falls short of the standard of modern requirements, and frequent complaints were made of the insufficiency of the

hours of lighting. The approaching termination of the present contract affords a good opportunity for the introduction of improvements in lighting, and this subject has engaged the attention of a special Committee of the Corporation. Their recommendations will be noticed in next year's report. It is, however, certain that the number of lamps (whatever be the system of lighting) must be very largely increased, and that a proper inspection staff must be provided. A proposal from the Registrar of the University to light the Rajabai Clock Tower at municipal expense was negatived by the Corporation.

REGULATION OF STREETS AND BUILDINGS.

50. There were 1,172 applications for permission to either build or rebuild; and of these, 1,162 were passed. There were 2,985 notices regarding building matters served on house-owners; 555 summons were issued for different offences, of which in 344 cases the parties complied with the municipal requirements before service of the summons. In the remaining 211 cases, convictions were obtained. There were 26 cases of buildings or parts of buildings falling, of which 7 were of a serious nature, resulting in the death of 6 persons and 1 bullock, and in injury to 14 persons, 20 bullocks and 1 horse. By-laws to regulate the structure and ventilation of new buildings on old sites are urgently required. In the new Act itself certain elementary provisions have been introduced for regulating the erection of buildings on new sites, but until by-laws are passed, there is very little power for dealing with "jerry building" in the greater part of the city. For the summary removal of ruinous houses, huts, objectionable constructions, &c., 1,166 orders were issued to the Municipal Inspectors, but of these the house-owners themselves executed 669. The amount spent for land taken up for street improvements was Rs. 49,033-11-9, the area being 2,089·41 square yards.

MUNICIPAL BUILDINGS.

51. Besides the works already alluded to under the heads of Drainage and Water Works, the following were completed or in course of construction respectively :—

Completed.	Under construction.
The Fire Brigade Station at Gowalia Tank Road.	The Fire Brigade quarters at Pydhownie.
The re-instatement of the godowns at the Arthur Crawford Market, which were destroyed by fire, and the alteration of 45 stalls in the Beef Market.	The Erskine Road Market extension.
The Small-pox Hospital at Arthur Road.	

52. Amongst works, still under consideration, or which had not been commenced at the close of the year, were the following :—

Fire Brigade Stations at Sankli Street, Byculla, Musjid Bridge, Fort or Middle Colaba. Vaccination Depôt for the Fort. Hospital for epidemic diseases, extension of the Mahalukshmi Dhobiwada. Buildings for purposes of the Health Department in F and G Wards.	Erection of a new Mutton market of 104 stalls in the Arthur Crawford Market. Measures to guard against fire in the markets. Marble slabs for fish stalls. Quarters for market attendants. New market at Colaba, and the extension of the Bhuleshwar Market.

53. The premises occupied by the Ward Office at Dadur were purchased for Rs. 14,000.

54. An annual sum of Rs. 3,000 has been sanctioned by the Corporation to be set aside to provide for loss from fires on municipal buildings.

New Municipal Offices.

55. A proposal to purchase the Cathedral High School and to adapt it for Municipal offices was, after consideration, rejected; as was also the proposal to select the site in front of the Sailors' Home. The site originally selected (opposite the Victoria Terminus), on which the foundation stone was laid by Lord Ripon, has been adhered to. The designs of the new municipal offices submitted by Mr. F. W. Stevens, C.I.E, M.I.C.E., F.R.I.B.A., the Architect, appointed by the Corporation, were approved of on the 13th March last, the approximate estimate of cost being Rs. 9,76,350, and the work was at once commenced.

GARDENS.

56. The gardens have been well attended to during the year and great credit is due to the Superintendent, Mr. G. H. Carstensen, for the results obtained. Steady progress has been made with the landscape improvements in the Victoria Gardens, and the collection of plants has been considerably increased. The Superintendent has commenced the prepara-

tion of a descriptive scientific catalogue of the plants. The zoological collection has been maintained in fairly good condition, but no improvements in the housing of the animals had been effected. A proposal from the Bombay Natural History Society to take over the zoological collection was not acceded to. Proposals for placing the gardens on a better footing, both zoologically and otherwise, were still under the consideration of the Corporation at the close of the year.

THE VICTORIA AND ALBERT MUSEUM.

57. A special grant of Rs. 1,000 was made by the Corporation towards the Museum collections.

The building was open to the public for 313 days, and the total number of visitors was 640,206, or a daily average attendance of 2,045. Last year although the Museum was open for the same number of days, the total number of visitors was only 586,228 or a daily average attendance of 1,872. The increase in the number of visitors for the year under report is due to the partial return to the former hours of opening and closing the Museum.

Several additions were made to the different divisions of the Museum, details of which will be found in the report of the Secretary and Curator, who specially notices a further development of the Natural History Division likely to be useful to students of Comparative Anatomy.

VI.—Public Health.

58. During the year under review, the public health has not been so good as in the preceding year. The total number of deaths from all causes amounted to 22,421, equal to a death-rate of 25·16 per 1,000 of population. The number of deaths last year was 20,513, or a death-rate of 23·25. The average number of deaths for the last 5 years is 21,480, or a death-rate of 24·97. The usual annual estimated increase of population has been allowed for in the above calculations.

59. The number of deaths from different causes during the last five years, and the death-rate per 1,000 of population of each of the causes is shown in the following return :—

RETURN showing the number of deaths and the death-rate per 1,000 of population from different causes during the last 5 years.

YEAR.	Total number of deaths.	Per 1,000 of population.	Cholera.	Per 1,000 of population.	Small-pox.	Per 1,000 of population.	Measles.	Per 1,000 of population.	Fever.	Per 1,000 of population.	Phthisis.	Per 1,000 of population.	Nervous system.	Per 1,000 of population.	Respiratory system.	Per 1,000 of population.	Diarrhœa.	Per 1,000 of population.	Dysentery.	Per 1,000 of population.	Accidents.	Per 1,000 of population.	Other causes.	Per 1,000 of population.

60. There was an increase of 110 cases of cholera over that of the previous year, being 11 above the average of the last five years. The localities where the death-rate was greatest were Upper Colaba, Esplanade, Mazagon, Fanaswadi, Girgam, Worli and Sewree. The Health Officer alludes in detail to the scandalous case in which cholera was brought into the city by a coasting steamer from Bhavnagar. A virulent outbreak occurred at Gorupdeo, a locality the Health Officer specially referred to in his last annual report as needing drainage, and there were two outbreaks in Borebhat, another locality of imperfect drainage and overcrowding.

61. Upon an epidemic of small-pox making its appearance in the beginning of the year, a special small-pox hospital was opened, and the measures of sanitation and vaccination, that it is usual to adopt on such occasions, were fully enforced. The number of deaths was 482 against 108 of the previous year, and 155 the average. The localities where the death-rate was greatest were Parel, Mazagon, Byculla, 1st Nagpada, Tarvadi and Mahalukshmi. The S.S. "Stura" with 627 pilgrims from Java arrived in Bombay with 7 cases of small-pox on board. The sick were removed to hospital, and the healthy were landed and placed in a shed on the wharf. After the landing five more cases occurred amongst the pilgrims.

62. The number of deaths from fever was 6,642 or 970 more than in the previous year, and 332 more than the average. The increase has been chiefly amongst the Hindu low-castes. There have also been increases in the number of deaths from phthisis, diseases of the respiratory system, dysentery, accidents and other causes. Decreases have taken place in measles, diarrhœa and diseases of the nervous system.

Hospitals.

63. The proposal to establish a hospital for epidemic diseases at Khetwadi, at first sanctioned by the Corporation, was afterwards cancelled on account of the strong protest from the inhabitants of the neighbourhood. An amended scheme is now under the consideration of a Committee of the Corporation, and meanwhile the sheds at Grant Road and Arthur Road are used on occasions as heretofore. The usual pecuniary contributions were made in support of the Gokaldas Tejpal Hospital and the Jaffir Sulliman Dispensary.

64. The city was for some time infested by a large number of paupers from Kathiawar and Guzerat where the rainfall had been scanty. A Famine Relief Committee was formed by some philanthropic gentlemen, but the immigrants were for the most part sturdy vagrants who refused to work when work was offered to them, as they preferred to beg and breed nuisance and danger in the highways. As the Magistrates would not, or could not, convict, the police were powerless to put a stop to the evil. Government disclaimed all responsibility in the matter, and, in default of any better arrangement, the strangers were accommodated in the hospital sheds at Arthur Road. From thence by degrees, and somewhat reluctantly, they returned to their own homes, the cost of conveyance being in most cases provided by charitable persons in Bombay or by the Native States to which they belonged. Some of the immigrants were from British territory, but no offer was made by the authorities to do for them what was done in respect of subjects of Native States by their rulers. It is to be hoped that some measures will be devised to protect Bombay from a recurrence of this infliction.

65. Owing to the scanty rainfall, the quality of the filtered water from Vehar and Tulsi has not been equal to the average supply, and it is very desirable that the filtering accommodation should be increased. The Health Officer points out that the unhealthiness and nuisances attending the want of proper drainage are enhanced by the rate of increase in population and buildings being greater than the rate of progress in the prosecution of the sewerage works. The most graphic description of the foul state of some districts will not give as good an idea of the truth as a quarter of an hour's visit, and therefore I refrain from saying more on the subject. It is, however, important to bear in mind that even apart from the Sanitary aspect of the question, the absolutely necessary addition to the already unwieldy and unmanageable staff of the Health Department, for regularly emptying the rapidly increasing number of cesspools will entail on the Corporation an immense outlay which might be avoided if the Sewerage works were actively proceeded with.

66. The number of births recorded during the year has been 16,760 against 15,429 for the previous year, and 15,340 the average for the last five years. The birth-rate per 1,000

of population has been 21·67. I regret to say that I cannot place any greater reliance than in previous years on the accuracy of these statistics which shew the marvellous and incredible contrast of a birth-rate of 81 per 1,000 among the Eurasian population and 11 per 1,000 among Brahmins. I think that it is quite time that birth registration and vaccination should be worked together, whether under the direct supervision of the Sanitary Commissioner, or as a branch of the Health Department of the city. On the subject of registration and vaccination, I venture to ask a reference to my remarks in para. 43 of the report for 1881, para. 87 of the report for 1883-84, and paras. 49 and 51 of the report for 1885-86.

67. Of the dead, 15,320 were buried, 7,071 burnt, and 1,212 carried to the Tower of Silence.

Conservancy.

68. On an average, 3,974 men and women were employed, and 665 scavengering and drain carts and 158 night-soil and cesspool carts were at work each day. The collection of garbage or kutchra was 300,249 tons equal to 822 tons a day. The collection in the previous year was 282,200 tons; 127,287 tons of night-soil, equal to 348 tons a day, were collected and removed against 120,841 tons in 1887. 207 miles of covered drains were opened and cleaned against 211 in 1887.

69. A Committee of the Corporation was appointed to enquire into the heavy mortality of the bullocks of the Health Department, but the report had not been submitted at the close of the year.

70. A large plot of land on the flats was purchased for the disposal of town sweepings. The subject of the disposal of town sweepings is one which needs early attention. In a short time there will be no longer any site on the flats available for this purpose, and a scheme for conveying the sweepings to the salt tract between Kurla and Thana is under consideration.

MARKETS.

71. The total revenue from the Markets and Slaughter Houses was Rs. 3,22,517-6-8 against Rs. 3,04,516-8-10 for

1887-88, being a net increase of Rs. 18,000-13-4. This increase is principally due to the stalls at the markets having been let at higher rents, a greater number of animals having been slaughtered, and to an increase in the amount of squatters' fees.

72. The godowns in the compound of the Arthur Crawford Market which were burnt down last year, were re-erected. The projected addition of 175 stalls to the Erskine Road Market had not been quite completed at the close of the year. The proposed new market for Colaba has had to be postponed owing to the difficulty experienced in obtaining a suitable site. The extension to the Bhuleshwar Market is engaging attention, and action is being taken by the Collector of Bombay for the acquisition of the site approved by the Corporation.

73. The supply of fruit and vegetables during the year was plentiful and good, and the prices were moderate.

74. The following is a comparative statement of the meat consumption of three years:—

Animals slaughtered at the Municipal Slaughter Houses at Bandora for Public and Commissariat consumption (exclusive of the local supply to Bandora).

	1886-87.	1887-88.	1888-89.
Horned cattle	26,387	27,491	29,959
Sheep and goats	454,509	457,126	465,807
Pigs	977	846	939

Animals taken from the Municipal Slaughter Houses for private slaughter.

Horned cattle	552	1,253	932
Sheep and goats	44,013	45,754	51,358

75. Over 68 tons of food (chiefly beef and grain), unfit for consumption, were destroyed during the year.

76. There were 23 convictions for market offences against 110 in the previous year, or a falling off of 87. The average

penalty amounted to Rs. 11-11-1 against Rs. 4-14-9 for 1887-88. All these convictions were for unlawful slaughter. The falling off in the number of convictions is due principally to the Presidency Magistrates insisting (in accordance with law) on our proceeding in all cases by summons, and in the greater number of these cases the summonses cannot be served.

FIRES AND STREET ACCIDENTS.

77. The number of fires reported during the year was 86, or 16 more than the previous year. The loss of property is stated to have been approximately Rs. 7,65,766 against Rs. 10,46,931 for 1887-88. The most serious fires were the following :—

		Estimated loss of property.
15th April 1888	—Musjid Bundar Road—building.....Rs.	40,000
18th May „	—Haines Road—chawl ..... „	15,000
23rd Aug. „	—Mody Bunder—stacks of wood ..... „	27,000
3rd Sept. „	—New Mody Bundar—rice and sugar... „	62,477
21st Oct. „	—Bangwady—house ..... „	95,500
24th Dec. „	—Darookhana, Mazagon—kerosine oil and Port Trust buildings ..... „	20,000
4th Feb. 1889	—3rd Bhoiwada—house ..... „	28,000
5th „	—Clerk Road—hay stacks ..... „	1,20,000
„ „	—Bellasis Road, New Nagpada—houses „	12,430
17th „	—Colaba—cotton press and cotton godowns ..... „	2,65,000
25th Mar. 1889	—Tindel Street—cotton and wool..... „	26,400

78. The following is a statement of the number of fires which took place, and the approximate amount of damage done during the last five years:—

Year.	Number of fires.	Value of property destroyed.
		Rs.
1884-85	39	4,20,419
1885-86	57	6,47,506
1886-87	76	45,870
1887-88	70	10,46,931
1888-89	86	7,65,766

79. Whilst dealing with this branch of my subject, I may mention that I have under consideration the more complete organization of the Fire Brigade to meet the requirements of the new Act, and also that the change of law has put a stop to the contribution hitherto recovered from the Insurance Companies which yielded about Rs. 25,000. In lieu of this item of revenue, the legislature has prescribed such an addition to the general tax, not being less than $\frac{1}{8}$th or more than $\frac{3}{4}$ths per cent. of the rateable value of properties as will suffice for the due maintenance of the Fire Brigade.

80. The number of persons run over in the public streets was 490, of which 24 were killed. The accidents occurred chiefly in the Bhendy Bazaar Road, Parel Road, Duncan Road, Thakurdwar Road, Kalbadevi Road, Hornby Road and Dongri Street.

81. The following table gives the number of street accidents during the last five years :—

Year.	Number injured.	Number killed.	Total.
1884-85	285	20	305
1885-86	409	23	432
1886-87	366	28	394
1887-88	364	31	395
1888-89	466	24	490

82. Possibly the increase in the number of casualties recorded may be ascribed to a more accurate system of

reporting, but otherwise it is remarkable as being co-incident with a steady improvement in the provision of paved foot-paths. Some time ago an opinion was expressed that foot-passengers were driven into the carriage way by the roughness of the side paths, but I fear that comparatively good paving has done little to effect a change of habits in this respect. The new pavement is used for cooking, for drying clothes, for encroachments of every description, and I doubt whether these traditional obstructions can be prevented, or the street traffic regulated until the strength of the Police force is placed on a footing more adequate to the wants of the city.

VII.—Education.

83. The receipts from, and the expenditure on, primary Schools, to the support of which the Municipality contributes, are given below :—

Receipts.

Provincial Grant.	Fees.	Municipal contribution.	Interest.	Total.
Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
16,000	22,148 0 0	37,633 8 0	600 0 0	76,381 8 0

Expenditure.

Salaries, including Pension Fund.	Contingencies.	Reward to indigenous School-masters.	Public Works expenditure.	Contribution to Scholarships in the Poona Male & Female Training Colleges.	Contribution to Anjuman-i-Islam Mahomedan School.	Total.
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
44,023 1 1	20,579 10 7	.....	4 8 5	463 9 11	5,000 0 0	70,070 9 0

84. The Corporation made contributions to other Educational Institutions, as follows :—

	Rs.
School for Deaf and Dumb Mutes	1,800
Veterinary College.....	2,500
Technical College	10,000

85. The following statement shows the number of schools in the Island of Bombay, with the attendance on rolls as it stood on the 31st March 1889 :—

No. of School.	Name of Schools.	Attendance on rolls.
	MARATHI SCHOOLS, BOMBAY.	
	Primary Boys' Schools.

27	Rangari Street Night School	48
28	Chandanwadi do.	27
29	Masjid Bandar do.	15
30	Nal Bazar do.	22

86. The number of schools is the same as in the previous year, but the attendance on the roll stands at 6,196 against 6,457 in 1887-88.

87. One important feature of the new Act was the constitution of a Joint Schools Committee of eight members—to be appointed half by Government, and half by the Corporation—for the management of Primary Education in the city. The new Board was formed, and Dr. Blaney was elected the first Chairman, but the machinery is still incomplete and up to the close of the year the Primary Schools remained on their former footing.

E. C. K. OLLIVANT,
Municipal Commissioner
for the City of Bombay.

FINANCIAL.

REPORT OF Mr. SORABJI NAVAROJI COOPER, Chief Accountant,
as forwarded with his letter No. 1519, dated
14*th September* 1889.

From the Revenue Statement A you will observe that the receipts under certain heads fell short of the estimate by Rs. 74,505-4-11, whereas under others it exceeded our expectations by Rs. 3,93,947-11-9, thus resulting in a net surplus revenue of Rs. 3,19,442-6-10, of which Rs. 1,06,300 were anticipated when framing the Budget for the current year, and were consequently appropriated therein.

A.

STATEMENT showing the Net Receipts during the Financial year 1888-89 *from all Sources contrasted with the Budget Estimate.*

PARTICULARS.	Actuals for 1887-88.	Budget Estimate for 1888-89.	Actuals for 1888-89.	More than Estimate.	Less than Estimate.

Grand Total...Rs.	51,66,529 10 11	46,46,750 0 0	49,66,192 6 10	3,19,442 6 10	

The Property Rates produced Rs. 1,39,997-2-8 more than the Budget Estimate, principally on account of increased valuation, the springing up of a number of large new buildings, mills, &c., and increased Halalkhor and water service. The increase in the Consolidated Rate was Rs. 80,000 more than what is shown above. This further increase will, however, appear in the accounts of the current year, as the last mentioned amount of Consolidated Rate bills for 1888-89, disputed by the G. I. P. Railway Company, have been fully paid by them during July 1889.

	Rs.	a.	p.
Consolidated Rate	39,024	8	1
Halalkhor Cess	19,038	9	5
	58,063	1	6
Water Rate and Miscellaneous Water Works Revenue	81,934	1	2
Rs.	1,39,997	2	8

Under Wheel-tax and Toll Fees the actual revenue fell short of the estimate by Rs. 5,639-10-0 and Rs. 1,589-10-0, respectively, owing to less number of public conveyances and carts paying the full tax and fees during the past year.

Government paid in last year the instalment of Rs. 1,43,750, fixed by Section 63 of Act V. of 1878, in lieu of Liquor Licenses. The Municipal Corporation addressed Government in 1884, requesting such amendments in the law to ensure the full receipts being paid to the Municipality. When a further representation on the subject was made to Government in 1885, pointing out that that source of revenue then yielded them about Rs. 1,80,000, Government were pleased to state in reply that "the Governor in Council, as then advised, was not "disposed to consider that the Corporation have a right to insist upon "an increase in the amount of compensation for the loss of Liquor "Licenses, &c. A Bill for the amendment of Bombay Act V. of 1878 "is, however, at the present moment under the consideration of His "Excellency the Governor in Council and when that Bill is introduced "into the Legislative Council, the Corporation will have every oppor-"tunity of giving expression to their views on the subject."

It appears on inquiry that the amendment Bill was not introduced into the Legislative Council.

When the Corporation addressed Government in 1885 the actual revenue was about Rs. 2,56,000 as per printed accounts. When Mr. Charles, the acting Commissioner, on my report addressed Government in November 1887 that they might be pleased to "see fit to take early "steps to put the matter on a footing more in accordance with the "actual state of the revenue," to which representation no reply from Government has yet been received, the income had increased to Rs. 2,63,000. It has, as already reported in my No. 255 of 27th April 1889 to your address, now increased to nearly Rs. 3,00,000. The loss to the Municipality from 1878 to end of last year has been nearly Rs. 11½ lakhs, and will in future involve a loss of more than Rs. 1½ lakhs per annum. I think, therefore, it is now high time to make a mighty effort to induce Government to reconsider their former decision on the subject, especially when we have to provide half a lakh more per annum for Sinking Fund on the Tansa Loan, in consequence

of the Government of India insisting that the major portion of the loan should be liquidated in 40 instead of 60 years, when, owing to the above restrictions to the maximum period for the repayment of our loans, which is not to exceed forty years in any case, notwithstanding such maximum limit having been fixed at 60 years in the new Municipal Act, we will have to provide at the rate of about $\frac{7}{8}$ per cent. instead of at about $\frac{5}{16}$ per cent. for Sinking Fund on all our future loans, which must necessarily be large, as we will have to undertake very important and extensive works, such as Drainage and Water Works, Roads, Market Extensions, Street Improvements, &c., &c., in this vast and growing city during the next few years, and when there is a probability of Government calling upon the Corporation under the provisions of the new Municipal Act to contribute towards the Police Expenditure a higher sum than that fixed under Government Resolution No. 797, dated 26th February 1883, which is now considered inadequate.

There was a small falling off in the net revenue of License Fees on Public Land Conveyances.

The detailed reasons of Town Duties yielding Rs. 63,102-13-0 less than the Budget Estimate are given at pages 64 and 65 of this Report.

The Tobacco Duty Licenses yielded Rs. 11,296-11-4 more than our expectations, presumably owing to a larger consumption of tobacco amongst the increased population in the city.

The increase of Rs. 31,563-6-7 in Market Receipts was chiefly derived under the sub-heads (1) Stall rents, on account of increased number of stalls occupied and increased rent directed to be levied during the past year by the Acting Municipal Commissioner, Mr. Charles; (2) Squatters' fees from contractors, owing to better results at auction sale; (3) Departmental squatters' fees, chiefly from the Null Bazar extensions; and (4) Slaughter fees on larger number of animals slaughtered.

The receipts on account of contributions from Municipal servants towards Pension, &c., Fund were Rs. 4,844-8-10 in excess of the estimate. Of this about Rs. 2,300 were due to an under-estimate of this source of income, Rs. 500 were recovered on increased salaries, and about Rs. 2,000 for arrears contribution of the Assessment and Fire Brigade Establishments.

The increase of Rs. 692-3-10 in Tramway rent was entirely due to the receipts from the extension of the Tram lines from Mint Road to the junction of Frere and Carnac Roads being under-estimated.

Owing to the Insurance Companies having returned a larger amount of business we received Rs. 2,708 more than the anticipated amount of their contributions.

The decrease of Rs. 1,868-5-2 in the realizations from Miscellaneous Fines was entirely due to the remission sanctioned in 1885 of a fine of Rs. 2,000 inflicted in 1883 on the Bhandarwada Contractors for the non-completion of their contract within the prescribed contract time having been adjusted in the accounts of the past year.

There were small increases of Rs. 207-14-5 and Rs. 741-1-0 under Miscellaneous Fees and Miscellaneous Savings.

Miscellaneous Receipts produced Rs. 30,647-15-2 more than our expectations, of which about Rs. 13,000 were realized on account of sale of land near Victoria Gardens, at Cooper Street and Malabar Hill, about Rs. 11,000 from reclamation produce and rents of Milch Cattle Stables (Health Department), and Rs. 6,000 for rent of telephone lines and vacant land and sale of rights for cutting grass, catching fish, drawing toddy, &c., &c. (Engineer's Department).

The Gardens yielded Rs. 2,038-8-2 less than our expectations owing principally to the short sales of plants, seeds and fruits, which result the Superintendent considers might have been partly due to the discontinuance of the former practice of complying with up-country orders, unaccompanied by remittances and partly to want of printed catalogues.

The Interest realized on the investments and deposits of the unexpended and undrawn balances of different Loan Funds and the Surplus Cash Account amounted to Rs. 1,10,715-4-10 as detailed below :—

		Rs.	a.	p.
44	Lakhs Sanitary Works Loan	36,184	8	8
7	„ „ „	8,613	6	2
12	„ Drainage and Water Works Loan	23,774	0	7
10	„ Drainage and Water Works, Roads and Markets Loan	2,781	0	2
		Rs. 71,352	15	7
Surplus Cash Account		„ 39,362	5	3
		Rs. 1,10,715	4	10

As no provision was made in the Budget for this item of revenue, the whole sum can be treated as a surplus receipt, part of which was due to the invested or deposited funds being kept intact, though required for loan expenditure met by advances from Surplus Cash.

Taking advantage of the favourable rates obtainable for 4½ per cent. Government Paper in April 1888, Mr. Charles recommended my proposal to the Standing Committee to sell at 107¼ per cent. 6 lakhs of the 4½ per cent. paper in which the Building Fund was invested at rates varying between 98¾ and 102½ per cent. The Committee approved of the suggestion and sanctioned the sale of the paper which resulted in a profit of

Rs. 45,592-8-0. This profit, together with interest realized on the investment of the Fund, amounting in all to Rs. 55,576-10-10, has been added to the Fund as will appear from Statement C, page 54.

Rs. 679-5-0, being the amount of interest allowed by the Bank of Bombay on the Sinking Fund of the 44 Lakhs Sanitary Works Loan, were added to the Fund—*vide* Statement C, page 54.

For the reasons explained at length at pages 80 and 81, the profit derived from the Workshops was Rs. 4,277-7-3.

It will be seen from Statement B that the sum sanctioned for ordinary expenditure, as per Budget for last year, was Rs. 50,50,185. To meet liabilities contracted on account of grants sanctioned for the preceding year, Rs. 5,25,940-15-8 were renewed during the past year. Rs. 2,68,009-11-9, including Rs. 1,61,380-15-5 for additions to invested Building, &c., Funds, losses on Sinking Fund Investments, on Stock, &c., were also sanctioned in 1888-89 for replacements of Store Sheds, &c., at the Arthur Crawford Markets destroyed by fire, purchase of additional land for future extension of the Malabar Hill Reservoir Filter-beds, Lighting &c., Prince's and Victoria Docks, and Wellington Fountain, cremation of bodies of Hindu paupers and out-castes, honorarium to Sir John Fowler, additional catch-water channels at Vehar, general Election expenses, and to meet excesses on the grants for commission on Town Duty collections, Debt and other charges. The total additional sanctions for the past year thus amounted to Rs. 7,93,950-11-5.

Transfers of Rs. 46,046-15-1 from savings in certain heads of expenditure were authorized by the Standing Committee to meet excesses in other heads.

The gross amount sanctioned for expenditure for the past year was Rs. 58,44,135-11-5.

B.

Gross payments on account of Debt., Rs. 15,02,114 15 0

From the foregoing Statement C you will observe that Rs. 52,01,257-14-5 were expended during the past year, out of the total sanctioned grant of Rs. 58,44,135-11-5, leaving an unexpended balance of Rs. 6,42,877-13-0, of which Rs. 4,05,083-10-1 will be required during the current year. Thus the actual saving on expenditure was Rs. 2,37,794-2-11 as explained at length below.

Under the Town Council and Corporation Establishment there remained an unexpended balance of Rs. 5,249-13-2 on the Establishment, Town Councillors' fees and Contingent, &c., grants, of which Rs. 709-1-0 will have to be renewed for unpaid Establishment and Contingent charges for the past year.

Rs. 3,224-8-7 were saved on the Establishment, Contingent and Law charges grants, Municipal Commissioner's Department.

There was a saving of Rs. 163-14-6 on the Establishment, Contingent and Clothing allotments of the Controller's Department.

Rs. 724-13-1 will have to be renewed during the current year for unpaid Establishment, Contingent and Furniture charges, out of Rs. 4,314-4-0 saved on the grants under those sub-heads of the Assessor and Collector's Establishment.

The saving of Rs. 5,894-11-1 on the grant for Town Duty collection, &c., was entirely due to the extra grant of Rs. 11,000 obtained to meet commission charges on the gross Town Duty collections by the Port Trust and G. I. P. Railway Company not having been fully spent.

There were small savings of Rs. 187-11-9 and Rs. 252-11-11 respectively under Tobacco Duty and Licensing Establishments.

On the Establishment, Contingent and Clothing grants, General Supervision, the Health Officer saved Rs. 561-3-0.

There remained Rs. 29,246-7-3 unexpended under the following sub-heads of Conservancy Branch, chiefly on account of the full budget strength of laborers, cart-drivers, carts, &c., not having been employed from the beginning of, and all throughout, the past year.

					Rs.	a.	p.
I. Superintendence					809	3	4
II. Labour—							
A. Scavengering	Rs.	5,571	2	8			
B. Drain Cleaning	„	728	15	9			
					6,300	2	5
III. Disposal of Offal					5,068	2	7
IV. Repairs					2,056	4	1
V, VI, VII, and IX. Waterproof Clothing, Stores, Reserve Live-stock, and Rent					2,125	6	8
X. Halalkhor Branch—		Rs.	a.	p.			
A. Superintendence		1,979	9	9			
B. Labour		2,008	4	10			
C. D, F, G & H, Feed of Bullocks, Stores, purchase of Live-stock, Rent and Lighting Night-soil Depot		672	4	2			
E. Repairs and Maintenance		2,343	8	4			
J. Maintenance of Carnac Bandar Night-soil Depôt		4,271	2	0			
					11,274	13	1
XI. Temporary Small-pox Hospital					1,612	7	1
				Rs.	29,246	7	3

It was almost due to the gradual introduction of the system of paying Birth Registration by results that there accrued a saving of Rs. 1,117-3-7 under Registration of Births and Deaths.

Of the saving of Rs. 3,141-11-6 under Cemeteries, Rs. 1,716-11-9 were due to the grant of Rs. 3,120 for cremation of the dead bodies of Hindu paupers and out-castes not having been fully spent.

Out of the respective grants for Laboratory, Maintenance of Dhobi Lines at Mahaluxmi, Conveyance of infected persons and Disinfection and Tank Conservancy there remained Rs. 328-10-0, Rs. 226-15-6, Rs. 186 and Rs. 242-3-10 unexpended.

The saving of Rs. 4,169-12-0 under Vaccination was principally effected on Establishment, purchase of heifers at lower contract rates, and on the renewed grant for extra Establishment and Contingent charges on account of the small-pox epidemic. Rs. 288 will, however, have to be renewed during the current year to defray the pay of the Assistant Superintendent and a vaccinator, who were on privilege leave during January and February last, and who consequently had to be paid during the current year.

There accrued savings of Rs. 288-13-11 on Establishment and of Rs. 2,490-7-6 under repairs, Milch Cattle Stables, or in all Rs. 2,779-5-5.

Excluding Rs. 288 to be renewed on account of the Vaccination Establishment, the net aggregate saving of the Health Department amounted to Rs. 41,711-8-1.

The saving of the Market and Slaughter Houses Department amounted to Rs. 6,028-10-0, of which Rs. 1,710-10-9 were derived on Establishment, Labour, Meat Carriage, Stores, Contingencies, Repairs, Rent and Clothing, Rs. 1,578-3-4 on Lighting, Rs. 2,460-4-8 on reconstruction of godowns at Arthur Crawford Markets destroyed by fire, and Rs. 279-7-3 on weights and measures Establishment, &c. Rs. 742-15-10 will, however, be required during the current year to meet unpaid Establishment, Contingent and Repairs charges.

Owing chiefly to the absence of Messrs. Walton and MacEwen on sick leave and to the transfer of Surveyors, &c., on loan and other works there resulted a saving of Rs. 4,854-12-11 in the Municipal Engineer's Staff. Of this Rs. 1,839-13-7 will be required during the current year to meet unpaid Establishment and other charges incurred during the past year.

The saving of Rs. 706-4-7 under Lighting had accrued on the consumption of gas at the Wadia Fountain Clock, on Contingencies and on Kerosine Lights.

Rs. 11,767-3-0 of the unexpended balance of Rs. 12,815-9-11 of the Road Watering grant, will have to be renewed during the current year to defray the charges for bullock pairs supplied in 1888-89 for water carts, and the cost of 30 new water carts ordered to be made in the Municipal Workshops during the past year.

With the exception of Rs. 2,800-1-3 the whole of the available balance of Rs. 24,327-6-8 of the Road Repairs allotment will have to be renewed in this year to meet unpaid bills for carts and bullocks supplied and for completion of pavement work commenced during the past year.

Only Rs. 694-5-7 remained unexpended out of the grant of Rs. 7,500 for annual repairs to Municipal Buildings in charge of the Engineer.

The entire unexpended balance of Rs. 98,260-10-3 of the Street Improvement assignment will have to be renewed during the current year, as the cost of Bhuleshwar and 2nd Bhoiwada Road improvements in connection with the Bhuleshwar Market extension have been sanctioned by the Standing Committee to be paid out of the above grant.

Rs. 7,080-13-7 will have to be renewed during the current year for completion of works sanctioned or commenced in the past year, out of the balance of Rs. 14,291-9-5 which remained available under Miscellaneous Drainage.

On the Engineer's salary and repairs to Love Grove Pumping Station, there accrued a saving of Rs. 727-4-1.

Of the saving of Rs. 2,291-7-11, Rs. 291-7-11 were derived on Establishment and Repairs, and the balance Rs. 2,000 was due to the grant for renewal of Worli sluice gates having remained entirely unexpended. The latter sum will, however, be required during the current year to meet the charges incurred by the Superintendent of Workshops for renewing the gates.

Of the sum of Rs. 12,499-9-8 shown as available under Victoria Gardens, only Rs. 1,208-15-2 were actual savings on Establishment, Contingent, Seeds and Plants and Repairs provisions. The remaining sum of Rs. 11,290-10-6 will have to be renewed in 1889-90 for uncompleted new works and service pipe.

Rs. 239-5-6 will be required during the current year for repairs and painting, &c., out of the total saving of Rs. 805-12-2 on the Elphinstone Circle Garden.

The small savings on the other gardens aggregated Rs. 695-6-9.

The plans and estimates of the Agripada House Sullage water connections were prepared at a cost of Rs. 186-14-8 less than the estimate.

Thus out of the aggregate savings of the Engineer's Department amounting to Rs. 1,73,157-2-7, Rs. 1,54,005-13-10 will have to be renewed during the current year to meet liabilities incurred during the year 1888-89.

The savings on Interest and Miscellaneous charges on Loans were Rs. 90,717-4-10 and Rs. 1,972-6-0 respectively. The former includes Rs. 34,169-9-5 on account of unpaid interest to be renewed during 1889-90.

I have, however, shown below the aggregate savings and unpaid liabilities of Municipal Debt, including Water Works Fund.

	Rs.	a.	p.	Rs.	a.	p.
Savings on Interest on Loans :—						
On 6 per cent. Local Loans (being the amount of interest realized on Sinking Fund Investments in excess of Budget Estimate)				14,197	11	5
„ 12 Lakhs Drainage and Water Works Loan (being the interest for one-half year on the 2nd Instalment of 6 Lakhs of the Loan raised on 1st July 1888)				15,000	0	0
„ Miscellaneous Works Loan of Rs. 6,82,000 (the whole provision not being required, as a portion of the Loan was raised only at the end of 1888-89)						
(Municipal Fund Rs. 27,350+Water Works Fund Rs. 6,750).....				34,100	0	0
(Municipal Fund Rs. 56,547-11-5+Water Works Fund Rs. 6,750).....				63,297	11	5
Savings on charges on Loans principally on the provision for Bank's commission, which was not required owing to the full amount of the Loans not having been raised during the past year				1,972	6	0
Savings on Budget provision for reduction of Debt :—						
Miscellaneous Works Loan of Rs. 6,82,000. (The Budget provision not being required, as a portion of the Loan was raised only at the end of 1888-89.)						
Municipal Fund Rs. 4,732-1-9+Water Works Fund Rs. 1,167-14-3...				5,900	0	0
				71,170	1	5

Drainage, &c., Loan of 1878 (27 Lakhs)	6,425	0	0			
44 Lakhs Sanitary Works Loan	18,112	8	0			
7 „ „ „	1,000	0	0			
12 „ Drainage and Water Works Loan.....	8,012	8	0			
Municipal Fund Rs.	34,169	9	5			
Tansa Works Loan (72 Lakhs) Water Works Fund „	4,847	0	9			
				39,016	10	2
				Rs...1,10.186	11	7

Under Victoria and Albert Museum there remained Rs. 416-7-11 unexpended, principally on the collection of Artware and Contingent grants.

Rs. 2,500 were sanctioned during the past year for a camp for the relief of famine immigrants. Only Rs. 59-1-4 were expended therefrom. Out of the balance of Rs. 2,440-14-8, about Rs. 100 will have to be renewed to meet charges incurred in 1889-90 on account of the immigrants.

Government refunded during 1888-89 the unexpended balance of Rs. 5,256-13-10 of the Municipal contribution of Rs. 36,000 towards the Goculdas Hospital expenses for the previous year. Out of this balance payments, aggregating Rs. 54-14-0 were made for surgical instruments, &c. under the former Town Council's Resolution No. 1498 A, dated 10th October 1879, leaving a net saving of Rs. 5,201-15-10.

As neither the Cholera nor the Small-pox Hospital was opened during the past year, the entire Budget provision of Rs. 3,108 for establishment for the hospitals remained unexpended.

The whole of the Pension, &c., grant was expended during the past year, except Rs. 188-6-4, which sum will be required during 1889-90 to meet three unpaid claims already sanctioned.

There remained an available balance of Rs. 2,397-0-1 from the Commissioner's discretional grant, nearly the whole of which (*i. e.*, Rs. 2,160) will be required during the current year for sanctioned liabilities.

The following statement shows the actual savings and the amounts required for incomplete or uncommenced works :—

		Rs.	a.	p.
1.	Unexpended balance of grants for incomplete works ...	49,444	3	2
2.	Allotment of works not commenced	92,575	9	2
	Rs.	1,42,019	12	4
3.	Savings on completed works ..... „	22,482	3	9
	Rs.	1,64,502	0	1

Owing to the death of Sir Frank Souter on 6th June 1888 the special personal allowance of Rs. 250 per mensem, guaranteed by the Corporation to be paid as long as that gentleman held the office of Police Commissioner for the City of Bombay, ceased. Hence the saving of Rs. 2,211-14-4 under General Police.

The Fire Brigade Department saved Rs. 3,988-1-8, chiefly on Establishment, repairs to engines and stations, charges for buggy-hire, feed of horses, &c., and rent which, together with the unexpended balances of Rs. 3,330-8-9 on stores and Rs. 32,344-15-4 on new charges, amounted to Rs. 39,663-9-9, the total saving on Brigade grant. Rs. 3,418-8-9 will, however, have to be renewed for unpaid Establishment, contingent and stores charges, and Rs. 31,343-5-6 for the completion of Fire Stations at the junction of Parel and Chinchpokly Roads, at Musjid Bridge and at Kolsa Mohlla.

The Election expenses were Rs. 101-11-0 less than the sanctioned amount of Rs. 6,500.

Rs. 1,500 were allotted for addresses (with cases) to be presented to the Marquises of Lansdowne and Dufferin. The actual cost of the same was, however, less by Rs. 131.

The unexpended balance of Rs. 381-0-3 of the provision for the construction of the Nesbit Road Bridge has been renewed during the current year, and has been utilized on the final settlement of our account with the G. I. P. Railway Company.

The details of the Water Works grant are given below :—

				Rs.	a.	p.
Maintenance—						
Actual savings on Establishment, labour, contingencies and repairs to Vehar Dam				10,219	7	3
Actual savings on materials and repairs to plant				31,037	2	10
				41,256	10	1
To be renewed for unpaid contingencies and unexecuted repairs to public wells and fountains				3,570	6	5

	Rs..	6,42,877	13 0

The principal major heads of expenditure under which the aggregate saving of Rs. 6,42,877-13-0 accrued are given in the margin.

The following statement shows the contrast between the estimated and actual opening balance, Income and Expenditure, of the past year :—

		Estimate.			Actuals.			Better than Estimate.		
		Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Opening Balance		5,43,000	0	0	13,64,599	1	5	8,21,599	1	5
Revenue		46,46,750	0	0	49,66,192	6	10	3,19,442	6	10
		51,89,750	0	0						
Expenditure	Original Estimate	50,50,185	0	0						
	Subsequent as per Statement B	58,44,135	11	5	52,01,257	14	5	6,42,877	13	0
								17,83,919	5	3

Rs. 5,25,940-15-8 on account of lapsed grants for 1887-88 renewed during the past year were included in the opening balance. The remainder Rs. 2,95,658-1-9 has, together with Rs. 1,06,300 of the large surplus revenue of over 3 lakhs, been appropriated in the current year's budget.

The savings on expenditure include Rs. 4,05,083-10-1 on account of unpaid liabilities, &c., for the past year.

The following statement gives the details as to the extent and the manner in which the above large surplus, after allowing for adjustments, &c., has been appropriated, and shows what further sum remains available for future appropriations :—

	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Actual Cash Balance							61,088	1	6

Less—Already appropriated in the Budget for 1889-90									3,50,000	0 0
Net available Surplus.....								Rs.	6,76,056	2 3

From the above surplus, Rs. 4,05,083-10-1 will have to be renewed for the various unpaid charges and uncompleted or uncommenced works referred to above in detail. Thus the sum actually available for further requirements will be Rs. 2,70,972-8-2, of which, however, Rs. 30,000 have been utilized up to date for extra grants during the current year.

APPENDICES.

Nos. 1A and B.—These are the usual 6 per cent. Local Loan statements, showing that only Rs. 21,500 remained unpaid (all held in London, with the exception of Rs. 1,000 owned in Bombay) at the close of the year, and that the outstanding interest was Rs. 319-9-5.

Nos. 1C and D are the statements for the 5 per cent. Loan of 1878 of Rs. 26,94,000, the former showing that Rs. 2,80,500 of the Loan were paid off up to 31st March 1889, and the latter gives the unpaid interest at the close of the past year to be Rs. 6,425 against Rs. 5,550 at the end of the previous year.

Nos. 1E and F.—The former shows that the unpaid principal on 31st March 1889 of the 44 lakhs (5 per cent.) Sanitary Works Loan was Rs. 39,50,000. The latter statement gives the unclaimed interest at the close of the year at Rs. 18,112-8-0 against Rs. 11,687-8-0 on 31st March 1888.

No. 1G gives the amount of interest on the 5 per cent. 12 Lakhs Drainage and Water Works Loan remaining unpaid on 31st March 1889 at Rs. 8,012-8-0.

No. 1H shows that the outstanding interest on the 5 per cent. 7 Lakhs Sanitary Works Loan was Rs. 1,000 at the close of the past year.

No. 1 I.—From this statement it will be observed that the unpaid interest on the Tansa Loan instalments already raised amounted to Rs. 4,847-0-9 on 31st March 1889 against Rs. 7,200 at the beginning of the year.

No. 2 gives the usual details of the gross Town Duty collections and refunds of the past year.

The revenue, refunds and balances of the past year have been contrasted in the following table with those of 1888-89 :—

	1887-88.		1888-89.	
	Rs.		Rs.	
Opening Balance	54,749		48,636	
Revenue	21,06,799		15,60,917	
		21,61,548		16,09,553
Deduct—				
Refunds	11,16,162		8,78,331	
Closing Balance	48,636		5,325	
		11,64,798		8,83,656
Net Revenue		9,96,750		7,25,897
Less—Cost of Collections, &c.		72,265		58,197
Net Receipts after payment of Collection Charges	Rs.	9,24,485		6,67,700

Owing to the rates for the levy of Town Duties having been reduced from 5 to 2 annas per candy on grain, from 7 annas to 6 annas per cwt. on sugar, and from 10 annas to 6 annas per Bombay maund on ghee, the gross revenue for the past year was estimated at Rs. 14,29,200, and the refunds to be granted during the same period were anticipated at Rs. 6,40,200. Hence a net provision of Rs. 7,89,000 was entered in the budget for revenue from Town Duties.

The actual yield and refunds, however, were Rs. 1,31,717 and Rs. 2,38,131 more than the respective estimates. The closing balance, on the other hand, was less than the opening one by Rs. 43,311. The

net revenue was consequently Rs. 63,103 less than the Budget Estimate as stated at page 43 of this Report.

Articles.	Actuals for 1887-88.	Actuals for 1888-89.	Increase	Decrease.
	Rs.	Rs.	Rs.	Rs.
Grain	7,49,814	3,44,535	...	4,05,279
Wines & Spirits	2,17,185	2,18 678	1,493	...
Beer	11,309	12,892	1,083	...
Sugar	5,95,739	4,41,980	...	1,53,759
Ghee	2,18,827	1.31,294	...	87,533
Timber	1,31,042	1,16,184	...	14,858
Firewood	76,150	65,583	...	10,567
Petroleum	1,06,733	2,30,271	1,23.538	...
	21,06,799	15,60,917	1,26,114	6,71,996

Net Decrease... Rs. 5,45,882

The gross yield under the different heads during the past year is contrasted in the margin with similar produce in the previous year. It will be observed that there were slight increases under wines and spirits and beer.

The increase under petroleum was very marked in consequence of the quantity imported in last year being very heavy, *i.e.*, 73,68,675 gallons against 34,15,461 gallons in 1887-88. The exceptionally heavy falling off under grain was partly due to the reduction of duty from 5 annas to 2 annas per candy and partly to the import being 3½ lakhs candies less than in the previous year.

11,78,613 cwts. of sugar were imported last year against 13,61,689 cwts. in 1887-88. This decrease in imports, both by sea and rail, together with the reduction of the duty from 7 to 6 annas per cwt., accounts for the large falling off of revenue under this item. There was a decrease of about 40,000 maunds in the import of ghee by sea and the B. B. & C. I. Railway Company, but it was entirely counter-balanced by the increased imports through the G. I. P. Railway lines. Thus the short income on this article was solely due to the reduction in the rate of duty from 10 annas to 6 annas per maund. The decreases under timber and firewood were entirely due to smaller imports.

No. 3 gives as usual the entire cash transactions of the year, together with adjustments, from which it will be gathered that the ordinary revenue of the year (exclusive of Water Works) exceeded the ordinary expenditure by Rs. 2,81,317-4-8 as shown in the margin. This sum was more than sufficient to meet payments respectively amounting to Rs. 1,41,249-4-10 and Rs. 55,576-10-10 made towards the reduction of debt and the Municipal building fund investment as shown in Statement C.

Municipal Fund Income, exclusive of Water Works	Rs.	40,01,558	5 8
Expenditure	,,	37,20,241	1 0
	Rs.	**2,81,317**	**4 8**

The debt due by the Water Works to the Municipal Fund on 31st March 1889 was Rs. 14,64,653-2-8 against Rs. 14,89,199-2-10 at the close of 1887-88.

Loan Works.—The expenditure of Rs. 4,774-0-1 on Storage Reservoir, Contingencies, &c., raised the expenditure on Surface Drainage Works at the close of last year to Rs. 13,12,778-3-11 as detailed below :—

Surface Drainage Works.

		Sanctioned Grant.	Amount expended up to 31st March 1888.	Amount expended during the year 1888-89.	Total.

The portion of the Loan of Rs. 11,82,000 (sanctioned by Government for Rs. 10,08,875 only) for Drainage, Water Works, Markets and Roads, &c., raised during the past year having been invested, Rs. 775-4-5, Rs. 71, Rs. 21,387-4-0 and Rs. 2,41,185-2-4 were respectively advanced out of Cash Balance for Drainage Works, Cross Road at Mahaluxmi, Miscellaneous Works and Markets. The total expenditure on markets, including Rs. 45,385-13-0, advanced in 1887-88, was Rs. 2,86,570-15-4.

The cost of the Ripon Road, along with Rs. 4,094-11-3 expended in the past year, amounted to Rs. 1,41,211-7-9.

The sum of Rs. 6,677-0-3 expended in 1888-89 on Health Department Stables at Bori Bunder, raised the entire cost of Miscellaneous

Works sanctioned to be paid out of the Rs. 20,88,000 Sanitary Works Loan, to Rs. 60,309-9-3, as follows :—

	Sanctioned Grant.	Amount expended up to 31st March 1888.	Amount expended during 1888-89.	Total.

Total..Rs	1,05,807 14 7	53,632 9 0	6,677 0 3	60,309 9 3

Rs. 8,263-0-5 were advanced for the survey for pipe sewers in Oomercarry and other districts.

Owing to the advance to the Executive Engineer for payment of Tansa Establishment for January and February last remaining unadjusted, and to an advance of over Rs. 15,000 for purchase of bullocks for the Health Department, against current year's budget provision, the advances to Municipal officers amounted to Rs. 53,289-10-3 on 31st March 1889, against Rs. 26,870-5-2 at the close of 1887-88.

The value of balances of stock in hand of the different Municipal Departments at the end of last year amounted to Rs. 16,77,522-8-6 against Rs. 15,93,553-13-2 on 31st March 1888. The large increase was principally due to purchase of carts and bullocks for the Health and Market Departments, steam and bullock rollers, Engineer's Department, and Fire Engines, &c., for the Fire Brigade.

An inventory of the Water Works Stock account was taken for the first time after a number of years. Owing, however, to the absence of Mr. Tomlinson I was unable to get the necessary explanations for the adjustment of several items, and in consequence of various other reasons, which I will refer to at length in a separate letter on the subject, I was unable to adjust this stock account in time. I had to send two clerks for 6 consecutive days in the Water Works Stores, and even then I do not consider the result attained quite satisfactory. This report was completed and fair copied about a fortnight ago, but it could not be sent earlier as the Water Work stock account did not tally. As I did not wish to further delay the submission of the report, I have done the best I could with the incomplete materials before me, and with the very short time and the over-worked and limited staff at my disposal.

I may also mention here that complete inventories of the Municipal Stock in charge of the various Departments of the Municipality have not been taken since 1872, when Mr. Coen was specially appointed for the purpose. Although heads of Departments have been annually furnished by this office with lists of the balances of their stock, and although they have been stated to have been verified from year to year, I noticed considerable discrepancies in the items of stock of those Departments that prepared fresh inventories of their stock last year. I would, therefore, suggest that either all heads of Departments be directed to prepare fresh inventories of the actual stock in their hand, or a special officer be appointed for the purpose as was done in 1872.

The outstandings on private and departmental works were enhanced during the past year from Rs. 96,096-6-2 to Rs. 1,24,036-2-2. Some of the private works outstandings date as far back as 1876. The oldest departmental works outstanding is for 1881.

I have often addressed the Executive Engineer on the subject of clearing up these old outstandings. By careful management and regular preferment of bills there ought to be no outstandings, except on private works as was the case from 1865 to 1878.

In consequence of further advances made to the Tansa Duct and Dam contractors for work and materials, the sum owed by them at the close of last year aggregated Rs. 94,043-4-9 against Rs. 87,360-4-0 at the end of the previous year.

Rs. 90,088 were expended in last year out of the Building Fund investments, Rs. 90,000 for the site and the balance for printing and drawing materials.

No. 4, *Liabilities.*—Rs. 15,80,560-14-3 were due to Government on 31st March 1889 on account of the Surface Drainage Loan of 6 Lakhs and the balance of the 2nd 15 Lakhs Loan. The balance due on the 40 Lakhs Tulsi Loans was Rs. 33,67,588-13-11 as shown in Statement No. 7. Thus the debt due to Government at the close of last year on account of the Consolidated Loan of Rs. 58,40,000 was Rs. 49,48,149-12-2 against Rs. 50,77,745-4-1 on 31st March 1888.

All the 6 per cent. Local Loans were paid off during the past year, with the exception of Rs. 21,500, bonds for which amount were not surrendered, although they became repayable on 10th September 1887 and 14th April and 14th August 1888. Rs. 17,000 of this balance have been paid off up to date during the current year, leaving only Rs. 4,500 unpaid, of which bonds for Rs. 2,000 are reported to have been lost by two holders, who will be repaid the amount on their reporting the loss in the *Gazette of India* and the *Bombay Government Gazette* and furnishing the requisite indemnity bonds. Thus, with the exception of Rs. 2,500, the whole of the three 6 per cent. Loans,

amounting to Rs. 17,38,000, can now be practically taken as fully liquidated. The unpaid sum of Rs. 4,500 is lodged at interest with the Bank of Bombay to meet the claims whenever presented.

Rs. 7,500 of the 27 Lakhs Loan of 1878, which became payable on 1st January 1888 and which had not been claimed up to the close of 1887-88, together with Rs. 35,000 which fell due on 1st January 1889, were paid during 1888-89 (Rs. 31,168-14-1 having been debited to the Municipal Fund and the balance Rs. 11,331-1-11 charged to the Water Works Fund.)

The 2nd instalment of 6 Lakhs of the 12 Lakhs Drainage and Water Works Loan was raised at 105½ per cent. on 30th June 1888 (Rs. 5,57,500 Municipal Fund + Rs. 42,500 Water Works Fund.)

Government having first sanctioned Rs. 2,22,000 and subsequently Rs. 7,86,875, or in all Rs. 10,08,875, to be raised for Drainage, Water Works, Roads, Markets, &c., works, instead of Rs. 11,82,000 as applied for by the Corporation, Rs. 2,22,000 were raised on 1st November 1888, at 107 per cent., and Rs. 1,48,500 were invested at par as sanctioned by the Corporation for Sinking Fund in respect of the 44 and 7 Lakhs Sanitary Works Loans and the 12 Lakhs Drainage and Water Works Loan as per details given at page 74 of this report. The remaining sum, *viz.*, Rs. 6,38,000, to make up the total loan of Rs. 10,08,500, has been raised during the current year also at 107 per cent.

The net premia on the Loans (Rs. 29,667-0-0 Municipal Fund + Rs. 1,57,993-8-6 Water Works Fund) were credited to the respective Loans as per Corporation's Resolution No. 5294, dated 19th November 1888.

Owing to about Rs. 70,000 paid as deposit by the G. I. P. Railway Company on account of taxes due by them, pending settlement of certain disputed points and to other large deposits from contractors, the Cash deposits, &c., at the end of last year amounted to Rs. 2,50,766-4-0 as against Rs. 1,30,766-13-11 on 31st March 1888.

The sum due to Government on account of the Income Tax collections made by the Municipality for the month of February 1889 in March last was paid to Government during the beginning of the current year.

A balance of Rs. 36,446-1-4 remained available for future expenditure out of the 10 per cent. provision in former loans for Establishment.

The gross liabilities of the Municipal Fund (exclusive of Water Works) aggregated Rs. 85,60,677-12-3 against Rs. 90,49,930-7-10 in last year.

No. 5, *Assets.*—The advances, &c., recoverable amounted to Rs. 2,71,369-1-2 on 31st March 1889 against Rs. 2,10,326-15-4 at the close of 1887-88.

Notwithstanding the addition of Rs. 1,48,804-12-6 on account of the Sinking Fund investments of the following loans, *viz.*:—

44	Lakhs	Sanitary Works Loan	Rs.	1,32,804	12 6
7	Do.	do.	„	6,000	0 0
12	Do.	Drainage and Water Works Loan	„	10,000	0 0
			Rs.	1,48,804	12 6

(Rs. 1,48,500 in 5 % Municipal bonds and the balance deposited at interest with the Bank of Bombay), the amount of investments was reduced in 1888-89 from Rs. 57,42,193-9-10 to Rs. 48,05,055-2-8 almost on account of the sale of the 6 per cent. Local Loans Sinking Fund Investments to pay off the loans which became repayable during the past year.

The value of stock at the close of the year was Rs. 16,77,522-8-6.

The lists of property framed in 1883 and revised in September 1887 not having been yet forwarded to me, duly verified, by all the heads of Departments, I have been unable, as in former years, to book property of the value of over 50 lakhs (Rs. 45,37,835-11-11 for property acquired up to 1883-84 and over Rs. 4¾ lakhs for that since acquired).

The cost of Overbridges, Roads, Drainage and other works executed by raising loans, &c., aggregated Rs. 56,55,115-3-4.

ASSETS.				
Advances, Investments and Cash Balance		Rs. 51,37,512	a. 5	p. 4
Stock		16,77,522	8	6
Buildings, &c.		63,32,241	4	0
	Rs.	1,31,47,276	1	10
Overbridges, Roads, Drainage and other works executed out of Loan and Reserve Funds		56,55,115	3	4
	Rs.	1,88,02,391	5	2
Water Works..Rs. 1,73,51,700 13 10				
Invested unexpended Loan and Interest Funds, &c. .. „ 26,09,349 2 7				
	„	1,99,61,050	0	5
Total Assets..Rs.		3,87,63,441	5	7
LIABILITIES.				
Municipal Fund ..... Rs.		85,60,677	12	3
Water Works Fund ..... „		1,65,75,055	0	5
Total Liabilities..Rs.		2,51,35,732	12	8

From the marginal table it will be perceived that (exclusive of nearly Rs. 7¼ lakhs paid for acquiring property, &c., from current revenue since 1883-84) the entire assets of the Municipality exceeded the gross liabilities by a crore and 36 lakhs of rupees, *i.e.*, by over 50 per cent.

Nos. 6 and 7.—I have continued to give these statements separately as desired by you and as required by Government under the provisions of the former Municipal Acts.

Although the new Municipal Act does not require us to keep the Water Works account, apart and distinct from other Municipal accounts, it is desirable to show the Water Works account by itself. I would, however, suggest that, while continuing to give a separate Water Works account, the entire income, expenditure, and the assets and liabilities of both the Water Works and Municipal Funds should be shown together in the Municipal books.

The Water Works expenditure, including debt repayments, exceeded the revenue (which included Rs. 78,699-6-3 for supply of water to the different Municipal Departments) by Rs. 3,19,556-12-7, which had to be made up from Municipal Fund general revenues.

Including the 3rd instalment of 25 lakhs raised during the past year for Tansa Works, the total sum borrowed for the lake, &c., amounted to 72 lakhs. The total liability of the Water Works Fund, including Rs. 1,57,993-8-6, the net premia on the Water Works portions of the loans raised in 1888-89 aggregated Rs. 1,65,75,055-0-5. The value of the Water Works (exclusive of mains, &c., laid out of current revenue at a cost of nearly rupees two-and-a-half lakhs) amounted to Rs. 1,73,51,700-13-10, and the Invested Loan, &c., Funds amounted to Rs. 26,09,349-2-7. Thus the gross assets aggregated Rs. 1,99,61,050-0-5, *i.e.*, about 35 lakhs or 21 per cent. more than the Water Works Debt.

STORES.

The balance of stock in charge of the Stores Clerk at the close of the past year was—

	Rs.	93,632	11	10	against	
	„	1,47,060	4	4	at the end of	1887-88,
	„	2,11,446	9	0	do.	1886-87,
	„	2,17,364	4	4	do.	1885-86,
	„	2,34,288	10	0	do.	1884-85,
and	„	2,72,834	12	0	do.	1883-84.

The following is a contrasted statement of the principal items of the above balances :—

Contrasted Statement of the principal items of balances of articles in stock at the Municipal Stores at the end of each of the past six years.

| | | |

A sum of Rs. 103-4-11 was received on account of sale of stores to private parties during the past year, and Rs. 9,382-4-5 were realized by the sale by public auction of unserviceable and surplus stores not required for Municipal purposes.

The total reduction in stock since the close of 1883-84, during which year the new rules framed by you in connection with the workshops and the stores came into operation, has amounted to Rs. 1,79,202-0-2.

This desirable result has been partly achieved by a strict adherence to your orders not to purchase stores in excess of our requirements for three or four months, by declining to receive into stores castings and other articles made at the Workshops without indents from any of the Municipal Departments, and partly by the transfer of 641 Siemen's and 135 Kennedy's meters to the Water Works stock and sale of unserviceable or surplus stores.

The Municipal Corporation by its Resolution No. 1708 of 1st December 1887, having sanctioned the disposal of stores not required for Municipal purposes, several attempts were made by the Engineer's Department to induce offers for their purchase by inviting public tenders, sending lists of them to the different Municipalities in this and other Presidencies, and by offering the earthenware pipes, bends, flap-traps, &c., for resale to the manufacturers, at a discount or for exchange with other description of articles. As these efforts did not meet with any favourable result, they were put up for sale by public auction on three several occasions. The major portion of the miscellaneous stores were sold, but excepting a few lots there were no buyers for any of the earthenware pipes, bends, flap-traps, &c., they being of obsolete patterns not now generally used in Drainage Works.

It appears to me that the Engineer's Department might be able to utilize at considerably reduced rates, if desirable, some of the 9" half socket pipes and 9" bends, marked A in the above list, for surface drainage in places where closed roadside drains are to be constructed, or as conduits or water-channels for carrying off stagnant water from pools into drains, &c. Cast-iron sluices and bib and stop cocks (marked B and D) should be transferred to Water Works stock and Europe paving stones (marked C) might be utilized for paving markets or godowns.

When the pipes, &c., above referred to (items A to D) are transferred or otherwise disposed of as proposed by me, the stock on hand at the Municipal stores will be further reduced by Rs. 64,000. Thus the stock in hand, in that case, would be about the minimum, absolutely necessary for the efficient working of the Municipal Workshops.

Besides the issues from the stock balances of previous years, the local purchases made through the Stores Clerk from the different Municipal Contractors exceed a lakh of rupees per annum.

The present Stores Clerk has, by his experience, strictness and honesty of purpose, been able to achieve the above favourable results. As a reward for this and his past long and meritorious service it would be well if his position were improved (especially when his transfer from the Stores, where he has proved himself so useful, to other departments on promotion has been considered undesirable in the interest of the service) by placing under him the Drainage Works Stores Depôt at Bellasis Road, which is at present almost entirely in charge of a clerk on Rs. 50 per month, including a personal allowance of Rs. 10 per mensem.

I would also once more advocate the desirability of providing suitable quarters for the Chief Stores Clerk at the Municipal Stores, as in that case alone we can personally hold him responsible for the safe custody of the stores in his charge.

WORKSHOPS.

The transactions of the Municipal Workshops during 1888-89 have been contrasted in the following Cash Account with those of the previous year:—

	1887-88.			1888-89.

Total...Rs.		1,47,889 5 0			1,40,924 2 3	

The increase in the outlay was entirely due to the work in connection with the extension of Erskine Road Market being partly entrusted to the Superintendent.

The net result shows a profit of Rs. 4,277-7-3.

This reduction in the profit was due to the introduction, as stated in my last report, of the system of charging for departmental works only actual cost, plus a fixed uniform percentage for supervision, repairs, &c., from September last. Even the above profit would have disappeared but for the old practice of charging fixed lump sums considerably in excess of actual cost for repairs and construction of carts and other works having remained in force up to August 1888, *i.e.*, the first six months of the year. The profit derived during this period by a surcharge to Municipal Departments was Rs. 6,095-2-10, of which Rs. 3,740-13-4 was obtained from cart repairs alone.

The following table gives the percentage of profit derived from the various works executed in the shops during 1888-89 :—

Nature of works.	Actuals.	Amount charged.	Profit.	Percentage.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	
Private works	173 10 10	307 7 6	133 12 8	77·01
Departmental works	71,845 15 10	78,494 4 7	6,648 4 9	9·2
			6,782 1 5	
Scavengering and drain carts*	7,487 3 0	9,417 0 0	1,929 13 0	25·77
Night-soil carts*	3,264 3 6	4,830 0 0	1,565 12 6	47·96
Watering carts*	4,842 11 10	5,088 0 0	245 4 2	5·07
Scavengering, drain and night-soil carts*	10,751 6 6	14,247 0 0	3,495 9 6	32·51

The profit of Rs. 133-12-8 on private works was realized principally by the hire of the Workshop pumping engine.

The Departmental works also gave a profit of Rs. 6,648-4-9.

The gross profit on Departmental works was, however, Rs. 9,655-4-11, Rs. 7,375-13-5 having been derived during the first 6 months of the year under the old system of charging fixed lump sums for

* The figures for carts repairs are for the first six months only, as actuals were charged during the 2nd half-year.

repairs to drain, scavengering, night-soil and water carts, construction of meat vans, repairs to pick-axes and sundry other jobs, and Rs. 2,279-7-6 gained by charging 25 per cent. on actual cost during the second 6 months. But the losses of Rs. 1,280-10-7 on certain jobs in the first half year and of Rs. 1,592-8-11 during the second half reduced the profit to Rs. 6,782-1-5 (Rs. 6,095-2-10 up to August 1888 and Rs. 686-14-7 from September 1888 to February 1889). If the sale proceeds of iron, &c., which realized Rs. 2,468-5-10 were added to the above profit, the Workshop gain would amount to Rs. 9,250-7-3. Deducting therefrom Rs. 4,740-5-4 spent (Rs. 3,370-0-10 in the first half-year + Rs. 1,370-4-6 in the second) on repairs to machinery, making tools, &c., and Rs. 232-10-8 retrenched from two bills, one for working a steam pumping engine while fixing the 48 inch sluice at Babula Tank Road, and the other for constructing a saddle back furnace for burning cutchra on the Flats, we arrive at Rs. 4,277-7-3, the real net profit as shown above in the Workshop Cash Account.

In lieu of an annual loss of about Rs. 5,000 from 1881 to 1886-87 on the working of the Iron Foundry we gained about Rs. 5,000 during the past year by obtaining the iron castings by contract instead of from the Workshops, the gross gain being thus Rs. 10,000.

It will be seen from the above that the abolition of the Iron Foundry and the discontinuance of the former system of making profit by overcharging exorbitant lump sums for repairs, &c., works have shown satisfactory results. The outstandings on completed works was reduced from Rs. 18,541-6-3 to Rs. 6,664-1-4, which still include Rs. 1,660-15-2 for work done between 1881 and 1887-88. It is now time enough that these outstandings should be adjusted. I have written to the Executive Engineer about the adjustment of these outstandings twice, but have not yet been able to get a reply to my inquiries.

The major portion of the balance is for work done during the last three months of the year, and although six months of the current year have elapsed, they still remain unadjusted. The incomplete works amounted to Rs. 39,381-7-5, principally on account of the extensive works of the Erskine Road Market, against Rs. 3,936-1-1 in 1887-88. This fact accounts for the increase in the total Workshops outstandings from Rs. 22,477-7-4 at the close of 1887-88 to Rs. 46,045-8-9 at the end of last year.

The shop and supervision charges, exclusive of repairs, were 25·4 per cent. during the first six months against 24·6 per cent. in 1887-88. Including repairs they were 33·8 per cent. on the actuals. Similar charges during the second six months, exclusive of repairs, were 27·6 per cent. and 30·07 per cent. inclusive of repairs.

GENERAL REMARKS.

The Paymaster disbursed during the past year Rs. 13,65,672 against Rs. 13,09,592 in the previous year and Rs. 8,40,451 in 1873. The annual payments made by him from 1873 and the net unpaid wages credited to savings each year from 1872 are given below :—

Year.	Payments. Rs.	Savings. Rs.
1872	In this year there was no Paymaster.	2,177
1873	8,40,451	3,098
1874	8,50,000	4,246
1875	8,56,265	3,751
1876	8,62,202	3,395
1877	9,43,565	4,077

1887-88	28,835	11,16,161 12 0
1888-89	26,293	8,78,330 8 0

The table in the margin gives the number of refund certificates passed and the amount refunded annually from 1873 up to the end of last year. Notwithstanding the reduction of duty on grain, sugar and ghee, the number of claims were almost the same as in 1887-88. The largest number paid on one single day was 243.

The following statement gives the number of Receipts and Disbursement vouchers examined and paid by this office annually from 1876 :—

Year.	No. of Receipt Vouchers.		No. of Disbursement Vouchers.		Total including Journal Vouchers.
1876.....	4,862	+	12,073	=	16,935
1877.....	5,013	+	14,410	=	19,423
1878.....	5,511	+	18,783	=	24,294
Average per annum for the 5 years ending					
1883-84	5,983	+	26,393	=	32,376
1884-85	6,942	+	32,872	=	39,814
1885-86	6,855	+	31,008	=	37,863
1886-87	7,040	+	36,966	=	44,006
1887-88	7.197	+	42,283	=	49,480
1888-89	6,527	+	42,989	=	49,516

12,668 Inward letters (exclusive of 22,941 remittance reports and 49,516 vouchers) were received during the past year against 10,405 received in the previous year and 2,250 in 1875.

The outward letters, not including 485 intimations to contractors and others, numbered 3,898 against 3,367 in 1887-88 and 1,301 in 1875.

Further instalments of the Tansa and the 12 Lakhs Drainage and Water Works Loans and portions of the Rs. 10,08,875 Loan for Drainage, Water Works, Markets and Roads were raised during the past year, and for which bonds were issued as detailed below :—

THIRD INSTALMENT OF THE TANSA LOAN.

800	bonds of	Rs.	500	each	Rs. 4,00,000
1,300	„	„	1,000	„	„ 13,00,000

741			3,70,500

The figures given in the preceding paras. conclusively prove the steady annual increase in the work and responsibility of this office.

My having pointed out in my last and previous reports that the strength of this office should be increased to prevent inefficiency and arrears, as the Establishment was unable to cope with the great annual increase in work, notwithstanding their working for prolonged office hours, sacrificing holidays and duly earned leave, Mr. Charles saw the necessity of providing in the current year's budget an increased strength (though not to the full extent I recommended). But even that increase was struck off the Budget by the Standing Committee to enable them to consider the whole question of increase in the strength and emoluments of the various establishments of the Municipality, when you submitted the schedule of establishments for their sanction under the provisions of section 79 (1) and (2) of the Municipal Act.

You have, however, been unable, owing to immense pressure of work and other important engagements, to lay the Schedule before the Committee. The result is that my work has fallen considerably in arrears and delays occur in payments to establishments and contractors, notwithstanding my having employed four candidates.

Moreover, owing to paucity of hands, a great portion of most important work has to be gone through in haste, and some of it has frequently to be deferred. I am often compelled to deal leniently in cases of errors committed by overworked clerks. Such a state of affairs is not satisfactory to me. I, therefore, once more appeal to you to strengthen the establishment in time to enable me to preserve the prestige of this Department untarnished. I can say no more, but will confidently leave the matter into your hands.

The delay in the submission of this report could not be avoided with all the hard work of my office, owing to several adjustment vouchers and sanctions having been received in July last, and to some of the stock returns having been forwarded to my office during the past month, the last of which was received by me on the 21st ultimo, and to the Water Works stock account not tallying till day before yesterday for the reasons already explained at page 71.

In conclusion, I must bring to your notice the commendable zeal and assiduity of my 1st Assistant, Mr. Maneckshaw Cawashaw, and the untiring efforts of my other Assistants, Messrs. Dadaji Bhanaji and Ballaji Nillaji, and of the Establishment generally, with a few exceptions, in performing their ever increasing and very responsible work described at length in the preceding paras.

APPENDICES

TO THE

CHIEF ACCOUNTANT'S REPORT FOR 1888-89.

E. C. K. OLLIVANT,
Municipal Commissioner.

REVENUE.

1. REPORT of the ASSESSMENT and COLLECTION DEPARTMENT by Mr. R. P. BRUNTON, Assessor and Collector, as forwarded with his letter No. 10688, dated 9th September 1889.

2. REPORT of the TOWN DUTY REFUND DEPARTMENT by Mr. D. BENNETT, Town Duty Refund Officer, as forwarded with his letter No. 76, dated 19th June 1889.

THE attached tables form the report of the working of the Assessment and Collection Department for the year ended 31st March 1889.

I trust that the figures contained in these tables will be satisfactory to the Commissioner, the Standing Committee, and the Corporation.

They are the result of twelve months of unremitting hard work on the part of every one in the Department.

Indeed, so onerous has this work, both indoor and outdoor, now become, that an increase to the working strength is absolutely necessary, if we are to maintain the efficiency of the past.

I would point out that the figures in the tables do not show the whole of the Departmental work. For instance, during the year, 4,361 cases in the Tabulated Ward Reports were dealt with; 3,538 amendments were made through Form 11B; 3,016 notices were issued in complaints; 3,733 special notices [section 162 (2) and 167 (1)] were issued; 9,911 notices of demand [section 202 (1)] were sent out; 2,056 warrants (section 203) were prepared and 10,176 Wheel Tax Schedules were prepared in the Head Office and served by the outdoor establishment.

In the Correspondence Branch, 30,110 inward and 26,974 outward letters were dealt with, besides the transfer of 1,300 properties, the papers connected with which take up much of the Head Clerk's time.

And over and above all this, the preparation of the Voters' Lists, under section 19 of the Act, which takes from the beginning of August to the end of November, is a very considerable addition to the work of an already overburdened office.

Clearly to understand and appreciate the work done in the Assessment and Collection Department, a minute knowledge of the requirements of the manual is necessary.

Table I.

TOWN DUTIES.

THE rates of duties on Grain, Sugar and Ghee were respectively reduced from 5 to 2 annas, 7 to 6 annas and 10 to 6 annas from 1st April 1888. Owing to these modifications of rates, I submit a statement (Appendix B) of quantities imported and exported and the balance left for local consumption, in addition to the usual statement (Appendix A) showing the amounts of collections, refunds, and net revenue for comparison of the figures for the year under report with those of the preceding year.

Grain.—The net revenue derived from this article amounted to Rs. 62,228, or was Rs. 1,53,304-8-5 *less* than that in the preceding year. The decrease is chiefly due to the reduction of rate mentioned above. The quantities imported and exported during the year were respectively better by 356,877 candies and 271,699 candies than those of the preceding year.

Sugar.—Duty on Sugar realized a net revenue of Rs. 42,098-3-2 against Rs. 2,02,585-2-0 in the preceding year. The decrease of Rs. 1,60,486-14-10 is attributable to (1) the reduction of rate mentioned above, (2) a decrease (of 183,076 cwts.) in the quantities imported, and (3) an increase (of 99,761 cwts.) in the quantities exported.

Wines and Spirits yielded a net revenue of Rs. 1,98,762-0-3 or Rs. 3,583-5-1 *more* than the previous year. There was an increase of 5,909 gallons in the quantities imported and a decrease of 8,363 gallons in the quantities exported.

Beer.—A decrease of Rs. 978-14-7 in the net revenue (Rs. 8,500-10-5) from this article is observable. There was an increase of 34,677 gallons in the quantities imported against an increase of 66,002 gallons in the quantities exported.

Ghee.—The net revenue from duty on this article was Rs. 1,18,805-13-9, or Rs. 82,921-3-9 *less* than that in the preceding year. The decrease is mainly due to the reduction of rate mentioned above.

Timber.—A decrease in the quantities imported during the year resulted in the reduction of net revenue from this article to the extent of Rs. 11,099-1-3. The net yield from this article was Rs. 1,00,915-2-8 against Rs. 1,12,014-3-11 in the preceding year.

Firewood yielded Rs. 65,582-11-9, or Rs. 10,567-2-6 *less* than the revenue (Rs. 76,149-14-3) in the previous year, there having been a decrease of 84,537 candies in the quantities imported.

Petroleum.—The quantities of Petroleum imported during the preceding year having been exceedingly limited, there was a rise in the imports from 3,415,461 gallons in 1887-88 to 7,368,675 gallons in 1888-89, which brought in an increased revenue of Rs. 1,23,537-15-0. The exports also having risen from 3,426,102 gallons to 4,601,828 gallons, the net revenue derived from duty on this article was Rs. 86,463-15-6. There having been an excess of refunds (Rs. 332-8-6) over collection of duty on this article during the preceding year, the increase in net revenue amounts to Rs. 86,796-8-0.

The *Refunds* allowed on the different articles during the year amounted to Rs. 8,77,560-2-0 against Rs. 10,94,464-10-0, or were *less* than those allowed in the preceding year by Rs. 2,16,904-8-0.

I submit below a table showing the increases and decreases in the amounts of refunds compared to the figures for the previous year :—

	Increases.			Decreases.		
	Rs.	a.	p.	Rs.	a.	p.
Grain	.....			2,51,974	3	0
Sugar	6,727	11	0	.....		
Wines and Spirits	.....			2,090	11	0
Beer	2,062	9	0	.....		
Ghee	.....			4,612	4	0
Timber	.....			3,759	1	0
Petroleum	36,741	7	0	.....		
Total...	Rs. 45,531	11	0	2,62,436	3	0
Deduct—Increases...				Rs. 45,531	11	0
Net Decrease...				Rs. 2,16,904	8	0

The gross collections of Town Duties on all the articles amounted to Rs. 15,60,916-11-6, and the net revenue to Rs. 6,83,356-9-6 during the year.

The Refund Claims passed numbered 28,293 against 28,835 in the previous year.

The amount of refunds claimed during the year was Rs. 9,37,912-15-0, out of which Rs. 60,352-13-0 were retrenched (Rs. 56,619-14-0 on account of wrong and excessive claims and Rs. 3,732-15-0 on account of claims legally inadmissible).

Statement contrasting the Imports, Exports and Balance of the several Articles subjected to Town Duty during the year 1887-88, with those for 1888-89.

1.—FIRST PORTION OF THE NEW SEWERAGE SCHEME.

(a.)—*Pumping Station, Love Grove, Warli.*

The engines and pumps, under the charge of Mr. W. H. Bell, did not work as satisfactorily as could be desired and were found to have been considerably neglected.

In the early part of 1888, regulations were laid down for flushing at particular hours arranged according to the tides and the time of day when the flow of sewage is at a minimum.

The regulations were, however, rendered practically abortive through the failure of the engines to pump the sewage low at the flushing times; another result of the high level of the sewage was that the necessary repairs to the machinery could not be carried out promptly and that several connections with the main sewer which were urgently required, had to be postponed.

The workmen, repairing engine No. 2, frequently suffered intensely from sore-eyes, owing, it was ultimately found, to the sewage, which sprayed about in all directions under the engine-room floor at every stroke of the engines, and it had long been difficult to induce any men to keep at their work.

Four large ventilating openings were cut in the walls of the engine-house below ground and three ventilating shafts put up at a total cost of Rs. 1,043-8-0. These will be of permanent benefit to the station.

The Engineer of the station induced the supposition that the failure of the engines was due to some inherent defects in the machinery, and while the subject was under discussion, Mr. Watson, a representative of Messrs. Yates & Co., the makers of the engines and pumps, arrived in Bombay.

With the Engineer's concurrence, the matter was referred to Mr. Watson, and he visited the station on several occasions, both before going to Calcutta and after his return, but without giving any definite information on the subject.

At length just about the commencement of the rains Mr. Watson said he was returning to England shortly, and on his arrival home would report the matter to his firm and request them to write. No communication from the firm has, however, been received.

Mr. J. Bigmore, Superintending Engineer to the Peninsular and Oriental Steam Navigation Company, was then invited to inspect the engines and pumps, and the result of his investigation was embodied in a report, dated 3rd January 1889.

It was evident from this report that the inability of the pumps to reduce the sewage to anything like a reasonable depth was due, not to any inherent defects upon which it was necessary to consult the makers, but to a leaky condition which could have long before been remedied.

Mr. Bigmore came to the conclusion that the defective condition of the machinery was due, in great degree, to neglect on the part of the Engineer in charge.

Estimates for executing the necessary repairs and for overhauling the machinery at the station, were called for from Messrs. Richardson and Cruddas, Messrs. Alcock, Ashdown & Co., and Mr. D. Longworth: but as their quotations were abnormally high, it was considered advisable to have the repairs executed at the Workshops, a course strongly recommended by Mr. Bigmore.

After a careful and impartial inquiry, it was deemed that great negligence was attributable to the Engineer in charge, and that he was unfit for his situation at the Pumping Station. It was therefore decided to relieve him of his duties, and he was directed to revert to an inspectorship on the new Sewerage Works, on his former salary of Rs. 200 per mensem, but he preferred to resign.

The Superintendent, Municipal Workshops, has been placed in charge of the station and has thoroughly overhauled the machinery. He is confident of being able in a short time to put it into a much better condition than it has been in for a considerable period.

Another Engineer will be appointed to take Mr. Bell's place, but instead of having an independent charge, he will be under the immediate orders of the Superintendent of Workshops.

The Budget grant for establishment contingencies, &c., at the station and the expenditure incurred during the year were as follows :—

	Rs.	a.	p.
Budget allowance	74,180	14	10
Actual expenditure	73,453	10	9
Saving ..Rs.	727	4	1

(*b.*)—*Ventilating Shafts.*

Contractors —MESSRS. FAKIRJI PESTONJI & CO.

In accordance with Town Council Resolution No. 2541 of 14th March 1888, the articles of agreement and the specification for a contract for this work were printed and tenders were advertised for on the 15th May 1888.

2. Three tenders were received on the 25th May. Of these the lowest, that of Messrs. Fakirji Pestonji and Ibrahim Haji Mahomed, the annual repairs contractors for the year, was accepted under the Town Council Resolution No. 2189 of 20th June 1888.

3. The difference between the amount sanctioned and that of the lowest tender, including 15 per cent. contingencies in both cases, was Rs. 4,666-10-9, as shown below :—

	For works.	For 15 per cent. contingencies.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
Amount sanctioned...	43,402 0 0	6,510 4 10	49,912 4 10
Do. of the lowest tender ...	39,344 0 6	5,901 9 7	45,245 10 1
Difference ...	4,057 15 6	608 11 3	4,666 10 9

4. The contract for the work was executed through the Municipal Solicitors on the 18th July 1888.

5. Numerous old masonry drains have had to be crossed by the underground portions of the shafts, and the reconstruction or diversion of the drains has impeded the progress of the work.

6. House-owners, too, have considerably retarded the work by frivolous objections raised against the shafts being affixed to their buildings, and there has been much difficulty in overcoming the opposition. Previous intimation has been given to all owners of buildings, though not required under the Municipal Act.

7. The contract provides for the erection of 209 shafts, and of these 156 have been put up.

8. Though the contract time expired on the 1st February 1889, the contractors, for reasons given in paras. 5 and 6, were not held to be responsible for the delay, and an extension of three months has been allowed.

9. The quantities and cost of the work done to the end of the year are given below :—

Quantities.	Particulars.	Rate.	Per	Amount.
		Rs. a. p.		Rs. a. p.
46,050 c. ft.	General excavation, including filling in, &c., ...	1 7 0	100 c. ft.	661 15 6

(c.)—*House Connections.*

The Town Council sanctioned, under their Resolution No. 2195 of 20th June 1888, an additional outlay for the extra quantities in the Khetwadi District, consequent upon new buildings, new nahanis and new privies referred to in the last Administration Report. The small portion of the work which remained to be done at the end of the last official year was then taken in hand and completed.

The following summaries show the results of the carrying out of the work :—

	Rs. a. p.
Value of actual work as measured, calculated at estimated fair rates	5,087 8 6
Net outlay	4,430 9 4
Saving...Rs.	656 15 2

	Rs. a. p.
Amount sanctioned for the work	5,095 0 0
Net outlay	4,430 9 4
Saving...Rs.	664 6 8

The follwing statement gives the cost of work as estimated and the actual expenditure :—

The Khetwadi District having been completed, plans with estimates amounting to Rs. 1,09,786, including 15 per cent. for contingencies for carrying out the house sullage water connections in the Bhuleshwar District, were submitted in November.

It is now long since that the main sewer and trunk pipe sewers were laid in the first Drainage Section, and yet at present it is only in a small portion of the district that they have been utilized for the reception of house-sullage. Numerous complaints have been received of unsanitary localities in the district, and it would seem desirable to expedite the completion of the house connections.

Efforts to induce contractors to carry out the work at or within the estimated rates have, as previously stated, been unsuccessful, and unless certain desultory proposals recently made by contractors assume speedily a tangible form, it would appear advisable to divide the district into several sub-divisions and to advertise for tenders for each to be dealt with simultaneously. A fair opportunity would thus be afforded to plumbers and petty contractors to compete for the work.

(2.)—QUEEN'S ROAD AND GIRGAM DRAINAGE SECTION.

(*a.*)—*Ventilating Shafts.*

The intended experiments and observations on the relative effects of different systems of ventilation upon the air of the sewers had to be postponed owing to the impracticability of completing the arrangements necessary for the purpose. The results of the experiments will therefore form a subject for the next year's report.

Plans and estimates of the cost of converting manholes and adding ventilating side chambers were prepared and submitted.

An application to Government for sites on which to erect masonry ventilating shafts in connection with the 15-inch pipe sewer along the Marine Lines and Mayo Road, accompanied with plans and details of the proposal, was refused under Government Resolution No. 1811 of 29th May 1888.

The matter being again represented for reconsideration, Government directed under Resolution No. 2719 of 4th August 1888, that surface ventilation should be provided for the Municipal pipe sewer as proposed by the former Sanitary Commissioner (Dr. Hewlett). The manholes on the pipe sewer have therefore been all provided with side ventilating chambers. The details of the cost incurred in completing this work will be given in the Administration Report of 1889-90.

Two anemometers have been obtained for experimental purposes through Messrs. Treacher & Co., at a cost of Rs. 168.

The work of constructing 4 masonry ventilating shafts and erecting 8 metal shafts has been entrusted to the petty works contractors, Messrs. Fakirji Pestonji & Co.

(*b.*)—*Pipe Sewers and House Connections.*

Contractors—MESSRS. BULKLEY & Co.

The contracts for these works were executed on the 17th of May 1888, but owing to the near approach of the South-west monsoon and the intended early departure of Mr. Bulkley from Bombay, the works were not commenced until 1st November, when the rains had ceased and Mr. Bulkley had returned.

The work of laying the pipe sewers was first taken in hand and the greater part was completed in March.

The work of house connections, comprising the laying of pipe drains in house-gullies and compounds, and putting up the cast-iron fittings, was commenced on the 21st March.

The following statement gives the quantities and value of work done to the end of the financial year :—

Quantities.	Particulars.	Rate. Rs.	Cents.	Per	Amount. Rs.	Cents.
35,082·89 c. ft.	General excavation, including filling in, &c.	4	00	100 c. ft.	37,403	31

(3.)—SEWERAGE OF KAMATIPURA.

House Sullage Water Connections.

The execution of the following works, which were considered essential for the improvement of the sanitary condition of the Kamatipura District, was sanctioned at a cost of Rs. 7,940-8-0, out of a sum of Rs. 8,323-1-3 available from the grant allowed for the Kamatipura house sullage water connection works.

(*a*). A masonry flushing chamber at the head of the pipe sewer which passes through 15th street and which was unavoidably laid with a flat gradient.

(*b*). Flushing tanks at the heads of the pipe lines in long house gullies.

(*c*). Minor repairs to fittings, and in some few cases replacement of parts of fittings stolen.

The work was commenced on the 15th December 1888, and is in progress.

(4.)—OVOID SEWER FROM THE CRAWFORD MARKETS, ALONG HORNBY ROAD, TO THE VICTORIA (BORI BUNDER) TERMINUS, AND THENCE BY MINT ROAD TO THE TOWN HALL.

Contractors—MESSRS. FAKIR MAHOMED BABANBHAI & Co.

The final accounts of the ovoid sewer have been adjusted.

By Resolution of the Corporation, No. 438 of 16th May 1883, the sum of Rs. 93,410 was sanctioned for the work, including the erection of ventilating shafts at a cost of Rs. 3,200. Out of this sanctioned grant a sum of Rs. 8,123 (10 per cent. on the estimated cost of the actual work alone) was retained to meet expenditure on account of the supervising establishment. The balance available for the actual work was therefore Rs. 85,287. The cost of the work executed is Rs. 90,568-4-7 as under :—

	Rs.	a.	p.
(*a*). Work done by the contractors as per statement attached	83,633	13	1
(*b*). Work done by the Road Department.....	6,644	7	7
(*c*). Contingent charges	289	15	11
Total Rs. ...	90,568	4	7

On the sanctioned amount there is an excess of Rs. 5,862-12-10 arrived at as follows :—

				Rs.	a.	p.
Cost of work done				90,568	4	7
Add—						
Amount required for ventilating shafts				3,200	0	0
				93,768	4	7
Deduct credits for :—						
	Rs.	a.	p.	Rs.	a.	p.
(*a*). Rubble sold to contractors and others	1,316	10	8			
(*b*). Apportionment of 4 annas per square yard of road : Surface repaired debitable to Road Department	1,301	13	1			
				2,618	7	9
				91,149	12	10
Deduct—						
Amount sanctioned for the work				85,287	0	0
			Excess Rs....	5,862	12	10

The greater portion of this excess is attributable to the unanticipated excessive quantity of rock excavation met with during the progress of the work and to the road repair charges having been somewhat heavier than usual.

After the final bill had been passed, the contractors put forth certain claims owing to the heavy loss which they stated they had sustained under circumstances which could not be foreseen and over which they had no control. The contract terms on the subject were, however, quite clear and the claims were consequently rejected.

Out of the 16 ventilating shafts provided for in the contract 7 have been erected. The final accounts of the total work will form a subject for the next annual report.

(5.)—AGRIPADA DISTRICT.

(*a*.)—*Pipe Sewers and House Branches.*

Contractors—Messrs. Fakir Mahomed Babanbhai & Co.

Though the work was completed long since, the accounts remain unadjusted, as the arbitrator has not yet given his award.

(*b*)—*House Connections.*

The house connection survey which was in progress during last year, having been completed, plans and detailed estimates amounting to Rs. 2,48,642 were submitted on the 3rd September 1888.

The details of the estimates are given below :—

	Rs.	a.	p.
Cost of house sullage water connections to 212 houses in their own compounds (average cost per house, Rs. 418)	88,665	0	0
Do. do. to No. 448 street houses (average cost per house, Rs. 229)	1,02,415	0	0
Flushing tanks or house drains	26,227	0	0
Inspection chambers on house drains	6,734	0	0
Ventilating shafts on sewers which will become indispensable when house sullage water connections are made	11,712	0	0
(*a*) 9″ pipe sewer in Victoria Cross Lane (the only metalled road unsewered in the district surveyed)	3,736	0	0
House sullage water connections to 33 houses in Victoria Cross Lane in connection with the sewer proposed (average cost per house Rs. 277)	9,153	0	0
Total Rs. ...	2,48,642	0	0

The area included in the district is 489·17 acres, and the numbers of houses to be connected is 663.

The Corporation sanctioned the work, under Resolution No. 4688 of 8th October 1888, subject to the sanction of Government, to the raising of a loan for the purpose.

Government has since approved of the proposal and directed by Resolution No.1785 of 8th May 1889, General Department, the publication of the Commissioner's application in the Bombay *Government Gazette*.

The contract form and specification for the work are being prepared.

(6.) (*a*).—SEWERAGE OF THE FORT (PIPE SEWERS).

Contractors—MESSRS. FAKIR MAHOMED BABANBHAI & Co.

The whole of the work has been practically completed.

Owing to the negligent manner in which the work was carried out, and to the house-owners being unaccustomed to the use of the drainage fittings, the house branches were at first frequently choked. The contractors, though bound, under the terms of their contract, to maintain and uphold in good, substantial, sound and perfect condition all and every part of the works during the progress and continuance of the same, and also for a period of 12 calendar months from and after the date of the passing of the final certificate, repudiated their liability to clean the drains, and consequently the work had to be done departmentally at their risk and expense after they had been served with a notice under clause IV. of the contract.

There are several minor works remaining in the district, but these are being carried out departmentally, as delay on the part of the contractors, who are disinclined to undertake the work, would result in great public inconvenience.

The final accounts will be adjusted in the ensuing year and will form a subject for future report.

The following statement gives the quantities and cost of the work done to the end of the year :—

(b.)—Ventilation of Pipe Sewers in Government Roads on the Esplanade.

Several complaints were received of offensive smells emanating from the manholes through perforations in the covers.

The Executive Engineer, Presidency, prepared an estimate amounting to Rs. 4,147 for putting up 7 ventilating shafts, and forwarded it for the sanction of the Superintending Engineer, Northern Division, who suggested to Government that the work should be carried out by the Municipal Drainage Establishment.

The work was estimated by this Department to cost Rs. 4,298, including 15 per cent. contingencies, Messrs. Bulkley & Co.'s contract rates being used in the calculations.

The execution of the work by the Municipality at Government expense was sanctioned by Resolution No. 313 C-W—964 of 1888.

The work has since been entrusted to Messrs. Fakirji Pestonji & Co., contractors for the erection of ventilating shafts in the first drainage section. It is estimated to cost at their rates Rs. 3,403, and that sum has been deposited by Government with the Chief Accountant.

(7.)—PIPE SEWERS AND BRANCH PIPE DRAINS IN BELLASIS ROAD, FORAS ROAD AND GILDER STREET.

Contractors—MESSRS. FAKIR MAHOMED BABANBHAI & Co.

A sum of Rs. 29,822 having been sanctioned for this work, under Resolution of the Corporation No. 2705 of 26th March 1888, a contract form and specification were drawn up and tenders were invited.

Four tenders were received on the 18th October 1888. The Standing Committee accepted, under their Resolution No. 5097 of 31st October 1888, Messrs. Fakir Mahomed Babanbhai & Co.'s tender amounting to Rs. 18,732, which was the lowest received.

The difference between the amount of the office estimate and that of the accepted tender is Rs. 7,005, as shewn below :—

Amount of estimate	Rs.	25,737
Do. of accepted tender	„	18,732
Difference	Rs.	7,005

The contract was signed on the 1st February 1889, and the work was commenced on the 15th February 1889.

The quantities and cost of the work during the year are given in the following statement :—

Quantities.	Particulars.	Rate.	Per	Amount.
		Rs.		Rs.
253·62 c. ft.	General excavation, including filling in	3·750	100 c.ft.	1,326·075
670·50 „	Rock excavation, including filling in	6·000	„	40·230
769·83 „	Brickwork in hydraulic mortar in manholes pointed internally and plastered externally with cement and sand (1 to 1) 1½″ thick	65·000	„	500·389
360 „	Cement concrete	70·000	„	252·000
584 „	Cement and sand filletting to mouth of manholes	5·000	c. ft.	29·200
318·48 s. ft.	Render in cement and sand (1 to 1) ½″ thick	12·000	100 s. ft	38·218
1,946 r. ft.	9″ stoneware pipe laid complete	1·000	r. ft.	1,946·000
51 Nos.	9″×6″ stoneware junctions	3·625	each.	184·875
53 „	Earthenware disk plugs with mortar fillets	10·000	100	53·000
14 „	Cast-iron frames for manholes	18·000	each.	252·000
14 „	Do. covers do.	13·000	„	182·000
26 „	Do. steps	7·500	Doz.	16·280
	Total.....Rs.			4,772·537

(8.)—STORM-WATER DRAIN FROM PAREL ROAD (AT JUNCTION OF BELLASIS ROAD) TO SHEPHERD ROAD, AND A STORM-WATER DRAIN ALONG A PORTION OF RIPON ROAD TOGETHER WITH WATER ENTRANCES AND MANHOLES TO BOTH DRAINS.

Contractors—MESSRS. BHOMAJI SHIVAJI & CO.

Under Resolutions of the Corporation Nos. 2703 and 2704 of 26th March 1888, two sums of Rs. 33,749 and Rs. 23,436 respectively were sanctioned for (*a*) extension of the Parel Road storm-water drain to Shepherd Road, and (*b*) construction of a storm-water drain from Bellasis Road to two-thirds the length of Ripon Road. These two works were combined for facility of supervision and a contract form and specification were drawn up. Tenders for the work were advertised for on the 1st November 1888. Six tenders were received on the 15th November 1888, and Messrs. Bhomaji Shivaji & Co.'s tender, amounting to Rs. 46,030, being the lowest, was accepted under the Standing Committee's Resolution No. 5362 of 28th November 1888.

The contract was executed on the 1st of February 1889, and the work was commenced on the 14th idem.

(9.)—NIGHT-SOIL DEPOTS ON DeLISLE ROAD.

In consequence of the extension of the Halalkhor system to the outlying districts or northern part of the island, it was considered necessary to provide additional night-soil depôts for emptying night-soil carts near the points of collection and avoid the necessity of hauling them over long distances on the public roads. The subject has been under consideration for a long time, and plans and estimates amounting to Rs. 2,799 for constructing a depôt on the new main sewer 400 feet to the west of the Love Grove Pumping Station were submitted, so far back as September 1883, to the Town Council who deferred the consideration of the question *sine die*.

In 1886 it was suggested that two depôts, one at the junction of DeLisle Road and Elphinstone Road (north end of DeLisle Road) and the other near the Agripada latrines in Haines Road, should be constructed. The position of the former was, however, altered to the junction of DeLisle Road and Carroll Road owing to engineering difficulties, while the Health Officer having objected to the position of the latter, another site was selected near the south end of DeLisle Road.

Designs and estimates amounting respectively to Rs. 9,078 and Rs. 5,612 were prepared and submitted in 1887.

By Resolution No. 644 of 25th April 1888 the Corporation sanctioned Rs. 5,612 for the construction of a depôt at the south end of DeLisle Road, and by Resolution No. 645 of 24th April 1888, a sum of Rs. 5,000 was granted for the purchase of 5,000 square yards of land, at Re. 1 per square yard, for the northern depôt, and a further sum of Rs. 6,503 for filling it in.

Negotiations were carried on with the owner for the purchase of the land to the north of DeLisle Road, but they having failed, the ground was acquired under the Land Acquisition Act.

The Collector of Bombay awarded to the owner Rs. 7,247-4-0, and handed over the land to the Municipality on the 22nd November 1888.

A contract form and specification for the southern depôt were prepared, and tenders were advertised for on the 7th November 1888.

Two tenders were received on the 3rd December 1888, that of Mr. Sittaram Lakhshaman, amounting to Rs. 6,033·746, including 10 per cent., being the lower. This was accepted by Resolution No. 5626 of 9th January 1889 of the Standing Committee, and the Municipal Solicitors were requested to prepare a contract for execution.

The G. I. P. Railway Company has since strongly protested against the establishment of a night-soil depôt in the immediate vicinity of the proposed Byculla Station, and the construction of the depôt has therefore been deferred.

A contract form and specification for the northern depôt were sent to the printers, and as soon as the fair copies are received, tenders will be invited for the work.

In the meantime arrangements were made for laying the foundations and filling up the site.

(10.)—SEWERAGE OF THE PAREL, MAZAGON AND UMARKHADI DISTRICT.

This district comprises Bhuleshwar, Kharatalao, Ghodapdeo and Chinchpokli, besides the localities abovementioned.

Numerous complaints have been received of the unsanitary state of the district, and the Health Officer has strongly urged the immediate necessity of introducing the sewerage system, particularly as the staff at his command is not sufficient to empty the numerous cesspools with expedition and efficiency.

An estimate amounting to Rs. 11,700 for surveying this district, which was submitted towards the end of 1887, was sanctioned by the Corporation under Resolution No. 1411 of 4th June 1888.

The details of the sum of Rs. 11,700 were as follows :—

6	Surveyors at Rs. 80 each...	...	...Rs.	480		
7	Do. „ 60 „ ...	...	... „	420		
3	Do. „ 45 „ ...	...	... „	135		
32	Laskars „ 10 „ ...	...	... „	320		
	For one month	...	...	...	1,355	
					8	
	For 8 months	...	...	...	10,840	
	Add—for stationery, &c.	...	...	...	860	
	Total Rs.	...	...	...	11,700	

The survey was commenced on the 1st August 1888.

Owing to some of the surveyors having resigned, and some having unavoidably been transferred to other works, the period of the survey has been extended.

The work at the time of writing is practically completed and will form a subject for the next annual report.

(11.)—SEWERAGE OF COLABA.

When the sewerage of Bombay was considered by the Special Drainage Commission appointed by Government in 1877, it was decided to exclude Colaba for that time from the general system. Colaba Causeway was not then occupied by buildings, and the southern half of Colaba which was entirely the property of Government, was drained

in small channels, in some places into the sea, and in other places into the sub-soil, while the northern half discharged its sewage into the harbour directly, or into basins connected therewith, and no particular nuisance was experienced. The eleven years which have elapsed since the Commission sat have, however, effected a great change, particularly in the northern part of the district. The Yacht Club and the Sardar Mansions have sprung up with the large Apollo Hotel in the vicinity, and a long line of three and four storeyed houses, tenanted mostly by Europeans, have been erected along Colaba Causeway. Numerous complaints having been received regarding the discharge of sewage into the basins and the harbour, and in respect of the want of properly constructed sewers, the question of the sewerage of the district forced itself upon Municipal attention.

It was under consideration for a long time before an application was made in March 1886, by Mr. Chisholm, the architect of the Sirdar Mansions, on the subject of the drainage of those buildings, but that circumstance pointed more prominently than anything which had previously occurred to the necessity of deliberation being superseded by action.

The drainage connection of the district by simple gravitation with any part of the Fort pipe sewer system was found impracticable, and therefore it was proposed to establish a small pumping station near the latrine close by the Saluting Battery at the Apollo Bunder to pump the sewage into the Fort pipe sewers.

As the urgency of this work entailing a heavy outlay on the part of the Municipality had arisen through the rapid increase of buildings on Port Trust property, the Port Trustees were requested to give free of charge the land required for the pumping station.

The Trustees, however, pointed out that they had leased all the Colaba Causeway frontage building sites in the vicinity of the proposed station and disapproved of the proposed site, lest their tenants might claim against the Trust in the event of the Trustees being parties to any scheme adding to the nuisance already caused by the latrine.

They recommended for the station a plot of Government land on the west side of the Causeway, and stated that the Municipality had special claims on Government inasmuch as Government had a very large interest in Colaba.

An application was made to Government, but under Resolution No. 636 (C. W. 1783 of 1887), dated the 9th November 1887, Government forwarded a copy of the Sanitary Commissioner's report, and regretted their inability to grant a site for the pumping station.

The Sanitary Commissioner strongly objected to the establishment of a pumping station on any of the sites indicated, and thought that

when the question of the Colaba sewerage was more fully considered, a site would be found in Small Colaba which would be less objectionable.

Another application was made to Government for a plot of their land either in a corner of the Dockyard or at the side of the Tramway stables.

Government observed in their Resolution No. 3630 of 12th October 1888, that the only course apparently open for adoption by the Municipality was to accept an offer which had been made by the Port Trust, to grant a site near the Coal Depôt, Arthur Basin.

Although the primary object of extending the sewerage system to Colaba was to provide for the immediate and pressing necessities of Colaba Causeway and of the Sardar Mansions in Apollo Bunder Road, yet, inasmuch as the whole of Colaba would ultimately have to be sewered, it was necessary to survey and lay down lines for the whole district, so as to ensure that whatever might first be done, might be adopted to and form an integral part of the entire scheme.

On the 8th November 1888, the employment of two surveyors and six laskars was sanctioned for a period of two months to take the necessary levels and prepare plans and estimates for a complete scheme for the sewerage of Colaba, comprising the whole of the district south of the Fort as represented by the Secretariat on the west and the Sailors' Home on the east.

The scheme was drawn up under the consideration that the sewerage of Bombay should not be complicated by a diversity of either systems or outfalls, and that the sewerage of Colaba should be treated as an extension of the Fort system which is itself an extension of the general system of Bombay.

The population of Colaba which was 17,132 at the last Census in 1881, was assumed to have increased in the compound proportion of 2·22 per cent. per annum, that is, the ratio adopted by the Health Officer. This calculation brought the present population to 20,558. There is an evil in providing too large a reserve capacity, and seeing that the district was of limited area, that the population could not increase indefinitely, that the increase assumed for the preceding eight years might more probably be excessive than otherwise, and that Government was not likely to ever allow the comparatively large area of which the cantonment consists to be over-crowded or even densely occupied, it was thought that provision for a population one-and-a-half time the present estimated population would be amply sufficient, particularly after making a liberal allowance for sewage per head, allowing a sewer capacity capable of discharging the daily sewage in 12 hours, and providing tanks for the reception when required of one hour's sewage during the period of maximum discharge.

A population of 31,000 was therefore provided for, and it was assumed according to the general rule that the sewage would amount

to 5 cubic feet (31¼ gallons) per head per diem, one-half of which would require to be discharged in the six hours of daily maximum flow. The sewers were so designed as to be capable of discharging 215 cubic feet (1,344 gallons) per minute, or 13,000 cubic feet (81,000 gallons) per hour, equivalent to 310,000 cubic feet (1,937,500 gallons) per diem if the flow were regular during the whole 24 hours. No masonry sewer except a high level discharge sewer would be required, pipe sewers from 9″ to 18″ in diameter would with that exception be sufficient throughout.

The main pipe sewer would commence in Upper Colaba Road close by the old Light-house, with a 9″ pipe to be continued to a distance of 1,235 feet to the west end of Napier Street; the size of the pipe would then be increased to 15″ in diameter, and would be carried on of that size 4,424 feet to the extent of Upper Colaba Road and as far as St. John's Church, where an 18″ inch pipe would commence and would run 7,265 feet to the pumping station. The line of trunk pipe next in importance, though not required to be larger than 9″ in diameter, would commence at the eastern approach to Wodehouse Road and Colaba Causeway. It would receive at a distance of 1,580 feet from its head a branch section from Apollo Bunder Road which would drain among other buildings the Yacht Club and the Sardar Mansions.

The length and description of the different sorts and sizes of sewers would be as follows :—

		Feet run.
(*a*)	9″ stoneware pipe	31,601
(*b*)	15″ do. do.	4,424
(*c*)	18″ do. do.	7,265
(*d*)	17″ cast-iron do.	163
(*e*)	23″ do. do.	163
(*f*)	Masonry sewer with half round invert 24″ high ×23″ wide	5,308
	Total ...	48,924

The aggregate length of sewers would thus be a little over 9¼ miles. 323 manholes were designed, the maximum distance apart being 200 feet. As, however, a manhole would be placed at every junction of pipe sewers and at every change of horizontal direction, the average distance apart would be only 151 feet.

The velocity required to render a sewer self-cleansing has been found by experiment and practice to be from 150 to 180 lineal feet per minute, and it was arranged for the sewers to be laid at such gradients as to afford velocities of in no case less than 150 feet per minute.

It was proposed to ventilate the sewers by metal rectangular shaft diaphragm ventilators 14″×4′, such as are in use in other parts of Bombay, fixed against buildings, wherever available, and communicating with the manholes by underground air flues of masonry.

A ventilating shaft was provided for at the head of every pipe sewer, and so many intermediate shafts in addition, that the average distance apart would not exceed 200 yards. The total number would be 110.

The pumping station would comprise—

(*a*) Engine house.
(*b*) Coal shed.
(*c*) Engineer's quarters.
(*d*) Firemen's quarters.
(*e*) Latrines.

The area required would be 188 feet × 150 feet, equivalent to 3,125 sequare yards.

The estimated quantity of sewage to be pumped at the daily period of maximum flow being 215 cubic feet (1,344 gallons) per minute, and the left being 30·54 feet, the effective horse-power required would be 12·42.

The cost of the several parts of the work were liberally estimated, and the outlay for the whole scheme complete in every respect would amount to Rs. 6,38,725 (including the usual contingent allowance for a supervising staff) as shown below :—

	Rs.
(*a.*)—Pipe sewers	3,10,435
(*b.*)—High level discharge sewers	62,243
(*c.*)—Cast-iron and zinc ventilating shafts in connection with sewers	30,223
(*d.*)—Flushing chambers in connection with pipe sewers	31,432
(*e.*)—Metal flaps fixed complete in manholes on pipe sewers	9,690
(*f.*)—Engineer's quarters	5,465
(*g*)—Quarters for six firemen	3,300
(*h.*)—A three-chamber latrine	900
(*i.*)—Coal store	2,288
(*j.*)—Engine house with engines and pumps complete	25,976
(*k.*)—Cook room	841
(*l.*)—Compound wall	3,340
(*m.*)—Water connection	2,626
(*n.*)—Purchase of land for pumping station	62,500
(*o.*)—Metalling surface of compound	3,105
(*p.*)—Sewage tanks	37,478
	5,91,842
Deduct—	
(*q.*)—Cost of pipe sewers, cast-iron and zinc ventilating shafts, flushing chambers and metal flaps in Port Trust roads about Colaba Causeway, Wellington Reclamation and Arthur Bandar (work to be carried out by the Port Trust)	36,429
Rs.	5,55,413
Add—15 per cent. Contingencies.....Rs.	83,312
Grand Total Rs.	6,38,725

While the subject was under the consideration of the Commissioner he received a visit from Mr. Edwin Ault, of the Firm of Shone and Ault, who was on his way from Rangoon to Australia. Mr. Ault had but little time to spare, but it was sufficient to admit of the details of the scheme as prepared, being explained to him and of his supplying data, which will enable an estimate of the Shone system as applied to Colaba to be prepared. It will be probably very much more expensive than the scheme which has been drawn up, and it will be a question whether or not the substitution of an air-comprising station for a sewage pumping station will be an advantage commensurate with the increased cost.

(12.)—SEWERAGE OF FRERE ROAD.

In order to provide ventilators and to carry out certain other works in connection with the Frere Road drain, a sum of Rs. 25,000 was provided in the 15 lakh portion of the 44 lakh Sanitary Works Loan.

Out of this a sum of Rs. 1,281 was expended in 1887 in raising 28 manholes between the Fort Market and Carnac Bridge.

The undermentioned works have since been sanctioned to be carried out from the available balance :—

		Rs.
(*a.*)	Seven ventilating shafts between Wari Bunder and Carnac Bridge (until more buildings are erected, suitable places cannot be found for more than 7 shafts)	2,048
(*b.*)	Twenty manholes on drain between Wari Bunder and Carnac Bridge to be built up to the surface and covered with cast-iron frames and covers (at present access to the drain cannot be obtained except by breaking up the roadway, as there are no manholes built up to the surface)	3,338
(*c.*)	Twenty-four additional manholes on drain between the Fort Market and Carnac Bridge to be built up to the surface and covered with cast-iron frames and covers. (These were suggested by the Health Officer under his No. 31774 of 17th March 1887)	3,526
(*d.*)	Fifty water entrances to be distributed along the road from the Fort Market to Wari Bunder. (Frere Road is frequently flooded during the rains. The present cast-iron gullies with only 6-inch pipes are too small to carry off the water with sufficient rapidity)	14,773
	Total Rs.	23,685

On the receipt of instructions in April 1888, to invite tenders for the works, a contract form and specification were prepared and tenders were advertised for on the 20th November.

Tenders were due on the 10th December 1888, but as none were received, it has been proposed to carry out the works departmentally.

Some contractors having, however, recently expressed a desire to undertake the work it is probable that tenders will be newly advertised for.

The southern portion of the Frere Road sewer between the starting point near the Fort Market and Carnac Road not having been ventilated, an estimate amounting to Rs. 4,715, inclusive of 15 per cent. for contingencies, for erecting 4 masonry and 9 metal shafts has been submitted, but the proposal has not yet been sanctioned.

(13.)—LATRINES AND URINALS.

A sum of Rs. 20,000 having been provided for latrines and urinals in the Budget Estimate for the year, sites were selected in consultation with the Health Officer, and a contract form and specification were drawn up for the erection of the undermentioned:—

(*a.*)—One 8-chamber latrine and 2-chamber urinal at the junction of Old Nagpada Street and Jakaria Musjid Street.

(*b.*)—One 12-chamber latrine at Khara Talao.

(*c.*)—One 8-chamber latrine at the Arthur Crawford Market.

(*d.*)—One 4-chamber latrine and 3-chamber urinal at Haines Road below Byculla Bridge.

(*e.*)—One 8-chamber latrine and a 4-chamber urinal at the Mumbadevi carriage stand.

(*f.*)—One 8-chamber latrine at Valpakhadi.

Mr. Ardeshir Framji alone tendered for the work, but the amount of his tender was higher than that of the office estimate by Rs. 4,647.

The cost of the work at the petty works contractors' rates would amount to Rs. 20,810, *i.e.*, Rs. 3,564 more than the office estimate. Unless an additional outlay of Rs. 3,564 be provided for, there will be no alternative but to carry out the work departmentally, in which case there is every probability the sanctioned grant would not be exceeded.

(14.)—CARNAC BUNDER NIGHT-SOIL STATION.

The station has been worked satisfactorily during the year by the usual staff and within the budgetted allowance for coal, stores, &c. The engines were maintained in good working order and were attended by the native Engineer in charge with his customary care. There was no break down or stoppage of any kind and no special repairs were required. The supply of sea water was at all times abundant for flushing purposes.

In order to obtain the indispensable increase in the storage capacity of the main salt-water tank as required by the Health Officer it was

proposed to raise the walls of the tank by 3 feet at a cost of Rs. 758. On commencing the work, however, the walls and foundations and the concrete floor of the tank were found so defective that there was no alternative but to entirely rebuild the tanks, and an estimate amounting to Rs. 2,250 was accordingly submitted.

The work was sanctioned under the Commissioner's No. 16749 of 16th February 1888, to be debited to the grant for annual repairs, Health Department.

The work was completed satisfactorily (the tank being perfectly water-tight) and within the sanctioned grant. The final accounts are being adjusted.

The senior Military Medical Officers of the Bombay District having reported that the health of the 4th Bombay Rifles was affected during the cold weather months, (when easterly winds prevail) by the stench arising from the night-soil depôt, a Committee of the undermentioned gentlemen was appointed by Government Resolution No. 1906 of 5th June 1888, General Department, for the purpose of considering what means should be adopted for the removal of the nuisance from the station :—

PRESIDENT.

Brigadier-General C. W. LaTouche, Commanding Bombay District.

ATTENDING MEMBERS.

Surgeon-Major C. W. MacRury, Sanitary Commissioner.
Mr. M. C. Murzban, Executive Engineer, Presidency.
Mr. F. L. Charles, Acting Municipal Commissioner.

By Government Resolution No. 2419, dated 12th July 1888, General Department, the recommendation of the Committee to carry out the following works as the only feasible remedial measures was approved :—

	Rs.	a.	p.
(*a.*)—Masonry ventilating shaft	309	8	0
(*b.*)—Raising walls between the Infantry Lines and the night-soil station	918	4	0
(*c*)—Gas pipes and jets	20	0	0
(*d.*)—Planting trees.....	135	0	0
	1,382	12	0
10 per cent. addition for contingencies	138	4	0
Total Rs....	1,521	0	0

The works recommended are in progress.

(15.)—DRAINAGE SLUICES.

The sluices and penstocks at the undermentioned places, which have been in charge of this department, were satisfactorily worked during the year by the staff allowed for them :—

(*a*) Dharavi.
(*b*) Warli.
(*c*) Love Grove.
(*d*) Flats.
(*e*) Bellasis Bridge.
(*f*) Queen's Road.
(*g*) Carnac Road.
(*h*) Mint Road.

The doors of the sluices at Warli, which were very delapidated and leaky, were renewed and fitted in new masonry so as to render them water-tight. The work was completed with a saving of Rs. 185 on the sanctioned grant as shown below :—

	Rs.
Budget grant for the work	2,000
Amount expended	1,815
Saving...Rs.	185

Some doors of the sluices at Dharavi and Love Grove also required renewal, and for this work provision will be made in the next Budget estimates.

The work of constructing and fitting up a triple penstock at the mouth of the old main drain at Bellasis Bridge was practically completed last year, but the defects which the contractors failed to remedy were made good departmentally this year at a cost of Rs. 1,758-15-8, to be deducted from the contract amount.

(16.)—MISCELLANEOUS DRAINAGE.

The arrangements made for carrying out the several miscellaneous drainage works, consisting of repairs, alterations, construction, cleaning, and flushing of sewers and drains, the erection of latrines and urinals and the superintendence of the house connections of new buildings, have worked satisfactorily.

Inspector Mr. Cluley having been temporarily transferred to the Queen's Road and Girgam Drainage Works, Mr. Thurley was appointed in his place to superintend the house connections in A, B, C, and part of D Wards. A special staff called the Manholes and Sewer Inspection Establishment was sanctioned for a systematic inspection of all the manholes and new sewers in the City.

The manholes and lampholes have since been regularly opened, and cleared and flushing carried out where found necessary.

(17.)—MISCELLANEOUS DEPARTMENTAL WORKS.

The following is a list of all the Miscellaneous Works carried out departmentally under the supervision of Inspector Mr. Baker :—

Consecutive No.	Description of Work.	Amount sanctioned.	Amount expended.	Remarks.
	WORKS COMPLETED.	Rs. a. p.	Rs. a. p.	
1	Completing the remaining portion of Khetwadi house sullage water connections	5,095 0 0	4,430 9 4	
2	Repairs to portions of the flues of "Beehive" destructor	810 11 4	409 5 11	
3	Constructing 2 water entrances on Bellasis Road..	446 0 0	377 14 8	
4	Do. 18 do. Parel Road ...	3,598 0 0	2,432 2 8	
5	Do. 3 do. Erskine Road..	1,008 0 0	736 13 7	
6	Do. 2 do. Nesbit Road ...	569 0 0	561 5 8	
7	Do. 11 do. KhetwadiMain Road...	5,505 0 0	4,589 0 0	
8	Do. 4 do. do. 12th Lane	650 0 0	486 10 3	
9	Do. 2 do. Charni Road.	671 0 0	649 15 6	
10	Making a pattern of soil pan for Native water closets	16 0 0	11 6 6	
11	Drain connection of Mr. Vittuldas Pranjiwandas's house in Ripon Road	421 8 3	313 10 6

(18.)—STORES DEPOT AT BELLASIS BRIDGE.

(a.)—*Stoneware.*

The stoneware pipes and specials required for the Queen's Road and Girgam Sewerage Works were supplied by Messrs. Richardson and Cruddas under their contract, dated the 10th January 1889.

The goods were all of Doulton and Co.'s manufacture, as were those supplied before, and satisfactorily stood the usual tests.

The value of the pipes and specials supplied to the Stores during the year was Rs. 59,796-6-1, and of those issued therefrom Rs. 57,621-5-2.

(b.)—*Cast-iron and Zinc Fittings.*

The fittings (iron and zinc) required for ventilating shafts in the Fort District and those required for the Queen's Road and Girgam Sewerage Works were supplied by Messrs. Walsh, Lovett and Co. under the two contracts, dated the 24th September 1888.

Several other miscellaneous fittings and castings were obtained from the Workshops and from Messrs. Richardson and Cruddas, the supply contractors for the year.

The total value of the fittings received into the Stores was Rs. 1,46,005-11-8, and of those issued therefrom Rs. 36,727-6-6.

(c.)—*Cement.*

The balance of cement in hand being low, tenders for the supply of 2,000 casks were advertised for on 20th August 1888.

Of the 3 tenders received, that of Messrs. Ewart, Latham and Co. undertaking to supply, at Rs. 8-11-0 per cask of 3½ cwt. nett, was accepted under the Standing Committee Resolution No. 4310 of 19th September 1888.

The value of cement received during the year was Rs. 19,462-13-5 and of that issued Rs. 16,695.

From the following summary (of the totals of the statements marked A, B, C, and D, respectively, which have been separately furnished) it will be observed that the value of the stores in hand at the commencement of the year was Rs. 3,05,061-8-0, and the receipts and issues during the year amounted, respectively, to Rs. 2,25,833-10-7 and Rs. 1,11,043-11-8, and the value of the stock in hand at the close of the year was Rs. 4,22,402-8-0.

B. WATERWORKS.

1.—General.

THE VEHAR LAKE AND DEPENDENT WORKS.

Rainfall, 1888.

1. The rains commenced on the 5th June, and up to the 31st October 72·25 inches were recorded. In addition to this, however, the rainfall for 1888 shews 2·22 inches in January and 2·24 inches in November. The total rainfall for the year 1888 was therefore 76·71 inches. The average for the preceding 27 years was 81·59 inches.

Height of water.

2. The rainfall in the monsoon of 1888 was not, however, of a character favourable to a large percentage collection in the Lake, and on the 31st October the water level was at 257·15 T. H. D.

The Lake has been on three occasions lower than this on the corresponding dates in previous years, and once at practically the same height as follow:—

1871	250·30	T. H. D.
1872	253·70	"
1881	257·30	"
1882	253·90	"

When the monsoon bursts in June next, the water level will be at about 244 T. H. D., and as the level of the coping of the filters at Vehar is at 243 T. H. D., filtration will have to be stopped before the usual date for the bursting of the monsoon, and the whole of the water will have to be taken from the Lake through one inlet, which is only 2 feet above the bottom of the channel leading from the Lake to the Tower. The quality of the water delivered in the city will therefore be much worse than usual. Another light monsoon this year (1889) would cause grave inconvenience in 1890, both as to quality and quantity.

Table No. I gives the rainfall at, and height of water in, the Lake during the year 1888.

3. Concrete Trench in Vehar Waste Weir.

Estimated Cost ... ... **Rs. 35,000 (Loan).**

Sanctioned by Town Council ... ... **8th December 1887.**

,, Corporation ... ... **26th January 1888.**

Acceptance of Tender approved by Town Council ... ... **8th February 1888.**

Amount of Tender, 1st Section ... ... **Rs. 21,103·18.**

Contractors—Messrs. Hirji and Raoji.

Work commenced ... ... **16th February 1888.**

,, completed ... ... **9th August 1888.**

Cost 1st Section—	Paid to Contractors ...	...	Rs. 17,513	13 10
	Printing and advertising	...	,, 202	10 5
	Supervision	...	,, 818	14 11
			Rs. 18,535	7 2

The object of this work is to stop the leakage of 1,250,000 gallons per day, which took place when the lake was full. It is proposed to effect this object by removing the puddle in the waste weir, and to replace it by Portland cement concrete and to continue the concrete into the natural ground on either side of the waste weir as far as may be found practicable or necessary to prevent soakage through the loose and permeable strata. The first Section was carried out and completed as above. The water in the Lake failed to rise to the levels where the heaviest leakage took place; the gaugings, however, shew that the work done on the first Section has materially reduced the leakage. The first Section comprises the waste weir itself, 358 feet in length, and 25 feet on each side of it.

The second Section will extend the concrete about 50 feet into the hill on the northern or bungalow side, and will provide drains for the base of the waste weir.

In the first Section the concrete was laid on a foundation at a level of about 246 T. H. D. The foundation was either hard moorum or fairly compact, but not watertight, disintegrated trap. There was no apparent probability of a better foundation being met with at a reasonable depth, and as it was watertight against 8 feet head of water in the Lake above it, it was passed. Blasting would have endangered the stability of the adjoining masonry. The old puddle was found to be ordinary moorum; and the rubble masonry is built of layers of stone and layers of mortar alternately through which

water of course very readily percolates. The new work is of 6 to 1 Portland cement concrete about 3 feet 3 inches in thickness, varying with the containing rubble walls from 2 feet 6 inches to 3 feet 6 inches.

4. The old and disused masonry outlet Tower and Pier opposite Dam No. 1, were removed in April and May 1888, down to the water level. Cost Rs. 200. The work was included in the undernamed contract.

Old masonry Tower.

5. **Repitching and repairs of Dam No. 2.**

Estimated cost ... ... Rs. 10,000 (Revenue).
Sanctioned by Town Council ... ... 8th December 1887.
„ Corporation ... ... 26th January 1888.
Acceptance of Tender approved by Town Council ... ... 8th February 1888.
Amount of Tender ... ... Rs. 7,812-0-0.
Contractors—Messrs. Hirji and Raoji.
Work commenced... ... ... 18th February 1888.
„ completed ... ... 7th September 1888.

Cost—Paid to Contractors	Rs.	4,734	10 11
Printing and advertising	„	29	12 1
Supervision...	„	229	13 6
	Rs.	4,994	4 6

The pitching was removed and the slope dressed; a bed of packing and road metal was then laid, and on this the *khankis* were replaced, point upwards, and the spaces between the points filled up with road metal.

The puddle trench put in by Major Tulloch in 1871 was extended about 45 feet; this new portion was carried down into the solid rock and the puddle rests on a shoe of Portland cement concrete.

The leaks come partly below the bottom of the old puddle trench and partly from the natural ground; the gaugings will be continued. There is at present no cause for anxiety or danger from these leaks which only aggregate about 20,000 gallons per day, and the advantages of stopping them would be incommensurate with the cost incurred. It is not anticipated the leaks will increase, and they are less now than before the repairs were executed in 1871.

6. **Chawl for workmen at Vehar.**

Estimated cost ... ... Rs. 12,000 (Revenue.)
Sanctioned by Town Council ... ...19th October 1887.
„ Corporation ... ...14th November 1887.
Acceptance of tender approved by Town Council ... ...27th March 1888.
Amount of Tender... ... ... Rs. 10,542-0-0.
Contractor—Mr. Ardeshir Framji.
Work commenced ... ... 2nd April 1888.
„ completed ... ... 1st August 1888.

Cost—Paid to Contractor	... Rs.	9,249	14 4
Advertising, Printing, &c.	... „	68	6 0
Supervision	... „	75	4 8
	Rs.	9,393	9 0

The chawl provides :—

12 Rooms	each	15	feet by	10 feet.
12 Verandahs	„	7	„	6 „
12 Cook-rooms	„	7	„	6 „
2 Store-rooms	„	17	„	10 „

The cost per cubic foot enclosed is 3 annas.

The plot of ground taken up under the Land Acquisition Act is co-extensive with the previously acquired site of the filters and measures 500 feet by 150 feet.

7. **Catch-water Channels at Vehar.**

Estimated Cost ... ... Rs. 13,600 (Revenue).
Sanctioned by Town Council, 22nd March 1888 ...Rs. 10,000
„ Standing Committee, 19th Dec. „ ...Rs. 3,600
„ Corporation, 9th April 1888... ...Rs. 10,000
„ Corporation, 7th January 1889 ...Rs. 3,600
Acceptance of Tender approved by Town Council

Total ...Rs.				

The channels are all excavated in earth. The one on the eastern side of Dam No. 3 is 3,080 feet in length. On the western side, First Section, 535 feet. Second Section, 1,914 feet. Total 2,449 feet.

The area added to the gathering ground by the 3 Channels is about 120 acres.

Site for additional filters.

8. During the year a site near the existing filters was surveyed and contoured with a view to the extension of the filters.

9. **Building Rooms over Sluice Houses, Additions and Alterations to the Bungalow at Vehar Lake.**

Estimated Cost Building Rooms over Sluice Houses ... ...**Rs. 5,000 (Revenue).**
Additions and Alterations to Vehar Bungalow ... ...**Rs. 5,000 (Revenue).**
Sanctioned by Town Council ... ...**8th & 14th Dec. 1887.**
,, Corporation ... ...**25th April 1888.**
Acceptance of Tender approved by Standing Committee ... ...**31st October 1888.**
Amount of Tender... ... ...**Rs. 9,518.**

Contractor—Mr. Ghumaji Ballaji.

Work commenced ... ...**3rd Dec. 1888.**
Sluice Houses completed ... ...**28th Feb. 1889.**
Alterations to Bungalow not completed ... ...**31st March 1889.**

Rooms have been erected over the Sluice Houses at Kurla (Vehar 24″ main) and Bandra (Tulsi 24″ main) and at Marole on the Vehar 24″ and Tulsi 24″ mains. The bungalow at Vehar is being thoroughly repaired, the roof changed, and a verandah added on the upper floor.

10. Inspector's Quarters at Bhandarwada Reservoir.

Estimated Cost ... ...**Rs. 4,000.**
Sanctioned by Town Council ... ...**19th October 1887.**
„ Corporation ... ...**14th November 1887.**
Acceptance of Tender approved by Town Council... ... ... **1st Feb. 1888.**
Amount of Tender ... ... **Rs. 3,834-7-0.**
Contractor—Mr. Ardeshir Framji.
Work commenced ... ... **2nd February 1888.**
„ completed ... ... **23rd June 1888.**

Cost—Paid to Contractor	Rs.	3,675	4 6
Advertising, Printing, &c.	„	.....	
Supervision	„	92	7 7
	Rs.	3,767	12 1

The work provides (in addition to raising the walls to the height required to bring the floor level up to the height of the coping of the reservoir)—

An outside Staircase—

Telephone-room	17'-9" by	10'-0"
Living-room	17-9" „	15'-6"
Bed-room	17'-9" „	10'-0"
Bed-room	15'-6" „	10'-0"
Bath-room	10'-0" „	10'-0"
Cook-room	13'-6" „	5'-0"
Storeroom	10'-0" „	10'-0"
Verandah	39'-0" „	6'-0"
Latrine (detached)	5'-6" „	4'-0"

The cost per cubic foot of new rooms is 3 annas.

Leakage of Bhandarwada Reservoir.

11. The leakage of the Bhandarwada Reservoir has been the subject of reports separately printed and issued during the year, and no further reference is therefore here made to the subject. At the close of the year the report of Sir John Fowler, K.C.M.G., was under consideration.

TULSI LAKE AND DEPENDENT WORKS.

Rainfall and draw off 1888.

12. Table No. 2 gives the rainfall at and height of water in the Lake during 1888. The rainfall at Tulsi was about an average one in quantity, but the distribution of it was not so favourable as usual. In anticipation of a light monsoon, the supply to the city was restricted by about 20

per cent. from the burst of the monsoon in June 1888 until the 12th March 1889. The water saved by the Waste Prevention Staff enabled this restriction to be practised without detriment to the useful supply given in previous years. The Lake was filled on the 21st August and about 120 millions of gallons passed over the waste weir and into the Vehar Lake between that date and the 31st August when the overflow ceased. The close of the monsoon was a very light one, and the Lake was on the 31st October 1888 one foot lower than on the 31st October 1887. This difference was gradually reduced by the restriction of supply above referred to, and the height of the Lake was the same on the 31st March 1889 as on the 31st March 1888.

Additional Catch-water Channel.

13. It was proposed during the year to construct a catch-water channel on the northern slope of the range of hills west of Tulsi Lake and forming the southern side of the Kennery Valley. The additional gathering ground secured thereby to be about 250 acres, or equivalent to an increase of 10 per cent. on the present supply to the Lake. The channel in the first instance to be excavated in earth without masonry lining so as to be of service in the monsoon of 1889. The expenditure on the earthen channel was estimated at Rs. 20,000 and on the future masonry lining Rs. 80,000.

On the 19th December 1888 the Standing Committee recommended an expenditure of Rs. 20,000 on the work above described, and the Corporation sanctioned this on the 7th January 1889. The work was commenced on the 14th January 1889 and made favourable progress up to the end of the year under report. The contractor is Mr. Sitaram Luximon, and the amount of his Tender for this work is Rs. 16,070. The acceptance of his tender was approved by the Standing Committee on the 6th February 1889.

Leakage at Waste Weir.

14. Since the raising of the water level there has been a leakage from the wings of the waste weir, and provision was therefore made in the Budget for the year 1889-90 for dealing with this. Beyond the acceptance of a Tender for the work, nothing was done in the year under report.

Leakage from Dams.

15. The leakages from the different dams have been gauged and watched during the year. It is satisfactory to find that the leakage from the masonry dam, as is usual in the case of such structures, is diminishing. The leakage from the earthen dam and tunnel outlet are, both in character and quantity, such as to cause no anxiety.

Rooms over Sluice Houses.

16. The erection of rooms over the sluice houses at Marole and Bandra has been referred to in paragraph 10.

17. The leakage of the Malabar Hill Reservoir has formed the subject of reports which were separately printed and circulated during the year, and the subject was still under discussion at the close of the year under report.

Leakage of Malabar Hill Reservoir.

18. The pumping engine at Malabar Hill Reservoir worked throughout the year without any serious stoppage. The syphon from the south end of the Reservoir supplying the lower portion of Malabar Hill by gravitation and the 12″ main laid in April 1888 from the sluice house below the Reservoir along the slope of the hill into Gibbs Road, enabling Pedder Road and Altamont to be supplied also by gravitation, have reduced by about two-thirds the work of the engine, and have effected a saving of about Rs. 2,500 per year in coal and working expenses. There have been no other changes of importance during the year in connection with the Reservoir. A piece of ground at the south-west corner was purchased from Government at a rate of Rs. 3 per square yard. The area of the plot is 1,955·6 square yards, and it may hereafter be required for extending the works.

Supply to Malabar and Khambala Hills.

DISTRIBUTION MAINS.

19. Table No. 3 gives the details of the new mains laid during the year, exclusive of the Arthur Road 27″ main referred to below. The total length is nearly 8 miles. The 18″ main in Frere Road has entirely changed the character of the water-supply in that district. There are now no complaints, and the shipping is supplied without any difficulty. The estimated cost of the Frere Road work was Rs. 85,000 (Loan). The cost has been—

New mains laid.

		Rs.	a.	p.
For Iron Work	Messrs. John Fleming & Co. ...	57,679	1	11
	Water Works Stock	1,733	6	9
	Deacon's Meters	2,167	8	2
„ Laying	Messrs. Dinsha Kavasji Bhedwar & Co.	8,415	4	4

„ Supervision	1,321	1	7
Total... Rs.	54,116	7	6

Arthur Road, 27" Main.

20. The laying of the main was completed on the 31st March 1889. The delay in completion was due to the difficulty of arranging with the Railway Companies for crossing under their lines, and nothing could be done at these places until after the monsoon of 1888. The first section of the main as far as the circle was put into use on the 23rd January 1889, and materially improved the supply to the Agripada, Dhobiwada and Warden Road Districts. Water was admitted into the Grant Road to the circle part of the main on the 23rd March, but the main was not actually used until the 1st April 1889. On account of the delay with the G. I. P. Railway Company's crossing at Chinchpokli Station, the main under the rails for a length of 107 feet is 14" only, an existing main having been utilized. At the Arthur Road crossing of the B. B. & C. I. Railway the pipes in the culvert are 28", and the culvert is almost square with the railway. In all other respects the main has been laid as was originally designed. The Tulsi water can now be sent to the city direct if required. All the connections with existing service mains are so made that the 27" main can be used either as a distributing main or as a leading main to the reservoir. The lengths of mains laid are—

Kala Chowki Road,	27 inches	986	feet.
Arthur Road,	27 „	9,000	„
Tardeo Road,	27 „	2,906	„
Arthur Road,	28 „	79	„
		12,971	„
Clerk Road,	24 inches	1,250	„
		14,221	feet.
Arthur Road (old main),	14 inches	107	feet.

The accounts are not closed at the time of writing. The estimated cost of the work was Rs. 40,000, exclusive of the pipes, which were supplied as part of the Tansa Pipe Contract. The cost has been—

	Rs.	a.	p.
For Iron-work—Water Works Stock...	Not adjusted.

Fire Hydrants on New Mains.

21. On all the new mains laid down, fire hydrants have been fixed at intervals of from 300 to 500 feet varying with the character of the locality.

New Fire Hydrants fixed on Old Mains.

22. 200 Fire hydrants have also been fixed to old mains in the localities shewn on Table 4. The cost was met out of a grant of Rs. 10,000 in the Budget of 1888-89, and the work will be completed out of the provision of Rs. 6,000 in the Budget of 1889-90. The hydrants were fixed by contract with Mr. Rustomji Edalji Mobatji, and were made in Scotland by contract with Messrs. P. & W. McLellan.

New plans of Mains.

23. One of the most important undertakings of the year has been the re-surveying of the whole of the water mains and their fittings and the preparation of revised plans of them. Six sets of plans have been mounted, and will be distributed as follow :—

Executive Engineer.
Deputy Executive Engineer, Water Works.
Do. do. do. Office.
Chinchpokli Stores.
Water Works Inspectors.
Superintendent of Fire Brigade.

In connection with this work the position of each fire hydrant and sluice valve is being indicated by suitable plates fixed to adjacent posts or buildings. The indicating plates formerly fixed were in many instances lost and in many other cases quite illegible. Continuous attention should be paid to this important point in future.

Lengths of Mains.

24. Statements separately printed record the details of all the water mains and their fittings now in use. The results may here be summarized.

Diameter of Main in inches.	Length in feet.	Number of Fire Hydrants and Watering Posts.	Deacon's Meters.	Number of Sluice and Air Valves.
48	4,764	.....	...	5. 3 A.V.

	925,600 say 175 miles.	1,973	201	906. 39 A.V.

There may be, probably are, many errors in the statements, but it is hoped not any of a serious nature. In the case of many old mains no one knows exactly where one size begins and another ends; and in some cases presumed knowledge may be erroneous. These statements and the plans will now furnish a basis upon which full and accurate information can be registered, and the work should never again be neglected or allowed to fall into arrears.

DISTRIBUTION AND WASTE PREVENTION.

New connections.

25. The total number of new connections made during the year was 962. After deducting 228 disconnections, the net increase in the number of connections is 734; and the total number of connections is now 16,098; the increase of 734

for the year being 4·8 per cent. of the whole. As each connection takes on the average about 1,000 gallons per day, the increased demand for new connections is about ¾ of a million gallons per day.

Meter supplies.

26. The total number of meters in use on the 31st March 1889 was 1,120 against 1,006 on the 31st March 1888. This increase of 114 is over 13 per cent. of the total number previously in use. Of the total number of meters in use, about 1,000 (or 90 per cent.) were Municipal. The details are shown in Table No. 6. The quantity of water registered through meter in 1888 was 796,135,790 gallons. In 1887 the quantity was 723,359,467 gallons. The increase of 72,776,323 gallons is equal to nearly 10 per cent. of the previous year's quantity and to an increase of nearly 200,000 gallons daily. Tables Nos. 7 and 8 give the details of the supply.

Supply of meters.

27. During the year 250 Siemen's meters were purchased from the makers Messrs. Guest and Chrimes, through their Agents, Messrs. Richardson and Cruddas.

143 old Kennedy's meters were received from the makers duly repaired, and these have since been fixed in A Ward.

Public supply.

28. The abolition of dipping wells and the substitution of taps and fountains is being quietly carried out as the distribution arrangements permit. The whole of the iron fountains have been repaired and repainted during the year by departmental agency; a grant of Rs. 5,000 was provided in the Budget of 1888-89 for the purpose. The following new fountains were opened during the year :—

1. The Wadia Fountain, Hornby Vellard.

This is in substitution of the old Pao Market well in Bazar Gate Street. The old well was closed and the site added to the road-way. The inscription on the new fountain is

"A. D. 1888.

"This fountain was erected by the Municipality of Bombay in "exchange for the ground in Bazar Gate Street occupied by a "dipping well and cattle trough which were erected at the expense "of Mehrbai, wife of Muncherji Jamsetji Wadia in the Yazdari "year 1222, A. D. 1853, and were removed in 1888, to facilitate "traffic in Bazar Gate Street."

2. A drinking fountain with cattle trough in Lady Jamsetji Road, Mahim, erected by Mr. Haji Vydina Kassum.

In table No. 9 the usual particulars of the public supplies will be found.

29. The number of notices issued for the repair of defective fittings, &c., was 3,892, of which the particulars are given in Tables Nos. 10 and 11. The decrease from the number of 5,074 in the previous year is 1,182.

Notices for defective fittings, &c.

30. The expansion indicated in preceding paragraphs unfortunately extends to some extent to the correspondence. The comparison of this with 1887-88 is as follows :—

Correspondence.

	1887-88.	1888-89.
Inward Letters	6,135	6,282
Outward do.	5,601	6,386
Total ...	11,736	12,668
Letters sent to Inspectors for report	4,596	3,929
Do. received from Inspectors with report...	4,596	3,963
Total ...	9,192	7,892
Grand Total ...	20,928	20,560

It will be noticed that the Departmental references have been materially reduced in number.

31. The romance of this work is now dying away. The wastage saved has been converted into revenue, and the work now is to prevent an increase of the rate of waste and to secure a continuance of the benefits which were at first derived and felt. It is exactly at this point where the utility of a waste prevention staff begins to be questioned. Its real value is, however, not diminished by the fact that new savings cannot be reported on the top of old ones. The work has been maintained during the year in the Vehar Districts and has been extended to the Tulsi districts. The hours of supply were not extended in the Tulsi Districts, but an equivalent useful supply was received in a shorter time and the draught on the Tulsi Lake was reduced by 20 per cent. from June 1888 to 12th March 1889, thereby husbanding the storage at the Lake for 9 months and enabling the hours of supply to be extended for the hot months of April and May ; by this means the complaints will be fewer than usual in the Tulsi District in May. The hours of supply in the Tulsi District have never previously been extended for the hot season. The particulars of the consumption through the Waste Detection Meters are given in Table No. 12.

Waste prevention.

MAINTENANCE BRANCH.

32. New Office and Store Rooms, Chinchpokli.

These were referred to in the last report and were occupied on the 1st September 1888.

Estimated Cost ... ...Rs. 12,500.
Sanctioned by the Town Council 11th May 1887...Rs. 2,500.
" " 19th Oct. 1887...Rs. 10,000.
" Corporation 26th May 1887...Rs. 2,500.
" " 14th Nov. 1887...Rs. 10,000.
Acceptance of Tender approved by Town Council 1st Feb. 1888.
Amount of Tender ... ...Rs. 11,166-11-0.

Contractor—Mr. Ardeshir Framji.

Work commenced ... ...2nd February 1888.
" completed—Roof ... ...June 1888.
" " whole building ... ...1st September 1888.

Cost—Paid to Contractor	Rs.	13,124	8	1
Printing, Advertising and Contingencies ...	"	209	0	0
Supervision	"	178	10	5
Total..	Rs.	13,512	2	6

An expenditure of Rs. 1,944-13-3 for shelving, a safe, and other works was met by the balance of this grant and by a transfer of savings on the contract for filling the compound (Town Council's Resolutions 18th July and 28th August 1888).

The building provides—

1 Office	20′ 3″	by	12′ 6″
1 Verandah Front...	23′ 0″	"	8′ 0″
" Back	41′ 0″	"	4′ 2″
4 Store Rooms, each	50′ 0″	"	12′ 3″

The cost per cubic foot of enclosed space was 2·75 annas.

After the fire on the 5th February 1889, by which the adjoining haystacks were completely destroyed, the concrete of the roof was found cracked, and some repairs have been necessitated.

33. Filling compound of Chinchpokli Stores.

Estimated Cost ... ...Rs. 11,000.
Sanctioned by Town Council ... ...11th May 1887.
" Corporation ... ...26th May 1887.
Acceptance of Tender approved by Town Council ... ...1st June 1887.
Amount of Tender... ... ...Rs. 10,050.

Contractor—Mr. Bhomaji Shivaji.

Work commenced ... ...**15th June 1887.**
,, completed ... ...**1st October 1888.**

		Rs.	a.	p.
Cost—Paid to Contractor		8,030	5	0
Printing, Advertising, &c.		70	9	1
Supervision		.....		
Rolling and Sandstone for Roads departmentally. ...		1,123	2	8
Total ...Rs.		9,224	0	9

The whole of the compound has been raised and the surface covered with road metal. A further expenditure is desirable to effect the rolling of the metal and its being covered with sand.

34. The bursts repaired during the year were as follow :—

Size of Main.	No. of Bursts.	Joints recaulked.	
32"	1	278	
24"	...	2	Vehar Line.
		341	Tulsi Line—40 on Clerk Road diversion.
18"	1	1	Clamp collar removed and pipe inserted at Mahalaxmi.
18"	...	1	Do. do. do. at General Post Office.
9"	2	...	
8"	3	...	
7"	3	...	
6"	2	...	
5"	1	...	
4"	39	...	
3"	90	...	
2"	1	...	

The only one of these to which special attention need be drawn is the one which occurred near Kurla sluice house on the 32" Vehar line on the 12th January 1889. The portion of main between old Kurla and Kurla Railway Station has frequently been reported to be in a precarious condition. It is quite evident that the conversion of metal into oxide is not now proceeding so rapidly as formerly; it may even have ceased almost entirely; but the pipes in many cases are not more than one quarter to one-eighth thick of metal, and would be quite unequal to meeting any unusual shock or strain. The large number of 3" "bursts" is due mainly to defects discovered on the original mains laid about 30 years ago, which in many cases now require complete renewal.

35. During the year 954 connections were made, and 519 service pipes were transferred to new mains laid down.

Connection work,

STOCK.

36. The value of the stock on the 1st May 1888 was Rs. 3,11,696-14-10. From the 1st May to the 28th February 1889 Rs. 1,10,811-1-2 of goods were received and Rs. 99,679-9-1 of goods were issued. The valuation on the 1st March 1889 aggregates Rs. 3,38,105-1-9. The profit is Rs. 15,276-10-10. As far as possible, articles which have been in stock for many years are being used up as opportunity offers and in some cases have been transferred to scrap.

REVENUE AND EXPENDITURE.

37. At the time of writing the accounts are not closed, but the revenue will again shew a satisfactory increase whether regarded absolutely or comparatively with the other sources of revenue.

The base of these large annual increases is the general prosperity of the city by which the assessments are increased on existing buildings, and large numbers of new buildings are erected.

The special causes are—

1. The saving of water, formerly going to waste, by which an increasing demand for water is met and converted into revenue.

2. Improved general distribution arrangements.

3. The extension of the distribution mains, by which increased facilities are given to property owners.

The increase of almost 1¾ laks (exclusive of Municipal properties) from Rs. 6,65,370 in 1885-86 to Rs. 8,23,000 in 1888-89, or 25 per cent. in 3 years, is however most exceptional in Water Works experience, and has been obtained without any increase in the charges made either on assessment or through meter.

The ordinary expenditure necessarily grows. Exclusive of the Tansa Instalment for Interest and Sinking Fund, however, it does not grow so quickly as the Revenue. The exact comparison can only be made when the accounts for the year are closed. About 1¼ laks have been expended on new works out of current revenue in the year under report.

NEW WORKS.

38. In addition to the subsidiary works connected with the introduction of the Tansa supply and the stoppage of the leakage of the service reservoirs, there remain for consideration the questions of additional filtration both of the Vehar and Tulsi waters, the completion of the roofing of Bhandarwada Reservoir, a road from Vehar to

Tulsi, and the provision of 9″ or 12″ mains at suitable distances apart throughout the city so as to bring within reach of any property one or more water mains fully equal to yielding a sufficient supply of water for fires either for the supply of the engines or for use from the fire hydrants direct. The benefit of such mains is amply proved at every fire where they are now within available distance. These mains will also defer for some years the necessity of extensively renewing the old and corroded 3″ mains, by which alone large portions of the native city are supplied.

Table No. 1.

Rainfall and Levels of Water in Vehar Lake, January to December 1888. Area of Lake at 262·50 T.H.D. 1,400 acres. Gathering ground above Lake 2,500 acres. (Recalculated from Topographical Survey Sheets.)

B.—WATER WORKS.

2—Tansa Works.

(1) *Works at Tansa.*

Good progress was made with the dam works during the year. Owing to the approach of the monsoon, masonry work was suspended in the beginning of June, and it was resumed again early in October. In each of the last three months of the year (January, February and March), the outturn of masonry was about 400,000 c. ft.

The total quantity of masonry which had been executed at the commencement of the year was 2,133,683 c. ft., and at the close of the year it was 4,405,875 c. ft., making the outturn for the year of 2,272,192 c. ft., which is 50 per cent. in excess of the outturn of the previous year. The excavations for foundations still continue to give trouble at certain places. Some considerable faults have been met with, and, as has been mentioned in last year's report, there will be excesses on the estimate on this account. The accompanying statement, Appendix **A**, shows the progress made on the dam works from the commencement of the work to the end of the year. At the close of the monsoon the water in the lake stood at R. L. 342, which gives a depth of 52 feet of water at the face of the dam in the bed of the river. At the end of the year the greater part of the dam across the river bed had been raised to R. L. 364. The rainfall of the year was gauged at the dam site and gave a total of 89·29 inches. The average of the last four years, as gauged in the Tansa Valley, was 104·82 inches. Flood-waters in the monsoon have hitherto been passed directly from the lake into the river over the portion of the dam across the river bed. With the increasing height of the dam the action of a large body of water falling directly over it into the river bed might possibly injuriously effect the foundations at the toe of the dam. It has been deemed expedient not to subject the foundations to such a trial, and arrangements are being carried out to pass the greater portion of the flood waters, in next monsoon, over a low part of the dam near the conical hill and to bring it back to the river by an excavated channel. When the water in the lake is impounded to R. L. 380, the flood water will pass off by the south end of the dam at the place selected for the waste weir portion of the dam.

(2) *Duct Works.*

The progress made during the year with the duct works has been fair, and shows a marked improvement on previous progress. At the commencement of the year works to the value of Rs. 49,00,000 had been executed, and at the end of the year the value of work done was Rs. 16,40,000, making the value of work done during the year Rs. 11,50,000. With the exception of the Tunnels and Bassein Creek bridges, work was practically suspended during the monsoon.

Compressed air machinery was at work at both faces of No. 2 tunnel, also at both faces of No. 7, and at the close of the year a set of machinery had been put to work at the north face of tunnel No. 4. The total length of tunnelling executed during the year was 4,800 c. ft. Bassein Creek bridges, Nos. 1 and 3, each consisting of four spans, have been completed. The cylinders of the abutments and piers of bridge No. 2, consisting of 15 spans, have all been sunk to full depth, with the exception of piers Nos. 5 and 6, and eight spans of the superstructure have been placed in position.

Four miles of the 48" main on siphon track No. 6 have been laid and jointed.

The accompanying statement, Appendix **B**, shows the progress made on the Duct Works from the commencement of the works to the end of the year.

(3) *Cast-iron Pipes.*

The reports of the Testing Officer show that 35,000 tons have been tested and passed at home up to the end of the year. Of these, 30,000 tons have been delivered on the works. The accompanying statement, Appendix **C**, shows the progress made as compared with the whole pipe contract.

(4) *Land Acquisition.*

The greater part of the land required for the Lake and Duct has been acquired. In the Island of Salsette some of the properties which were referred to in last year's report have not yet been settled for.

(5) *Surveys.*

Surveys were in progress from Ghat Kopar to Bombay with a view to determine the best line to adopt for the pipes from the end of the duct at Ghat-Kopar.

(6) *Health.*

There was a serious outbreak of cholera of a virulent type in the beginning of April at Atgaon, which is the railway station for Tansa, and between which and the dam works there is a very large traffic in materials, principally lime. The traffic was promptly stopped, and fortunately the cholera did not spread in an epidemic form to the dam works. Still the outbreak did, to some extent, cause a panic on the works. A number of people left, and it no doubt interfered with the progress to a small extent. There has been a good deal of sickness, principally malarious fever, in the whole of the districts in which the works are situated.

The Municipal staff has suffered to some extent, but the increase in the strength of the subordinate staff which was sanctioned prevented inconvenience arising from the temporary absences through illness of members of the staff.

APPENDIX A.

STATEMENT showing Work done on the Tansa Dam to end of March 1889.

„ V.	6,600	.....	6,600	
Total Road Watering...Rs.	98,407	80,590	12,817	

To facilitate the work of removing liquid road scrapings, 9 carts were made in the Municipal Workshops at a cost of Rs. 1,338.

(*c*).—PAVING FOOTPATHS.

A sum of Rs. 50,000 was provided for in the Budget Estimates for 1888-89 for this work.

Mr. Behramji Jehangir's tender, amounting to Rs. 48,542-8-0, being the lowest of the 8 tenders received on the 11th July 1888, was accepted, under Town Council Resolution No. 3436, dated 25th July 1888.

The contract for the work was executed on the 13th November 1888, and the work commenced immediately after.

The following footpaths were paved with blue stone during the course of the year :—

	Sq. ft.
Hornby Road from Cathedral High School to Ravelin Street ...	38,550
Church Gate Street in front of Post Office between Mayo Road and Church Gate Station	17,429
Apollo Street in front of the Sailors' Home.....	9,350
Esplanade Road in front of Elphinstone College	10,116
Grant Road from Bhendy Bazar to Duncan Road	8,113
Duncan Road	18,853
Total...	102,411

The total amount expended on this work was Rs. 42,381.

(*d*).—PURCHASE OF STEAM-ROLLERS.

The total area of road-way rolled by steam-rollers above was 1,812,282 square feet at a total cost of Rs. 8,716, showing a saving of Rs. 2,297 or 26 per cent. in the cost of bullock rolling, which for the same area would have amounted to Rs. 11,003, though the work would have been far less efficiently done.

During the year four new steam-rollers were purchased, one of 12½ tons and three of 8 tons, at a cost of Rs. 25,304-13-2.

(e).—NEW ROADS AND IMPROVEMENTS.

(1)—*Mahalakshimi Cross Road.*

A sum of Rs. 23,000 having been sanctioned by the Corporation, under Resolution No. 2706 of 26th March 1888, for the construction of a road from Clerk Road to Haines Road on the west side of the Mahalakshmi Railway Station, a contract and specification were prepared and tenders were advertised for on the 29th September 1888.

Of the six tenders received on the 10th October 1888, that of Mr. Bhomaji Shivaji, amounting to Rs. 21,935, being the lowest, was accepted by the Standing Committee, under Resolution No. 5016 of 24th of October 1888.

The contract was executed through the Municipal Solicitors on the 1st February 1889, and the work was commenced on the 15th idem.

(2)—*Road through Navroji Hill from Elphinstone Bridge to Dongri Street.*

The subject of the construction of this road has been under consideration since 1885. In that year the Town Council sanctioned, under their Resolution No. 60, dated 15th April 1885, the purchase of the property of Mr. Sher Mohomed Pirbhoy, in Dongri Street, for the sum of Rs. 25,500. Of this amount Rs. 8,906 for 122 square yards of set-back ground was paid out of the ordinary Street Improvement grant, and Rs. 16,594 was debited to a special grant for road improvements pending the sanction of the Corporation to the construction of the road.

Mr. Jalbhoy Ardeshir Sett expressed his willingness to let the Municipality have for the new road so much land as belonged to him on the following terms :—

(*a*). A sum of Rs. 90,000 to be paid to Mr. Jalbhoy for land required for a road 60 ft. wide.

(*b*). Levels and gradients of the road to be determined by the Municipality.

(*c*). All the rock excavated, including that in the extra width necessary to give proper slopes to the cutting, to be the property of the Municipality.

(*d*). The Municipality to pay for all buildings standing within the 60-foot strip.

(*e*). The Municipality and Mr. Jalbhoy to bear equally the cost of making a branch road on the eastern face of the hill.

It was subsequently considered desirable to increase the width of the road to 80 ft.

A sum of Rs. 2,63,875 for the road was included in Statement C appended to the Budget Estimates for 1888-89.

The Corporation sanctioned this amount by Resolution No. 2707, dated 26th May 1888, subject to the sanction of Government to the raising of the necessary loan, and at the same time referred the matter

back to the Town Council for revised estimates to include the cost of frontage land on both sides so far as might be considered desirable.

The proposal to acquire additional land for frontages resulted in Mr. Jalbhoy withdrawing his former offer and necessitated the preparation of entirely new estimates.

Revised estimates, amounting to Rs. 4,51,589, were submitted to the Commissioner in August 1888, of which the following are the details :—

Description.	Amount.	Total.
	Rs.	Rs.
1.—*Main Road.*		
(a) Construction of an 80-foot road, including 10 per cent. contingencies	43,177	
(b) Cost of building at 1½ anna per c. ft., including 10 per cent. contingencies	1,17,968	
(c) Cost of land to be acquired at Rs. 14 per square yard, including 10 per cent. contingencies ...	57,180	
(d) Cost of land to be acquired at Rs. 10 per square yard, including 10 per cent. contingencies ...	29,337	2,52,662
2.—*Sewerage and Drainage.*		
(a) Cost of sewerage works, including 15 per cent. contingencies	4,040	
(b) Cost of surface drainage works, including 15 per cent. contingencies...	7,165	11,205
3.—*Cross Road for approach to Navroji Hill and Sett Lodge.*		
(a) Construction of a 20-foot cross road, including 15 per cent. contingencies	1,210	
(b) Cost of building at 2 annas per c. ft., including 10 per cent. contingencies	2,345	
(c) Cost of land at Rs. 14 per square yard, including 10 per cent, contingencies	7,531	11,086
4.—*Ground for new frontages.*		
(a) Cost of extra houses for formation of new frontages at 2 annas per c. ft., including 10 per cent. contingencies	61,334	
(b) Cost of extra land for new frontages at Rs. 14 per square yard, including 10 per cent. contingencies	42,581	
(c) Cost of extra land for new frontages at Rs. 10 per square yard, including 10 per cent. contingencies	72,721	1,76,636
Grand Total ...	.....	4,51,589

Two other estimates, taking the value of the land at Rs. 20 and Rs. 25 respectively, were subsequently prepared, and they amounted to Rs. 5,99,629 and Rs. 6,88,976.

The raising of the necessary loan having been sanctioned by Government Resolution No. 4138 of 24th November 1888, General Department, and all efforts to obtain the necessary land from the owners on reasonable terms having failed, it has recently been decided to acquire the whole of the land under the Land Acquisition Act.

(3)—*Overbridge at Falkland Road.*

When the B. B. & C. I. Railway Company extended their line across the Foras Road in 1862, they were allowed to cross Falkland Road at the present level on condition that they would build an overbridge whenever called upon by the Commissioner so to do.

Designs prepared by the Railway Company were approved by the Municipality, and finally adopted by Government, under No. 1770 of 1st August 1865, Railway Department, with the following modifications and directions:—

"That the standard width of way should not be departed from, "and that the low level roads should be 20 feet wide and not 13 feet. "The Consulting Engineer, in communication with the Agent, should "be requested to have the work carried out with no more delay than "is absolutely necessary."

Notwithstanding these precise directions of Government, the work has not yet been executed.

On the 2nd April 1887 two memorials were addressed to the Municipal Commissioner and to the Agent, B. B. & C. I. Railway, by Sir Jamsetjee Jejeebhoy, Bart., and others, requesting that the existing level-crossing and foot-bridge might be replaced by an overbridge for general traffic.

The Agent of the Railway Company referred the matter to the Consulting Engineer to Government, with the following minute:—

"The Government will not, I trust, press, until further necessity "arises, the construction of the Falkland Road overbridge, which the "Company has years ago recognized its liability to construct when the "expansion of traffic really demanded it.

"The width of the bridge asked for by the Municipal Commissioner "is, however, more than the Company can recognize as reasonable, and "further there are these points for consideration.

"It is hoped that by provision of more siding room at Colaba the "amount of shunting over the level crossing may be reduced and the "obstruction to road traffic much diminished.

"The main thoroughfares of 20 years ago were Grant Road and "Bellasis Road, and these were bridged.

"These bridges still suffice for the ordinary traffic and the Falkland "Road bridge is needed for a small community only.

"The Falkland Road is no doubt much used at present—

"1*st*, because it is a crossing on the level and not an overbridge to the "ascents and descents of which the Bombay wheeled vehicles much "object;

"2*nd*, because the Bellasis Road bridge is avoided on account of its "occupation for a great portion of the day by the Municipal dust-carts "conveying unsavoury refuse from the City to the Flats, a process "which must soon be stopped.

"When this unsavoury traffic ceases, as it will soon do, and the "Bellasis Road bridge is freed for ordinary traffic and the north and "south roads of the City are developed, the diagonal traffic which is "now forced upon all vehicles will be much reduced. For instance, as "soon as Gilder Street is prolonged north to meet Arthur Road, the "dust-cart traffic could be cleared off the Bellasis Bridge.

"And then such of the Falkland Road traffic as will voluntarily use "an overbridge could by a detour of about 300 yards reach the Tardeo "circus *via* the Bellasis Road bridge, and the construction of the over-"bridge postponed until the finance of India are in a more prosperous "condition."

In 1865 the width of Falkland Road was 60 feet, and Government subsequently acquired land to a width of 12 feet on the north side and 20 feet on the south side of the road to make up a total width of 92 feet.

Several plans have been prepared, but there being a difference of opinion between Government and the Railway Company on the one hand, and the Municipality on the other, as to the width of the overbridge and the low level roads, the matter remains for the present unsettled, though negotiations are continued.

4.—TRANSFER OF PORT TRUST ROADS.

The following eight roads in A Ward were taken charge of by the Municipality from the Bombay Port Trust :—

	Names of Roads.	Square yards.
1.	Fort Street	4,772·44
2.	Goa do.	2,543·33
3.	Karwar do.	1,973·33
4.	Kumta do.	1,266·66
5.	Mangalore do.	900·00
6.	Kalikat do.	1,823·33
7.	Kochin do.	1,833·33
8.	Balard Road	2,244·44
	Total ...	17,356·86

In B Ward the following five roads were taken charge of from the Bombay Port Trust :—

Names of Roads.	Square yards.
1. Kurla Street	1,091
2. Musjid Bunder Bridge	813
3. Surat Street	542
4. Broach Street	813
5. Dock Road	5,510
	8,769

5.—ROAD IMPROVEMENTS.

Road improvements or set-backs to the extent of 2,816·16 square yards were effected in the following roads in D Ward :—

1. Walkeshwar Road.
2. Falkland Road.
3. Tardeo and Arthur Road (junction).
4. Tardeo Road.
5. Ridge.
6. Mahalakshmi Road.
7. Thakurdwar Road.

In E Ward extensive road improvements were carried out at the junction of Sevri and Ghorupdeo Roads and at the junction of Parel- and Chinchpokli Roads. The former is 1,263 square yards and the latter 708 square yards in area.

In F Ward a portion of Arthur Road from the Chinchpokly level crossing to Parel Chal Road was widened from 30 to 60 feet.

In G Ward a road from the Mahalakshmi Station to Haines Road was taken over from the B. B. & C. I. Railway Company in exchange for certain Municipal land. It is 469 feet long and 29 feet 6 inches in average breadth.

6.—LANDSLIP AT GIBBS ROAD AND THE CONSTRUCTION OF RETAINING WALL.

It was stated in last year's report that the construction of a permanent retaining wall at Gibbs Road would be carried out after the rains of 1888, and it was so carried out departmentally under the supervision of Inspector Mr. Baker. The work was commenced on the 3rd November 1888, and completed on the 31st March 1889.

The accounts of the work have not yet been adjusted.

7.—LANDSLIP AT WALKESHWAR ROAD AND CONSTRUCTION OF RETAINING WALL.

The construction of a culvert and retaining wall at Walkeshwar Road was completed last year under the supervision of Inspector Mr. Powell, since deceased. It having been considered necessary to extend the wall, a sum of Rs. 4,150 was provided in the Budget Estimate for 1889-90.

The work is to be carried out departmentally immediately after the rains of this year.

8.—TRAMWAY.

There was no extension of the Tramway during the year under report.

Lighting.

The gas lighting of the streets was as satisfactory as in previous years. The gas was supplied free from sulphur and other impurities, and its illuminating power was maintained above 12 sperm candles. The pressure required by the contract was also maintained.

The Police frequently complained of the insufficiency of the hours of lighting, though no change whatever was made in the system followed without complaint for a number of years.

The lighting hours cannot be increased without an additional expenditure, and this subject is under consideration.

The contract entered into with the Bombay Gas Company on the 13th August 1875 for lighting the public streets and for supplying gas generally to the Municipality for 14 years from 1st July 1876 will expire on the 30th June 1890.

Proposals for improving the lighting of the City generally have been submitted.

It is desirable that special lamps of greater power than the ordinary street lamps should be introduced in the most important parts of the City, particularly in places where several roads meet.

The Corporation having sanctioned, under their No. 5039, dated 25th October 1888, a sum of Rs. 3,240 to meet the cost of new lamps at the Wellington Fountain, a design for the same has just been approved and orders given to proceed with the work.

The present distance between street lamps varies considerably. To regulate the distances at which street lamps should be fixed, it is necessary to classify all the streets according to their importance and to prescribe a certain distance apart for each class.

References having been received from several firms regarding the lighting hours, number of lamps, &c., the required particulars have been furnished to them to enable them to tender for the street lighting, whether by gas or electricity, after the expiration of the present gas contract.

The number of lamps in use at the end of the year was as follows :—

Gas Lamps	3,371
Kerosine Oil Lamps	1,337

The following places have been newly lighted during the year :—

With Gas.	*No. of lamps.*
Mahalakshmi Road	1
Prince's Dock	37
Mayo Road	2
Govalia Tank Road	1
Fanaswadi...	1
Memonvada Street	1
Agiari Street, Fort	1
Cruickshank Road	2
Total ...	46

With Kerosine Oil Lamps.

Sankli Street	15
Mayo Road...	4
Sleater Road	6
Matharpakhadi Cross Lane	2
Colaba Roads	35
Thomas Street, Lower Colaba	3
Total ...	65

D.—REGULATION OF STREETS AND BUILDINGS.

THE number of applications for permission, to either build or rebuild during the year under report, amounted to 1,172. Out of these 1,162 were passed, and the remaining 10 were rejected on sanitary or other grounds.

The undermentioned notices, 2,985 in number, were served on house-owners under various sections of the Municipal Act, regarding removal of inflammable materials, building contrary to Municipal requirements, making projections over streets, &c., &c.

Section of the old Act.	Sections of the new Act.	Particulars.	Number of Notices.
164	349	To remove inflammable materials in external walls and roof coverings	499
165-167	351	To submit plans	446
167	257	To remove buildings erected contrary to provisions of the Act	100
182	353	To remove privies built without permission	54
192	311	To remove or alter doors or windows opening over the public road	119
193	...	To remove old doors do. do.	4
194	...	To provide rain-water troughs and pipes	165
195	309	To remove old projections	188
196	308	To remove new projections	365
200	354	To pull down ruinous houses	81
206	383	To cut and trim trees	18
208	315	To removing temporary projections or obstructions	188
212	329	To fence or enclosing wells, tanks and dangerous places	7
285	488	Of intention to enter houses after 24 hours	735
...	299	Of intention to take possession of land outside buildings for street improvement	16
		Total	2,985

On failure of house-owners to comply with notices, proceedings were taken against them in the Police Courts.

The number of summonses issued for different offences committed under the Act was 555. In 344 of these cases the parties complied with the Municipal requirements before service or return of the summonses, and convictions were obtained in the remaining 211 cases.

In 166 of the convictions obtained, the parties were simply warned and discharged by the Magistrates on account of their having carried out the Municipal requirements immediately after service of the summonses.

In the remaining 45 cases, fines were inflicted, amounting in all to Rs. 272-14-0.

The following statement shows the different sections of the Act under which offenders were prosecuted and other details of the prosecutions :—

Wards.	Number of Sections.	Number of Summonses issued.	Complied with before service of Summonses	Convicted.	Warned and discharged.	No. of Persons fined.	No. of Cases dismissed by the Magistrates.	Amount of Fines.

(*a*)—STATION AT GOWALIA TANK ROAD.

Contractor—Ghomaji Balaji.

The work which was commenced on the 3rd November 1887 was completed on 9th May 1888 at a cost of Rs. 5,571-9-9, effecting a saving of Rs. 972-6-3 on the sanctioned grant of Rs. 6,544.

A few extra works to the value of Rs. 558-8-6, sanctioned out of the savings, were carried out departmentally, the contractors having declined to undertake them.

The quantities and cost of the work done by the contractors is given in the following statement :—

(*b*)—Station at Paidhoni.

In consequence of the transfer to the Fire Brigade of the four European Officers who had previously worked both as Fire Brigade Officers and Police Officers, it was found necessary to provide additional quarters. With this object the Town Council sanctioned, by Resolution No. 643, dated 22nd June 1887, a sum of Rs. 3,800 only (an approximate amount), for constructing quarters and stables on the site of the Fire Brigade stable in Kolsa Street, Paidhoni.

When a simple and unornamental design had been prepared, it was found, however, that an additional grant would be required, and the execution of the work departmentally was sanctioned in October 1888 at an estimated cost of Rs. 4,695.

The building has been roofed in, but the final completion has been deferred pending the consideration of some proposed alterations.

(*c*)—Station at the Junction of Chinchpokli Road and Parel Road.

Contractor—Mr. Ardesir Framji.

The establishment of a Fire Brigade Station in this locality having been urged as a pressing necessity owing to the rapid increase of the number of Cotton Mills, an estimate, amounting to Rs. 16,701, was submitted.

The site in the angle between the Parel and Chinchpokli Roads having been finally fixed upon in March 1888, the owner of the land, Mr. Munji Khetsi, was requested to state the terms on which he would dispose of the plot, containing 2,157 square yards, required by the Municipality.

Mr. Munji, however, failed to reply to the communications addressed to him, and consequently the ground required, *viz.*, 1,449 square yards for the Fire Brigade Station and 708 square yards for widening the roadway, was acquired under the Land Acquisition Act, as directed by Government Resolution No. 4387, dated 3rd July 1888, Revenue Department.

Possession of the ground was taken on the 26th September 1888, and revised estimates, amounting to Rs. 20,787, arrived at as follows, were submitted in October :—

	Rs.
Engineers' quarters	5,157
Two cook-rooms	771
Engine-house	1,800
Stable for two horses	1,100
Quarters for fourteen Lascars	7,952
Dwarf wall and cast-iron railing	1,296
Contingencies (15 per cent.)	2,711
Total ... ..Rs.	20 787

Tenders were advertised for on the 30th January 1889, and of the three tenders received on the 14th February 1889, that of Mr. Ardeshir Framji, amounting to Rs. 27,165, was the lowest, though higher than the office estimate by Rs. 6,377. The tender was reduced to Rs. 23,099, including 15 per cent. for contingencies, by eliminating the item of fencing, and was accepted by the Standing Committee, under Resolution No. 7065, dated 6th March 1889.

The contract was executed on the 16th April 1889, but the contractor had been allowed to commence the work on the 26th March with a view to its being completed on the earliest possible date.

(*d*)—STATION AT SANKLI STREET, BYCULLA.

The rooms in the Byculla Police quarters occupied by the Fire Brigade people being required for Police purposes, the Commissioner of Police requested that separate quarters might be provided for them.

It was originally intended to erect the necessary quarters in the compound of the Byculla Police Station, but this proposal was set aside on sanitary and other grounds, and it has been decided to erect the buildings at Sankli Street.

The estimated cost of constructing the quarters is Rs. 23,906, arrived at as follows :—

	Rs.
European Engineers' quarters	5,157
Two cook-rooms	771
Engine-house	1,800
Stable	1,100
Quarters for twenty Laskars	11,360
Two privies	600
Contingencies (15 per cent.)	3,118
Total .....Rs.	23,906

(*e*)—STATION AT MAZAGON.

The necessity of establishing a Fire Brigade Station at this place having been urged by the Police, owing to the location of numerous warehouses containing inflammable materials of all kinds, sites have been suggested and plans submitted for approval.

(*f*)—STATION AT MUSJID BRIDGE.

It having been proposed to construct a Fire Brigade Station and a Ward Office at Musjid Bridge, application was made to Government for the purchase of Government ground admeasuring 489 square yards at Rs. 20 per square yard, and possession was taken on the 7th September 1888.

Two alternative designs and estimates (A and B), amounting respectively to Rs. 28,939 and Rs. 37,462, arrived at as follows, have been submitted :—

	Estimate A.	Estimate B.
	Rs.	Rs.
Quarters for 12 Laskars and Ward Office	16,037	22,240
Engine-house	2,119	2,119
Stables	1,123	1,123
Privies (four)	1,200	1,200
Government Land at Rs. 20 per square yard (A—423 square yards ; B—539 square yards)	8,460	10,780
Total... ... Rs.	28,939	37,462

(*g*)—Station in Fort or Middle Colaba (A Ward).

Two sites—one opposite the Municipal Workshops and the other near the proposed Market at Colaba—were selected in conjunction with the Commissioner of Police. Several other sites have been suggested, namely, (*a*) the triangular piece of land at the back of the Ordnance Bungalows (south of the Arthur Crawford Markets) between Hornby Road and Paltan Road; (*b*) Col. Stockley's house and land at Colaba ; (*c*) vacant land at the junction of Waudby Road and Cruickshank Road between the Gaiety Theatre and the site for the Municipal Offices ; and (*d*) vacant land at Colaba Causeway, south of the "Young Men's Christian Association" premises. The question of a site is still under consideration.

It was at one time intended to provide temporary buildings, but the proposal was abandoned on the ground of economy.

(*h*)—Supply of Fire Engines and Stores.

A contract for the supply of two fire engines and another for the supply of Fire Brigade stores were entered into with Messrs. John Fleming & Co., whose tenders, amounting respectively to Rs. 18,356 and Rs. 7,767, were the lowest of those received on the 28th of May 1888, and had been accepted under Town Council Resolution Nos. 2190 and 2191, dated 20th June 1888.

The engines and stores were duly received.

The details of the stores are as follows :—

Quantity.	Particulars.	Amount. Rs. a. p.
103 Lengths	Patent stout tanned canvas India-rubber lined delivery hose, 2½" bore in 60 feet lengths, without couplings	5,310 0 0
144 Nos.	Vulcanized India-rubber suction and delivery valves.	72 0 0
8 Lengths	Hose suction of vulcanized India-rubber canvas, interlaid with gun metal couplings, in 13 feet lengths	1,224 0 0
12 Nos.	Boiler tube brushes...	24 0 0
2 cwt.	Copper rivets and washers trained	224 0 0
4 Doz.	Leather fire buckets	560 0 0
56 lbs.	Copper wire for binding couplings	35 0 0
2 sets.	Salvage brake harness, brass mounted, for pair in hand, complete	318 0 0
	Total... Rs.	7,767 0 0

(1)—Arthur Crawford Markets.

(*a*)—*Extension.*

The subject of the extension of these Markets has been under consideration since the latter part of 1887.

Plans and estimates for the erection of a Mutton Market of 104 stalls and for the conversion of the existing Mutton and Fish Market into a market for fish only having been prepared, the sum of Rs. 49,942, which was included in Statement B appended to the Budget Estimates for 1888-89, was sanctioned by the Corporation under Resolution No. 2702, dated 26th March 1888, subject to the sanction of Government to the raising of the necessary loan.

A contract form and specification was printed and tenders were advertised for on the 20th December 1888. Messrs. Littlewood, Pallonji & Co.'s tender, amounting to Rs. 44,427, was the lowest of the three received on the 17th January 1889, and the acceptance of it was recommended.

(b)—Reinstatement of Godowns Destroyed by Fire.

Contractors—Messrs. Littlewood & Pallonji.

Tenders for the reinstatement of the godowns were advertised for on the 9th April 1888. Of the three tenders received that of Messrs. Littlewood & Pallonji, amounting to Rs. 28,540, being the lowest, was accepted under the Town Council Resolution No. 635, dated 25th April 1888.

The work was carried out with commendable energy, and was completed on the 24th November 1888.

The following statement gives the quantities and cost of the work done by the contractors :—

Quantities.	Particulars.	Rate.	Per	Amount.
		Rs. a. p.		Rs. a. p.

26 No.	Wooden steps repaired and renewed.			
	Total...Rs.	.....	...	28,159 1 10

(c)—Measures to Guard against Fire.

To guard against fire in the future, estimates were prepared for putting up below the roof of the market water tanks similar to those provided at the Victoria Terminus. Enquiries also were made of Mr. John B. K. Macbeth, Agent for the "Grinnell" Automatic Sprinklers, and he estimated that a complete installation for the markets would cost Rs. 5,300. The question is still under consideration.

(d)—Alterations of Stalls.

Forty-five stalls in the beef market were altered at a cost of Rs. 35 each and an additional bench was made at a cost of Rs. 50.

(e)—Marble Slabs to Fish Stalls.

Dr. Blaney having strongly urged the desirability of marble slabs to the fish stalls, the Corporation, under Resolution No. 103, dated 12th April 1888, requested the Town Council to furnish an estimate for providing marble for a few stalls in the market as a trial.

On the receipt of the requisite estimate the Corporation sanctioned, by Resolution No. 3807, dated 9th August 1888, an outlay of Rs. 825 from Surplus Cash Balance.

Slabs of the dimensions required were, however, not procurable in Bombay, and special arrangements had to be made with Messrs. Muraglia and Company for obtaining them from Europe. They have now been received, and the work will be completed as early as practicable.

(f)—Roads and Footpaths in the Market Compound.

At the request of the Superintendent of Markets, estimates were prepared for paving the footways from the vegetable market to the fish and mutton markets and for repairing the roads and passages within the compound.

In accordance with the Commissioner's directions a sum of Rs. 1,800 for the works has been included in the estimates for Annual Repairs for 1889-90.

(g)—Chal for Bigaries.

In order to secure more efficient control over the Crawford Market Bigaries and to make them available for any emergent work, it has been considered desirable to provide quarters for them in as close proximity to the Market as possible.

The Corporation accordingly sanctioned for the purpose, by their Resolution No. 649, dated 25th April 1888, a sum of Rs. 22,700 to the debit of Loan charges (Rs. 16,000) for land and Rs. 6,700 for buildings.

Several sites have been suggested, but as no suitable one can yet be obtained on favourable terms, the question is still under consideration.

(2.)—Bhuleshwar Market.

The necessity of an extension of this Market has long since been recognized, and the Corporation (under their No. 1601, dated 21st November 1887), requested the Town Council to make provision for increasing the existing accommodation consisting of 123 stalls.

It was proposed to increase the number of stalls by 100, and three projects were submitted to the Commissioner in May 1888. The estimated cost of each project is given in the following summary :—

Summary.

Name of Project.	Area to be added to Street (square yards.)	Area to be added to Market (square yards.)	Total area of ground to be taken up (square yards.)	Rate per square yard of ground to be taken up (square yards.)	Cost of ground to be added to Street.	Cost of ground to be added to Market.	Cost of new buildings.	Total Outlay.	Net Outlay for the extension of Market.	No. of new Stall to be obtained.	Cost per new Stall.
					Rs.	Rs.	Rs.	Rs.	Rs.		Rs.
Project A	126	742	868	129	16,276	95,846	49,519	1,61,641	1,45,365	102	1,425
Do. B	48	838	886	72	3,469	60,569	34,949	98,987	95,518	100	955
Do. C	53	1,690	1,743	85	1,838	58,615	53,827	1,14,280	1,12,442	156	721

Project C had been put forward by Mr. K. M. Shroff and was the cheapest of all, but its cheapness arose from the inferiority of the locality and condemned it as wanting in the most important element required to secure the success of the Market. It had also the most serious disadvantage of being only a distant accessory to the present Market, and it is scarcely necessary to point out how unadvisable it would be to have a market split up into two disconnected parts, in fact two markets in one district, not far enough from one another to serve separate localities and too far from one another to be considered as one market.

Project A was recommended, as it allowed an addition of 102 stalls and afforded an opportunity to effect a very much needed widening of Bhuleshwar Road.

The Town Council having recommended the Corporation to sanction the extension, the Corporation passed a Resolution, No. 2797, dated 9th July 1888, in approval of Project A.

Efforts to obtain the requisite land and premises at reasonable rates having failed, the Standing Committee, under their No. 4306, dated 19th September 1888, authorised the Commissioner to apply to Government, under the provisions of Section 91 of the City of Bombay Municipal Act, 1888, to declare that the land and buildings on the site of the proposed extension were required for a public purpose.

The necessary application was made to Government in October 1888, and the declaration appeared in the *Government Gazette*, dated the 29th November 1888.

The Collector has not yet given his award under the Land Acquisition Act.

(3.)—Extension of the Erskine Road (Nal Bazar) Market.

The foundations and the paving were completed departmentally under the supervision of Inspector Mr. Baker, and fair progress was made, in the superstructure, by the Superintendent, Municipal Workshops.

The accounts will be adjusted during the current year, and will form a subject for the next annual report.

The question of compensation to Mr. Chabildas Lallubhoy for the ground taken from him by the Municipality through the Collector of Bombay under the Land Acquisition Act was finally settled.

The matter was, on the 28th January 1888, referred by the Collector to the High Court, and on the 29th of January 1889, a sum of Rs. 1,93,000 was awarded to Mr. Chabildas, together with interest at 6 per cent. per annum from the 24th February 1888. It was at the same time decided that each party should bear his own costs of, and incidental to, the reference.

(4.)—Foras Road Market.

Several petitions were received from residents of Grant Road, New Foras Road, Falkland Road, Ripon Road, Clare Road, Haines Road, Bellasis Road, Gilder Street and Kamatipura, praying that a market might be provided in the neighbourhood, and suggesting two sites in Foras Road for the purpose.

An estimate of the cost of the work was included in the Budget Estimates for 1889-90 (new works), but the item was struck out by the Standing Committee at a meeting held on the 7th December 1888.

A revised estimate will be submitted for incorporation in the Budget Estimates for 1890-91.

(5.)—Colaba Market.

The question of erecting a market in Lower Colaba has been under consideration for a very long period. The Town Council called for estimates on the 16th March 1887.

A site partly belonging to Government and partly to the Oriental Spinning and Weaving Company has been selected. Government have sanctioned, by Resolution No. 477 C. W. 1496 of the 3rd September 1888, the sale to the Municipality of the Government plot containing about 1,290 square yards at Rs. 15 per square yard, but the Agents of the Oriental Spinning and Weaving Company have demanded Rs. 50 per square yard for their plot admeasuring 783 square yards. The latter will, therefore, have to be acquired under the Land Acquisition Act.

The Corporation, on the 26th March 1888, sanctioned, subject to the approval of Government, the raising of a loan of Rs. 50,300 for constructing a market of 100 stalls.

MISCELLANEOUS WORKS, &c.

(2.)—Vaccination Depot and Stables at Hornby Road.

The present hired stables being unsanitary, the necessity of providing proper stables and quarters for the Vaccination staff has been urged for a long time past. An estimate framed by the Public Works Department for constructing the requisite buildings came to Rs. 65,000, but as there was no probability of such a large outlay being sanctioned by the Corporation a cheaper design estimated to cost Rs. 40,000 was prepared in this office, a sum of Rs. 25,000 was provided in the Budget Estimates for 1888-89 in addition to Rs. 15,000 already sanctioned to make up the total required.

The Corporation, however, objected to pass even the sum of Rs. 25,000, on the ground (*a*) that the scheme was too costly and (*b*) that the Corporation had not been previously called upon to provide quarters for the Superintendent. The subject was referred back to the Town Council.

The Sanitary Commissioner strongly recommended that quarters for the Superintendent should be provided, and stated that it was of the highest importance that the Suprintendent should reside in the premises, not only to supervise the management and care of the calves, but also and chiefly for the purpose of attending to calls for lymph at any time day or night. He considered that the usefulness of the institution would be seriously impaired if the Superintendent were not always to be found on the spot.

A modified design, together with a revised estimate, amounting as shown below to Rs. 25,262, including 10 per cent. for contingencies, was submitted in August 1888.

		Rs.
(*a*)	Main Building	12,337
(*b*)	Servants' quarters...	3,465
(*c*)	Cattle-shed	6,408
(*d*)	Privies	990
(*e*)	Drainage connection for items *a*, *b*, *c*, *d*. ...	1,149
(*f*)	Two bath rooms	110
(*g*)	Water connection...	803
	Totol... Rs.	25,262

The matter is still under consideration.

(3.)—New Ward Office at Dadur.

Mr. Sorabji Dinsha Sopariwalla, whose premises were rented from 1882 for the purpose of a Ward Office (F and G Wards) having notified to the Commissioner that he would increase the rent from September 1887 from Rs. 40 to Rs. 60 per mensem, it became apparent that it was not to the interests of the Municipality to remain at the caprice of a landlord as regards either duration of tenancy or amount of rent.

A sum of Rs. 16,000 was consequently provided in the Budget Estimates for 1888-89, and was sanctioned under Resolution of the Corporation, No. 653, dated 24th May 1888.

On the 26th April 1888 Mr. Sopariwalla, through his Solicitors, Messrs. Payne, Gilbert and Sayani, gave notice that unless the premises were vacated by the 30th idem, he would take steps to eject the Municipal employés therefrom.

Efforts made in the meantime to obtain a suitable property within the sanctioned sum having failed, Mr. Sopariwalla's premises were purchased for Rs. 14,000 as sanctioned by the Town Council Resolution No. 1086, dated 16th May 1888, on condition that the conveyance charges should be borne by the Municipality.

There was, however, a lengthy correspondence between Mr. Sopariwalla's Solicitors on the one hand, and Municipal Solicitors and the Executive Engineer on the other, owing to a difference in area and a dispute as to the ownership of the boundary wall.

The purchase was concluded and the conveyance executed on the 1st December 1888.

(4.)—Extension of the Mahalakshmi Dhobiwada.

The Health Officer having strongly objected to the numerous washing places, established by Dhobis in different parts of the City, and pressed the necessity of extending the Mahalakshmi Dhobiwada, a sum of Rs. 50,000 was provided for such extension in the list of New Works for 1883-84.

Drawings and estimates were prepared for the extension to suit the requirements of the Health Officer, and tenders were advertised for on the 16th October 1886.

Eight tenders were received on the 25th October1886, and that of Mr. Ghamaji Balaji (amounting to Rs. 37,446, including 15 per cent. for contingencies), being the lowest, was accepted under Resolution of the Town Council, No. 1234, dated 24th November 1886. The contract was executed on the 18th December 1886.

The work which had been set out on the 15th December 1886 was commenced on the 4th January 1887. It was, however, stopped on the 27th idem owing to the B. B. & C. I. Railway Company having made a requisition for a portion of the ground on which the extension was to be built, in order to improve the approach to the Mahalakshmi Station. On the 14th February 1889 the contractor claimed Rs. 1,684 as compensation for loss of interest on the deposit money and on account of other disadvantages occasioned by the delay, but the Commissioner compromised the claim by sanction to a payment of Rs. 700 to be made as soon as the work was recommenced.

Work was resumed at the end of April 1889.

(5.)—Stables, Stores, Offices, and Inspectors' Quarters for F and G Wards, Health Department.

The necessity of buildings for the purposes of the Health Department in F and G Wards having been strongly advocated by the Health Officer ever since 1883, a sum of Rs. 23,992 was sanctioned in the Budget Estimates for 1885-86.

The ground required for the purpose, *viz.*, 8,311 square yards, belonging to Mr. D. F. Mirzallo, and 243 square yards owned by Mr. M. D. Thaker, was obtained through the Collector of Bombay under the Land Acquisition Act for Rs. 9,557-10-5 and Rs. 243 respectively.

Detailed drawings were prepared, together with estimates of the work designed, amounting to Rs. 75,431, but they have since been so revised as to reduce the estimated cost to Rs. 57,701. The amount at present available is only Rs. 14,074, and the matter is still under consideration.

(6.)—Purchase of Land at Khetwadi for a Hospital for Epidemic Disease.

The erection of a hospital for epidemic disease is a subject which has been under consideration for a very long time.

Several sites at Chandanwadi, Thakurdwar, Frere Road and Khetwadi having been suggested, one at Khetwadi was at length selected, and a sum of Rs. 67,000 was sanctioned under a Resolution of the Corporation, No. 2540, dated 28th June 1888, for the acquisition of it.

This site had also to be abandoned owing to a strong opposition raised by the residents of Khetwadi against the establishment of a Cholera Hospital (as it was termed) in their neighbourhood.

An offer of Rs. 66,000 for the purchase of a site has been made by a private individual on condition that the Municipality builds a hospital thereon.

The matter is still under consideration.

E.—MUNICIPAL BUILDINGS.

REPAIRS.

The Budget allowance for this work under various headings was Rs. 29,848, while the total sum expended during the year was Rs. 20,364-6-8, leaving a saving of Rs. 9,483-9-4 on the sanctioned grant.

The details of the amounts sanctioned and expended in connection with the different Departments are given in the following statement :—

No.	Particulars of Work.	Budget Grant.	Amount expended.	Difference.
	Engineering Department.	Rs. a. p.	Rs. a. p.	Rs. a. p.
1	Drainage Inspector Chowki		23 8 7

F.—WORKSHOPS.

The value of the work turned out during the year under report amounted to Rs. 1,22,230, that is, Rs. 6,748 more than the produce of the previous year. The gross profit of the shops during the year was Rs. 13,507, but as a sum of Rs. 4,795-3-5, as per following details, was expended on account of repairs to engines, boilers, machinery, tools, &c., and there were besides some losses, the net profit to the credit of the Workshops stands at Rs. 3,164-5-1.

Details above referred to.

Repairs to Workshops machinery	Rs.	1,959	13 5
Making and repairing tools	„	1,090	11 4
Beltings, &c.	„	625	14 5
Cleaning and repairing Workshop engine and boilers	„	806	13 7
Maintenance of Workshops steam pumping engine	„	311	14 8
	Rs...	4,795	3 5

The boilers, engines and machinery generally worked well during the year without any breakdown or stoppage. No tools or machinery of any importance were purchased during the year.

The rolling stock of the Health Department and of the Road Department was kept in a state of proper repair and the necessary greasing was regularly done by the Workshop staff as required.

The Brass Foundry did good work during the year, turning out 49 cwt. 3 qr. 25 lb. 8 oz. of castings, valued at Rs. 3,373-6-0.

The abolition of the Iron Foundry has caused some inconvenience, inasmuch as castings required for the steam-rollers, naves for cart wheels and castings of various kinds for the Love Grove Pumping Station and the Drainage works in progress could not be obtained so promptly or of such uniformly good quality as before.

During the year a new system of adding for supervision, and as a uniform charge of 25 per cent. upon the prime cost of all work done in the Workshops, whether budgetted, estimated for or otherwise, was introduced by the Acting Municipal Commissioner. It came into operation on the 1st of September and will probably prove satisfactory, not only to the Workshops, but also to the departments having work carried out there.

G.—General Remarks.

(1.)—RECORDS AND CORRESPONDENCE, &c.*

There had long been a standing complaint that the clerical work of the Office was always in arrears, and in consequence the Acting Commissioner, in the early part of June 1888, made a personal inspection of the Office and held a consultation on the question.

Being satisfied that the arrears were due, in greater part, though not entirely, to the insufficiency of the staff, the Acting Commissioner, with the sanction of the Town Council, decided that Mr. Madhavrao Moroba, Head Clerk, should retire on pension, and that the pay of the appointment should be reduced from Rs. 200 to Rs. 150 per mensem, an addition of 2 clerks on Rs. 30 and Rs. 20 respectively being provided for by the saving of Rs. 50.

* *Note.*—This is exclusive of all office work relating to Water Works, which has been separately alluded to under that head.

Three additional clerks were at the same time sanctioned for the Water Works Department temporarily in charge of the Deputy Executive Engineer, Water Works.

Mr. Madhavrao, in consideration of his long service, was granted three months' privilege leave from 1st July, and after the expiration of that time he retired from the Municipal service, Mr. Purushottam Pandurang Vagh being, on my recommendation, selected by the Acting Commissioner to succeed Mr. Madhavrao.

All arrears of references, some of very old date, have since been cleared off and papers are now disposed of without serious delay. Mr. Vagh's management of the office has fully borne out the anticipations which had been formed.

The clerical staff, though compelled to work to late hours, is, however, still insufficient to at all times keep full pace with the daily increasing work, and until it is further strengthened several desired improvements cannot be effected.

There were considerable arrears in the records, and though they have, in greater part, been brought up to date with the assistance of the extra establishment specially sanctioned for the purpose, the state of the records, as a whole, cannot yet be said to be thoroughly satisfactory.

The following statement gives, in a comparative form, the numbers of letters and bills received and disposed of during the years 1887-88 and 1888-89 :—

Particulars.	No. in 1887-88.	No. in 1888-89.	Difference between the Nos. in 1887-88 and 1888-89 Columns 2 and 3.	REMARKS.
1	2	3	4	5
CORRESPONDENCE.				
INWARD.				
Drainage	10,197	17,055	6,858	
Roads and Buildings... ...	15,000	18,875	3,875	
General	8,717	5,698	1,981	
OUTWARD.				
Drainage	7,404	15,250	7,846

ACCOUNTS.				
Indents and Bills	5,748	6,642	894	
Total ...	59,222	86,283	27,061	Increase in 1888-89, 27061 equivalent to 46 per cent.

Seeing that the total increase in 1888-89 was 46 per cent. upon the totals of the preceding year, it will probably be conceded that the additions to the clerical staff recommended in my Budget Estimates for 1888-89 were not unreasonable.

The passing of the City of Bombay Municipal Act, 1888, which was published in the Bombay *Government Gazette* of the 14th September 1888 and thereupon immediately became law, very materially affected the Department and increased the work. A completely new set of notices had to be framed for submission to the Municipal Solicitors and numerous consultations had to be held to determine the courses of procedure. It naturally took much time for the staff to become in any measure accustomed to the new methods inaugurated by the Act.

(2.)—CONTRACTS EXECUTED DURING 1888-89.

The following Statement gives particulars of the contracts executed during the year 1888-89 for the supply of Petty Stores &c., and for the construction of various works.

Consecutive Number.	Number of Contract	Particulars of Contract.	Name of Contractors.	Date of execution of Contract.
		For Supplies.

27	C. 688	Construction of pipe sewers and branch pipe drains in Bellasis Road, Foras Road, and Gilder Street.	Messrs. Fakir Mohomad Babanbhai & Co.	1st Feb. 1889.
28	C. 788	Construction of a storm-water drain from Parel Road (at junction of Bellasis Road) to Shepherd Road and of a storm-water drain along a portion of Ripon Road together with water entrances and manholes to both drains.	,, Bhomaji Shivaji & Co. ...	1st Do.
29	C. 2788	Construction of a road on the West side of the Mahalakshmi Railway Station to connect Haines Road with Clerk Road.	,, Ditto ...	1st Do.

(3).—LEASES OF VARIOUS RIGHTS.

The undermentioned rights of (*a*) cutting grass, (*b*) fishing, (*c*) planting singadas, and (*d*) gathering the produce of cocoanut, date and palm trees, were let for the year under report.

In consequence of the damage caused to the banks of the Mahalakshmi Storm-water Reservoir by fishermen, in pulling up the stone pitching, it has been proposed to let the right for 1889-90 subject to the condition that the lessee shall deposit in advance, in addition to the price of the right, the pay of two Police ramosis to be engaged in protecting the reservoir.

Consecutive No.	Description of Right.	Period for which sold.	Sold to	Amount for which sold. Rs. a. p.
	A.—*To cut grass*—			
1	(*a.*) From the sides of the open main drain between Arthur Road and Clerk Road and from the banks of the Storm-water Reservoir at Mahalakshmi.	From January to December 1888.	Ballu Husana	550 0 0

17	(*c.*) Warli Road on Municipal ground at the Love Grove Pumping Station and in the compound of Mr. Varjivandas Madhavdas' Bungalow at Worli.	Do. ...	Hormasji Pallonji	65 0 0

H.—GARDENS.

1. The undermentioned Municipal Gardens have been maintained for public use :—

(*a*) Victoria Gardens.
(*b*) Northbrook Gardens.
(*c*) Falkland Road Garden.
(*d*) Dick's Tank Garden.
(*e*) Elphinstone Circle Garden.
(*f*) Bazar Gate Garden.
(*g*) Sir Kavasji Jehanghir Garden, Mahim.
(*h*) Malabar Hill Reservoir Garden.

2. All the gardens have been extensively frequented by the public, and seem to command general appreciation.

3. The undermentioned additions and improvements have been made in the Victoria Gardens during the year.

(*a*). The ornamental waters have undergone a perfect change of appearance by regulating and modifying the slopes, which before were much too steep and easily damaged. A strip of land, separating the two principal parts of ornamental waters, has been dug out, and as it partly consisted of rock (the reason, it is presumed, why it had been allowed to remain) it was necessary to have recourse to blasting operations. The work was, however, successfully carried out at a cost considerably below the estimate, and a beautiful view has been formed comprising a large expanse of water, bordered by lawns, shrubbery and solitary plants, among which two dwarf bamboos form a very conspicuous object. The island formed in consequence of this work has been tastefully planted with palms, crotons, poinsettias variegated arundos, &c., all calculated to form a most attractive object when seen from the other side of the water, near the main avenue, while the graceful tamarisk planted near the edge of the water will no doubt enhance the beauty of the view, when old enough to droop their heathern-like branches, clad with pink flowers in the reflecting sheet of water. The formerly existing island has been given a more natural appearance by studding the hitherto rampart-like grass-clad slopes with selected trees and shrubs, and, by here and there, with the aid of rubble and clinkers, forming irregular mounds and hillocks, the object of which is to justify the presence of the island, on account of a supposed rocky formation.

(*b*). The north-western portion of the gardens, which was formerly occupied by a very unsuccessful maze, by quarters of rose-

beds watered by irrigation and traversed by several straight roads, was entirely transformed. It now presents a very attractive appearance, consisting as it does of large lawns bordered by irregular plantations of trees and shrubs and traversed by gently winding paths. The object of the plan for transforming this part of the garden is to shape an attractive and varied large view through the whole of the garden and facing the Museum, of which design the reported work is the first part. The trees and shrubs planted in this part have been arranged botanically so as to form in future a representation of the natural orders of plants.

(*c*). A large fernery, 150 feet long and 40 feet wide, has been erected near the garden office, and now forms a much admired object. The structure has proved to be admirably adapted for the plants which grow with a luxuriance that even for India seems surprising. This fernery now contains one of the largest collections of ferns, palms and foliage plants in India.

(*d*). A new water main was laid into the southern part of the garden, by which a considerably increased facility for watering has been obtained.

(*e*). Minor alterations and improvements have been made in different parts of the garden by cleaning out plantation, improving the outlines of shrubberies, &c.

4. The borders and flower-beds have been kept neat and tidy, and the lawns have always presented a fresh and neat appearance. The annuals were specially good, and the balsams in the rains and phlox in the cold weather were much admired on account of their splendid colours and profuse flowering.

5. As mentioned in last year's report, the establishment is far too small in proportion to the exigencies of the garden. The Superintendent finds his personal work ever increasing and he regrets not being able to carry out all details to his own satisfaction. As none of the establishment has any knowledge of gardening (above the mark of the mallees), many details must be left unattended to. The head clerk, Mr. Pinto, was absent on privilege leave for two and a half months, during which time the junior clerk, Mr. Lobo, acted in his place and performed all the clerical duties scrupulously and very satisfactorily, besides being most active in assisting the undersigned in garden work. The old head mallee, Jeewan Pandoo, died on 1st March 1887, while absent on leave, and, as no suitable candidate for the post was to be had, Baboo Narayen was promoted to the post, the salary being reduced from Rs. 35 to Rs. 25 per mensem, and it is to be hoped that he will in course of the year prove himself able to fulfil his duties satisfactorily.

6. The collection of plants has been considerably increased, partly by purchase and partly by species, of which seeds or living

plants were collected, in the jungles of the Konkan and Khandalla. A few plants were also received as presents from various gentlemen, or by exchange.

7. The identification of plants has been continued and a descriptive scientific catalogue has been commenced, but very little time is left at the disposal of the Superintendent for this and the important work of labelling plants, as his constant supervision of the works going on in the garden is necessary in order to attain satisfactory results. The library is still very deficient in respect to modern works of reference, though a few additions have been made during the year.

8. The zoological collection has been maintained in fairly good condition, though, owing to the proposed but later on rejected transfer of the animals to the Natural History Society, no other than very urgent works were carried out, and no improvement in the housing of the animals took place.

9. The other Municipal Gardens have been kept in their usual order and condition. The damage done by visitors, the nuisance of sweetmeat-sellers, &c., is a matter for serious regret, but cannot, it is feared, be prevented before a guard or peon has been appointed to each garden.

10. The Budget allowances and the expenditure incurred during the year for the several gardens are shown in the following statement :—

	Name of Garden.	Total amount sanctioned.	Expenditure.
		Rs. a. p.	Rs. a. p.
(*a*)	Victoria Gardens	53,284 0 0	.....
(*b*)	Northbrook Garden	1,580 0 0	1,174 10 7
(*c*)	Falkland Road Garden	570 0 0	526 4 3
(*d*)	Dick's Tank Garden	264 0 0	251 6 4
(*e*)	Elphinstone Circle Garden	4,110 0 0	2,562 12 7
(*f*)	Bazar Gate Garden.....	924 0 0	559 8 2
(*g*)	Sir Kavasji Jehangir Garden	550 0 0	430 4 1
(*h*)	Malabar Hill Garden	668 0 0	625 8 0
	Total... Rs.	61,950 0 0	.....

I.—THE VICTORIA AND ALBERT MUSEUM.

The most important addition made in the Natural History division was the skin of a dugong (halicore dugong), the "Merman" of the ancient mariners, received by presentation from Mr. Kaikhusru B. Setna, of Bombay. The skin was cured and mounted at the Museum and has formed a valuable addition to the department of mammals. The other additions to the department of mammals were as follows :—One gazelle (Gazella bennetti), one sambar (Rusa aristotelis), one young chital (Axis maculatus), and one Nyl-gai (Portax pictus) from the Superintendent, Victoria Gardens ; one monkey (Macacus radiatus), one mungoose (Herpestes griseus), one skull of a wild pig (Sus indicus), one skull of a panther (Felis pardus), and a skin and skull of hyæna (Hyæna striata) from Khandalla. No addition was made to the department of birds during the year under report. Two specimens of geese (Anser cinereus), one of a swan (Cygnus sp.), one of a peafowl (Pavo cristatus), one of a pelican (Pelecanus javanicus), and one of the Australian cassowary-emu (Dromains novæ hollandiæ) were received from the Superintendent, Victoria Gardens ; but as these were not in a good enough condition for stuffing purposes, their bones were prepared and mounted at the Museum. The department of reptiles received the following additions :—Four cobras (Naja tripudians) from Thanna and Poona, one green tree-snake (Trimesurus anamalleusis) from Khandalla, thirteen Phursas (Echis carinatas) from Rutnagherry, three sea-snakes (Hydrophidæ) from Warli, one carpet-snake (Lycodon aulicus) from Kalyan and two harmless tree-snakes (Passerita mycterizaus) from Matheran. The following specimens were added to the department of Fishes, Crustaceans, and Molluscs :—A large specimen of a flying-fish (Exocœtus evolans) from Rutnagherry, two specimens of the electric torpedo-fish (Narcine timbi), three specimens of the dog-fish (Chyloscyllium indicum), two zebra soles (Cynoglossus lingua), and forty-two specimens of eleven different kinds of fishes ; also three feather-stars and a few crabs from the harbour.

The department of Entomology received by purchase a valuable addition in the collection of the silk-producing moths of India made at Calcutta under the direction of the Superintendent Indian Museum. The other additions made to the department were—27 specimens of six different kinds of butterflies and moths from Matheran and nineteen specimens of four kinds of beetles from Elephanta.

In the division of Anthropology the following additions were made during the year :—Nine turbans or head-dresses of the natives of the Ahmedabad district obtained through the President of the Artware Committee, Ahmedabad ; fifteen turbans or head-dresses of the natives of Poona and its neighbourhood, obtained through the Secretary, Artware Museum Committee, Poona ; and twelve models

of heads of the natives of Belgaum, obtained through the President, Artware Committee, Belgaum. Two photograph frames, four plates, and one toilet box, from Saharanpore, were also added to the collection.

During the year under report the Natural History Division was extended. The work of setting up skeletons which are so useful to the student of comparative anatomy was begun. During the year the bones of the undermentioned mammals and birds were prepared and mounted :—A lioness (Felis leo), a gazelle (Gazella bennetti), a sambar (Rusa aristotelis), a spotted deer (Axis maculatus), and a monkey (Macacus radiatus), two geese (Anser cinereus), one swan (Cygnussp.), one pea-fowl (Pavo cristatus), one pelican (Pelecanus javanicus), one emu or the Australian Cassowary (Dromains novæ hollandiæ), and one of common crow (Corvus splendeus). The bones of the Gangetic crocodile (Gavialis gangeticus) which form part of the old collection, were also set up and mounted. This is the first attempt in the Museum at making a collection of mounted skeletons, and considering the amount of time required in preparing the specimens, the work done during the year is exceedingly satisfactory. There are now thirteen skeletons on exhibition. The specimens in the other departments were overhauled and in some instances rearranged.

The cloths and other specimens of textile manufactures were carefully attended to during the year. As usual the cases were freely supplied with preservatives to protect the valuable cloths from the attacks of insects.

The specimens in the other departments had the usual attention paid to them to keep them in good order. Agreeably to the orders of the Acting Municipal Commissioner in September last a large number of specimens of cloths from Surat, Yeola, Kaladgi, Thanna, Ahmedabad and Hyderabad (Sind), stonework from Cambay, hornwork from Rutnagherry, and lacqueredware from Sind, local sandalwood work, as well as a small collection of fibres, were sent as loan collection to the Artware Exhibition, Poona. All the articles, excepting a few specimens, were returned at the close of the Exhibition.

A statement showing how the annual and special grants were utilized will be found in Appendix A, at the end of the report.

Early in the year under review, for the first time, instructions were issued by the Acting Municipal Commissioner to set aside Rs. 600 to defray the cost of maintaining the part of the Victoria Garden in front of the Museum. This led to a diminution in the amount of the special grants available—either the Natural History or Artware sections. In the budget of the current year, however, a further sum of rupees one thousand has been generously put in

which will both cover the garden expenses and leave a margin over for the purchase of books, the want of which has been greatly felt ever since a Natural History Department was added to the Museum.

The Museum was open to the public for 313 days in the year. The total number of visitors was 640,206, showing an everage daily attendance of 2,045. Last year the Museum was open to the public the same number of days, and the total number of visitors was 586,228, showing an average daily attendance of 1,872. The increase in the number is due to the partial return to the former hours of opening and closing the Museum.

APPENDIX A.

STATEMENT SHOWING HOW THE ANNUAL AND SPECIAL GRANTS WERE UTILIZED.

1.—*Natural History Grant.*

		Rs.	a.	p.
1.	Spirits of wine	296	0	0
2.	Collection of silk moths, &c.	250	0	0
3.	Cases for specimens	460	0	0
4.	Preparing and mounting skeletons, including the cost of mounting	158	0	0
5.	Travelling and Bhatta allowances to Taxidermist and Skinner	36	0	0
	Total ...Rs.	1,200	0	0

2.—*Grant for Cases.*

		Rs.	a.	p.
1.	New cases made to order	497	0	0
2.	Repairing and polishing old cases	103	0	0
	Total ...Rs.	600	0	0

3.—*Artware Grant.*

		Rs.	a.	p.
1.	Set of Ajunta Paintings	60	0	0
2.	Gokak models, &c.	140	0	0
3.	Turbans and head-dresses	158	6	0
4.	Silver work from Kutch, and Tanjore and Moradabad work	376	0	0
5.	Miscellaneous artware	35	10	0
6.	Two cases for specimens	430	0	0
	Total ...Rs.	1,200	0	0

PUBLIC HEALTH.

1. REPORT of Dr. T. S. WEIR, MUNICIPAL HEALTH OFFICER, forwarded with his No. 11847, dated 24th August 1889.
2. REPORT of the SUPERINTENDENT, MARKETS, forwarded with his No. 468, dated 13th June 1889.
3. RETURN OF FIRES forwarded by the SUPERINTENDENT, FIRE BRIGADE, with his No. 62, dated 1st May 1889.
4. RETURN OF STREET ACCIDENTS forwarded by the COMMISSIONER OF POLICE with his No. 2940-6, dated 7th May 1889.

1.—REPORT OF HEALTH OFFICER.

THE public health has not been so good as in the previous year. Although the mortality in 1888 is higher than in 1887 and the two years preceding, the deaths are, notwithstanding the increase of population, less than in 1883 and 1884. The rate of mortality is over 25·16, as has been calculated. The population I estimate to be about 8,90,930. The calculation is made in the usual manner by logarithms. Logarithm population 1881—Logarithm population 1872 ÷ 9, giving the annual increment. Any estimate of the population is very uncertain. It may, however, be taken for granted that the population is increasing more rapidly every year. During the last two years the expansion has been remarkable. Where there were rice-fields two years ago, there are now groups of buildings—houses by ways coalescing into the greater city. The growth and change in the suburbs is marvellous.

2. The total deaths, the rate of male and female mortality and the proportion of male to female deaths are shown for a series of years in the following table. But in reading the table, it must be remembered that in 1886 the smallest number of deaths from cholera and small-pox, known in Bombay, were recorded :—

Years.	Total Deaths.	Death rate. Males.	Death rate. Females.	Proportion of Male to Female Deaths.
1881	21,856	24·94	33·27	112·97
1882	20,468	23·36	31·14	113·05
1883	23,530	26·62	36·16	119·00
1884	22,542	25·29	34·96	109·01
1885	21,850	24·58	33·80	109·57
1886	20,074	22·45	31·24	108·27
1887	20,518	23·15	31·62	110·32
1888	22,421	25·84	33·74	115·40

These 2 colums. are calculated on the Census of 1881.

3. The abnormal conditions following on a scanty rainfall have been unfavourable to the public health. These conditions have had to be battled with, but other conditions arising without have had to be contended with. There has been an extraordinary importation of cases of cholera, and an extraordinary immigration of poor from tracts of country where the rainfall was scanty, and therefore where the food supply has been scanty. We have therefore had to contend not only against unwholesome conditions within, but with conditions without the city. When the rainfall was scanty in 1876, I pointed out that the mortality would increase, and in this period we may be certain that the abnormal conditions will be followed by increased mortality in proportion to the scantiness of rain and of food. We can only hope by vigilance to save some lives and lessen the fatality.

4. I anticipated in the Annual Report for 1886 that there would be an epidemic of small-pox in 1888. An epidemic has occurred with the beginning of the year. The probability of an epidemic is thus referred to in that report:—"The indications of a resuscitation of "small-pox, which have generally been observed in the period preced- "ing an epidemic, must be carefully looked for towards the end "of 1887. I apprehend the occurrence of an epidemic of small-pox "in 1888 from certain indications I observed late in the hot season "of this year ; and if cases of small-pox occur in the monsoon months "of 1887, they may be considered, judging from previous expe- "rience, as of grave import."

5. A special Small-pox Hospital was opened on the 12th March. Notices pointing out the necessity of vaccination were circulated. The special measures of sanitation and vaccination, taken when an epidemic occurs, were fully enforced.

6. Groups of huts occupied chiefly by mill hands and labourers, are thus described in the last Annual Report:—"The most fearful nuisance "through want of drainage has been caused at Ghorapdev ; and were it "not for the overflow and escape of sewage to the sea, Ghorapdev "now thickly populated by mill workers would cease to be habitable. "To the east of Ghorapdev there are great sewage pools oozing and "escaping seawards." Such is the description of conditions amidst which thousands of workers live in Ghorapdev in the Annual Report for 1887. And in 1888 there have been two outbreaks of cholera and choleraic diarrhœa in these same huts amidst these same pollutions. 56 cases of cholera and 37 deaths—so great was the fatality. So virulent an outbreak has not occurred in any other portion of the city. The fatality appeared to be the issue of sewage pollutions. There have also been two outbreaks of cholera in Borebhat—another locality of imperfect drainage. The drainage of Borebhat was very imperfect, but not so defective as the drainage of Ghorapdev. There were open unmade trenches carrying the drainage to cesspools and from the trenches and cesspools a nuisance such as must arise from sewage trickling

over and oozing through shallow trenches and from sewage settling in and overflowing during rain from cesspools, polluting building floors and soil. Localities such as Ghorapdev have been inhabited before they were prepared for habitation. Pipes are laid to carry water to them; but pipes are not laid nor drains made to carry away this water. I was asked after my description of the state of Ghorapdev for a remedy for so much foulness, and I replied "drains to carry away the water and liquid refuse." In another portion of the report I have referred to Zawba's oart as evidence of what can be done by simple sanitary improvement for the prevention of cholera.

7. The quantity of the filtered water from Vehar and Tulsi has not been equal to the average supply. This is due to the smaller rainfall, the lower level of the lakes, and consequently the greater difficulty of removing greater impurity. The impurities have been more than the system of filtration can intercept or remove.

8. The growth of population has been quicker than the construction of new drains, and the result has been fearful nuisances in localities without drains. Within sight of the Municipal Office was a hideous nuisance—near a hotel. A space, the size of the Corporation Hall, was covered with fluid filth from cook-rooms and bath-rooms. The owner of the building was prosecuted, and after some weeks the landlord built cesspools, and the tenant keeps a cart to take away the liquid refuse—what the cesspools hold. And near one of the clubs and near one of the evening resorts, there has been a serious nuisance from want of drainage. The tenants are very much to be pitied in these localities. They enter a house, and, having occupied it, find that all the cook-room and bath-room water collects in pools around their dwellings. They then discover that there are no drains.

9. Old nuisances have been abated, but new nuisances come with new buildings. Here is a description of one which was heard in the Girgam Police Court. Mr. Ryan came to see the nuisance with Mr. Smith; the stench was fearful. It was difficult to believe that people could live in such a stench, but they lived and suffered—all poor people—weavers much afflicted in health. They had dug holes and prepared the rooms for weaving, and having done so, suffered rather than leave and lose a day in finding a new dwelling. A description of the nuisance may seem unreal to anyone who had not seen it. This is the advantage of a magistrate seeing so great a nuisance, because he will be convinced by sight and smell of foulness and odours that he cannot realize from evidence. It is a trial to stand as we did near that trench, and feel the fearful stench. My notes are:—rooms built on four sides, around open space square-shaped and opening on to it. Drainage of all the rooms flows to a trench dug from north to south through open space. From this trench no outlet, trench about 80 feet long, 3 feet wide, and 3 feet deep filled with foul sewage; all water from rooms except thrown out of back windows, flows to trench. The residents are weavers; complain of nuisance and illness

—fever. The rooms are damp; floors on one side wet. Here are the notes on another case near the Ripon Road:—House new; a few months occupied; water collected in pools on south side; waste-water pipes from bath-rooms discharge against walls; tank of sewage on west and south sides; ground on north side wet from sewage; a system of drainage attempted; pipes placed but not connected with street sewer. Here is another case:—New house; 23 waste-water pipes from so many bathing-rooms discharging water on three sides of house; ground around a swamp. But there are more than a hundred such cases even within sight of the Municipal Office. There was a fearful nuisance from the drainage of a hotel. There was a large space covered with water from the cook-rooms and bath-rooms—a pool of filth.

10. Unless that channels are constructed where towns are growing in Parel, Sewree and Mahim—the northern district of the Island—there will be fearful nuisances. I think it would be better to abandon house connections for the present, and expend the money to be spent on house connections in laying down sewer lines through the northern districts of the Island. The need for drains or channels of any kind in one-half the Island, or as commonly called, the city of Bombay, is emergent.

11. During this year there was an extraordinary importation of cases of cholera. Some 23 persons suffering from choleraic symptoms were landed from a coasting steamer, "Bhownugger." The Captain of the steamer did not report to the Harbour Authorities the cases, and he also did not report that in the short voyage of 35 hours between Bhownugger and Bombay 3 passengers—one man and two women—had died from cholera and been cast overboard. The steamer again returned to Bhownugger, taking passengers from Bombay. The steamer arrived on the 2nd and left again on the 5th April. Up to this time nothing was known of the cases. On the 7th I received information that many pilgrims who were living in a Dharamshala were ill with cholera. I went to the Dharamshala, and I have never seen a more appalling sight. In the hall of the Dharamshala were 15 men and women of all ages close to one another, suffering from cholera or diarrhœa of a choleraic character. The pilgrims were dismayed, but the managers of the Dharamshala gave us ready help. So many cases caused alarm, and we soon obtained information of other cases, and tracing them, we found 4 in a house in which there were as many as 715 people, 2 in a building in which there is a school, 3 in a house in which there were 160 people, and 1 in a house in which there were 152 people. All these houses were close together. Of the boys in the school, two were ill within 3 days from cholera and one died. I wrote at once to the Health Officer of the Port, pointing out that "some 23 persons suffering from symptoms like "cholera were landed last Monday from a steamer called 'Bhow-"nugger,' but of this name I am not certain, and proceeded into the "city; with these persons we are dealing; but the circumstance I

"have specially to bring to your notice is, the statement of some of "the persons now ill that deaths occurred on board the steamer from "an illness stated to be cholera. Some of the persons ill went to "reside in a building in which is a school; and of the scholars in "this school, two have since been ill from choleraic symptoms. The "people are said to be inhabitants of the Palitana State."

12. The Health Officer of the Port replied:—

"I was unable to obtain any information concerning the S.S. "'Bhownugger' until to-day, as that vessel, which arrived here on "the 2nd instant, sailed again for Bhownugger before the receipt of "your letter, and only returned from Bhownugger Saturday morn-"ing. I now forward the report of the Water Police, concerning the "circumstances of the case.

"I have reported the matter to the Custom House Authorities, "who will probably take steps, under the provisions of the Native "Passengers Ship Act, to prosecute the Commander of the S.S. "'Bhownugger' for not reporting the deaths which occurred during "the voyage, and I have directed the Captain of the vessel to "thoroughly disinfect her.

"In conclusion I may state that the cause of these deaths "escaping notice, is to be found in the rule which permits certain "small coasting vessels to enter and leave the port without the ser-"vices of a pilot."

13. The report of the Water Police is as follows:—

"The S.S. 'Bhownugger' sailed from Bhownugger on the 1st "instant at 6 A.M., and arrived in Bombay Harbour on the 2nd "instant at 5-30 P.M. with 187 passengers. It appears that she "sailed from Bhownugger with 190 passengers, three of whom died on "the voyage from choleraic symptoms as shown in the accompanying "list. On the arrival of the steamer in the harbour the passengers were "landed at Mody Bay and went to their respective homes, and it "appears since that 25 passengers, named in the accompanying list, "have been affected with the same symptoms, out of whom five have "been reported dead. The Captain is unable to say whether the "passengers came from Palitana or not, but that they all embarked "at Bhownugger, and were not supplied with any food by him. "The Captain further states that he did not report the casualities of "the voyage to the authorities on his arrival at Bombay."

14. The Captain of the steamer was prosecuted by Government and fined Rs. 200. Is a fine of Rs. 200 sufficient punishment for such an offence? The following evidence of one of the passengers gives a startling description of the haste with which bodies are cast overboard from steamers plying along the coast: thrown into the sea; traces of

the cause of death have sunk beneath the waters ; there is no more inquiry ; it saves trouble ; the steamer is cleared of the body and of official inquiry. Here is the evidence of one of the passengers :—

L. J., a native of Kutch Mandvee, who was a passenger by the S.S. 'Bhownugger' said "he had been on a pilgrimage to Palitana from "Bombay, and while there he had been told there was a good deal of "sickness about. He went from Palitana to Songad, and from there "to Bhownugger, where he put up at a Dharamshala. It was also "occupied by a number of other persons, some of whom he saw were "very ill, and a few of this number subsequently died from the effects "of the disease. After the witness went on board the steamer at that "port, he observed that some of the persons who had also come on "board were sent ashore again owing to their illness. In all about "six or eight persons were sent away. The day following that on "which the steamer left Bhownugger, about four or six of the passen-"gers were taken ill, three of whom died and were buried at sea. He "could not say what these persons were suffering from. About five "or six days after the vessel had arrived in Bombay, witness went to "a *wady* where he saw some of his fellow passengers suffering from "what he believed to be cholera."

15. It is remarkable that, after the importation of the cases by this steamer, cholera became prevalent. A description of the occurrence is given in another portion of the report. It appears that some 200 persons embarked at Bhownugger on the S.S. "Bhownugger." Some of them were ill and sent ashore because they were ill.

16. There was also another instance of the importation of cases of cholera by sea.

17. A month after the importation of the cases of cholera by the S.S. "Bhownugger," the S.S. "Stura" arrived with 7 cases of small-pox on board. On board this steamer were pilgrims also, but they came from Java. The S.S. "Stura" had 627 passengers on board, all pilgrims. On arrival of the steamer the Health Officer of the Port sent a vaccinator on board and 333 were vaccinated—all who had not been vaccinated or had not small-pox. The pilgrims were all landed, the sick were taken to hospital, the healthy were placed under a shed on the wharf where they caused a considerable nuisance. So many people crowded together however cleanly—and the pilgrims were cleanly and well supplied with food—must cause a nuisance. The mere cooking of so many people must cause a nuisance on the open ground. After some time a house was obtained on Mody Bay, but as the house was not large enough, many of the pilgrims had to live on open ground near by the house. The house was too small, and had only two privies. The open ground near was used as a privy. After the landing of the pilgrims, five more cases of small-pox occurred. Had not the pilgrims been cleanly, and had they not been supplied with good food, many of them would have died. They suf-

fered very great misery. Nothing could be done to compel those who had charge of the pilgrims to find a suitable dwelling. A correspondence has since taken place, but it does not appear that any authority can help strangers in the difficulty in which these pilgrims were.

18. It is a serious occurrence—so many people, strangers, unacquainted with the city, with the language of the inhabitants, crowded into one small building, huddled on one little open space between buildings.

19. I have had also to complain of the importation of cases of cholera by Railway lines. About the same time as the importation of cholera by the "Bhownugger," there was a serious outbreak of cholera in Nassick, and as large numbers of pilgrims leave Bombay for Nassick, the epidemic caused much anxiety.

20. The sanitary supervision of the Railway passenger traffic to this city has become necessary, and it should be the duty of officials to remove from the train any passenger ill from cholera. I admit that the measures taken after detection of a case are good enough, but I contend the measures for detection are not sufficient.

21. In October it was reported that a considerable number of persons were coming to Bombay from Kathiawar and Guzerat in consequence of the scanty rainfall and the scarcity of food. Inquiries were made from the Railway and Steam-boat Companies carrying passengers, and the Police authorities were asked for information. Inspectors of the Health Department were ordered to watch the arrival of steamers and trains, and also to keep a look-out for persons entering the city by the Bandora and Coorla causeways. We received every possible assistance from all people to whom we applied for information. It was soon ascertained that a large number of persons of the peasant and mendicant classes were coming into Bombay in search of employment, or of food, but, although poor, they were not famine-stricken, and many were in good health. In November many persons were seen begging throughout the city, and about three hundred of these strangers took up their quarters on the open ground at Foras Road; most of these people said they came from the Ahmedabad Districts and were in search of employment, although they would accept only one form of employment. They belonged to the Wagree and Koombhar castes chiefly, they were poor but had not suffered much from privation. Others were to be found on the Esplanade and in other parts of the city, and these came from Kathiawar Districts. The number of destitute people who were now to be seen in the city caused philanthrophic citizens to form a Relief Committee, and this Committee obtained the Commissioner's consent to the use of the hospital sheds at Arthur Road for the accommodation of the immigrants. The Health Department looked

after the conservancy of the camp. In apprehension of the influx of a large number of famine refugees, the Standing Committee recommended the Corporation to sanction a grant of Rs. 2,500 to be expended in the formation of a relief camp if such was found to be necessary. Before the Famine Relief Committee was organized, the Health Department, through the liberality of a Parsee gentleman, was able to give food to a number of the people who had been collected and placed in temporary sheds near the Byculla tank. The Famine Committee had now organized an excellent system of relief. The number in the camp fluctuated, but there were on an average some 700. Some 500 of these people were afterwards sent back to their homes at the expense of the Famine Committee, and the annoyance to the general public by a number of vagrants thronging the business thoroughfares of the city was greatly reduced. Many of the immigrants did not wish to leave Bombay. This is shown by the fact that some 200 of these vagrants who had been cared for by the Committee at Arthur Road, refused notwithstanding all persuasions to go back to their country. The Committee therefore not wishing to encourage immigration, but wishing to encourage those who had come to go away, stopped relief. The immigrants then left the camp and encamped on the open ground around the Gaiety Theatre and Bazar Gate Garden and on the footpath near the Police Court. The Committee deported about 300 more of the immigrants, but a number remained, who absolutely refused to leave the city. The Committee could not give more relief and asked that the Municipality should deal with the immigrants and give relief from the special grant sanctioned by the Corporation. Correspondence followed with the Police authorities. We considered that it was not desirable to maintain the immigrants at the public expense, and asked that they should be sent back to their native country without delay. The Police prosecuted a number of these vagrants, but without success. Meantime the number increased, more immigration occurred, and the nuisance and annoyance created in the Fort became so great that the Police forcibly removed the vagrants to Byculla, and they were again placed in the hospital sheds at Arthur Road. Upwards of 600 men, women and children were removed. The Agent in Bombay of His Highness the Thackoor Saheb, acting under instructions, sent away a number of the people belonging to the Bhavnagar State by rail—170 men, women and children belonging to the State were deported. Arrangements were first made to send them by steamer. After the arrangements had been completed, and the immigrants were taken towards the Bundar, they stopped on the road and refused to go by sea and demanded to be sent by rail or to be left alone. They had to be allowed to go back as we could not use force. Under instructions from you, arrangements were made to give food to the women and children and men who were not fit for work. After a short time this relief was found to be unnecessary, and was stopped as the people were obtaining of food from charitable people. Many contractors offered to give employment to those people, but they did not want and would not do hard work; they must cultivate or beg,

so they said. They said work in Bombay was too hard, and it was not work which they were accustomed to, and they could not do it. In fact many were people little accustomed to labour, and had no intention of working if they could get food by begging. Since then a number of these people have left Bombay and returned on foot to their native country. 250 or so still remained in our sheds at Arthur Road; about half of this number did some work as labourers and the rest lived by begging.

22. I have no doubt, however, that the relief and shelter given to the immigrants saved the lives of many of them. Had they been scattered through the city, there would have been a great mortality amongst them. The success of the measures is greatly due to the Assistant Health Officer, Mr. Leask.

23. I am glad to be able to report that one portion of the question regarding the cremation of Hindu poor dead—a question which had led to considerable discussion—has been quietly settled by the Health Department. Since June this department has been cremating many of the poor Hindu dead in the cemetery near Warlee without attracting attention and without causing any opposition.

24. A change in the system of service of summonses has been introduced during this quarter. The magistrate has decided that summonses are to be served by policemen instead of as heretofore by Inspectors of the Health Department, but the policemen to perform this duty are not numerous enough in proportion to the number of summonses. The result of this change of procedure has been—

A.—Delay in the service of summonses;

B.—Delay in the removal of nuisances; and therefore

C.—Insufficient protection of the public from nuisances.

25. It cannot be too widely known that persons committing nuisances can only be punished by Magistrates, that nuisances on private property can only be dealt with by Magistrates, and that the Magistrates must be looked to for the protection of the public against nuisance on private property or from foul matters cast from houses in public streets.

26. The mortality is arranged in the table following by groups of death causes. Contrasted with the preceding year, there is an increase of mortality from all chief causes excepting small-pox, measles, diarrhœa and diseases of the nervous system :—

RETURN SHOWING THE NUMBER OF DEATHS FROM DIFFERENT CAUSES IN 1888.

Causes of death.	Number of deaths.	Rate per 1,000 of population.	REMARKS.
Small-pox	482	·54	Annual increment of population calculated.
Measles	221	·25	
Fever	6,642	7·45	
Cholera	379	·42	
Phthisis	2,726	3·06	
Diseases of the Nervous System	1,966	2·21	
Ditto Respiratory System	4,132	4·64	
Diarrhœa	1,006	1·13	
Dysentery	710	·80	
Accidents	385	·43	
All other causes except Still-born	3,772	4·23	
Total...	22,421	25·16	

27. As in previous years the mortality of male children under one year of age is higher than of females, while from 1 to 3 years the incidence of the death-rate does not follow the previous year. From 1 to 2 and from 2 to 3 years more male children died, and from 3 to 4 and from 4 to 5 the death-rate of females was higher than of males. From 5 to 6 the male mortality was higher than the female. From 6 to 40 years the female death-rate is higher than the male; between 12 and 40 the female mortality is 7·1 per thousand higher than the male. Over 40 the male mortality increases and up to 70 is higher than the female. During the last two age periods, females have less chance of life than males. The total female mortality is 7·9 higher than the male ; the excess of female mortality is ·5 less than in 1887.

28. The mortality of children under 1 year of age is 31·06 more than in 1887, but over 1 year and up to 5 years, the mortality is 5·31 less than in the last year. Of the deaths under one year of age, 3,628 were males and 3,028 females, the male death-rate being 325·9 and the female 263·21. The increase in infant mortality may be chiefly ascribed to the resuscitation and the prevalence of small-pox. A further examination of the mortality at early periods of life shows that, while the proportion of deaths of infants to population is higher than in the previous year, the proportion of deaths to births is 39·71 or 1·13 more.

29. The percentage of deaths under 1 year of age to births is a little higher than the past year. The highest mortality occurred in Byculla, Worli, Chuckla, and Mandvi. These are the sections in which the birth-rate is low. The infant mortality is greatly influenced by the birth-rate and fluctuating condition of population. Still knowing local conditions, the infant mortality indicates the localities where unwholesome influences are active.

30. The mortality by place of birth indicates the influence of immigrant elements on the public health.

31. The deaths of indigenous are only 91 more than the deaths of immigrants, while in 1887 the deaths of indigenous were 479 more. This indicates a much greater immigrant influence on mortality, and further examining the mortality of 1888 with 1887 according to place of birth, the deaths of indigenous in 1888 are 749 more than in 1887, while the deaths of immigrants are 1,137 more.

RETURN SHOWING THE NUMBER OF DEATHS ACCORDING TO PLACE OF BIRTH IN 1888, EXCLUSIVE OF STILL-BORN.

32. In the table following, the rate of mortality in 5 Hindu classes can be contrasted with the mortality in other classes of the population. Amongst two classes the mortality is lower, and amongst three higher, than in 1887. The rate of mortality amongst the Hindu population is not so favourable as in the previous year; calculated on the population of 1881, the mortality is equal to 27·84. There is a considerable increase in the mortality amongst Hindu low-castes. There has been a great increase in the low-caste population, and they live under very insanitary conditions. They are poor, live in poor dwellings in crowded rooms—more than one family in each room—and this Hindus of caste do not do; they yield not to the food discipline which Hindus obey and obey for their own good. There is no condition of life which the poor live so unwholesome as the life of the Hindu out-castes.

RETURN SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY AMONGST DIFFERENT CLASSES IN 1888.

Classes.	Population by Census of 1881.	Number of Deaths.	Per 1,000 of Population.

* Annual increment of population calculated.

33. Many of the buildings in which Jains live are very unwholesome. I have seen some houses so dark on the ground-floor during the day that a lamp had to be kept burning. These houses had also bad drains in dangerous positions under the ground-floor. These unwholesome conditions explain to some extent the high mortality amongst Jains. The great immigration of Jains to this city also explains to a greater extent the high death-rate.

34. There is an increase of mortality in the four great classes of the population usually taken each year for examination, that increase is less than shewn in the table following, for the natural increase of population is not calculated and the expansion from immigration cannot be exactly estimated and can only be conjectured from information more or less uncertain. Taking the population of 1881 as the the basis of calculations, there is an increase of mortality in the following ratios:—Europeans 1·82, Musulmans ·95, Parsees 2·20, Brahmins 2·77. There has therefore been the least increase of mortality amongst Musulmans and Europeans. If the increase in the European and Musulman population could be known, it is probable that there has

not been an increase of mortality in these two classes in 1888. In only six years since 1877 has the mortality amongst Europeans been lower. The health of three of the classes—Europeans, Parsees and Brahmins—is exhibited in a favourable condition, considering that the ratio of mortality is based on the census taken in 1881. In two of the classes, Europeans and Brahmins, there has been an increase of population from immigration beyond that natural increase which can be estimated. In the report of the previous year I pointed out that imperfect street and house ventilation influenced the mortality of the Musulman population. The house pressure and overcrowding in localities in which great numbers of Musulmans live are very great. The Musulman mortality is really less than shown in the return. Still the mortality is high. But I hope much from the distribution of population and the attraction of population to Byculla following the new roads. These new roads will act directly and indirectly towards improving the public health. There is a considerable difference between the male and female mortality in the Musulman population. The male mortality is 28·19, while the female is as high as 39·34 per 1,000 of population.

RETURN SHOWING THE TOTAL NUMBER OF DEATHS AND THE RATE OF MORTALITY IN THE FOLLOWING CLASSES SINCE 1877.

1881	20·10	22·77	These calculations are based on the population of 1881.
1882	18·43	17·70	
1883	22·96	18·94	
1884	22·86	19·23	
1885	20·43	19·23	
1886	21·42	17·89	
1887	20·47	17·22	
1888	22·67	19.04	

36. The mortality has this year gravitated most to the outlying districts; while the incidence of mortality is less or a little more in some of the most crowded districts; it has increased very much in the suburbs where the population has most fluctuated. In Worli, Parel, and Sewri, where the mortality has increased most, the population has nearly doubled. The highest mortality has been registered in Parel. I have before drawn attention to the foulness in Parel and all the northern portion of the Island from want of drainage—a foulness which you know so well. I believe that foulness has an unfavourable influence and will have a more unfavourable influence as the population becomes denser. In portions of Parel, as in every portion of the northern districts of the Island where there is more population than the drainage of which can be received in small cesspools, there are surface collections of sewage polluting the atmosphere. In the past year the highest mortality was registered in 2nd Nagpada and in this year the mortality is also high. This is a section of intense house-crowding, imperfect house ventilation and imperfect underground drainage; within the houses from imperfect ventilation, and without from imperfect drainage—air pollution. The drains are sewage tracts under the ground which have to be opened in some lanes more than once a week. In 2nd Nagpada the proportion of deaths of infants is high. The infant mortality indicates generally the districts of most unfavourable conditions and of weak chances of life. The mortality in Upper Colaba is due to fluctuating conditions of population. Of the 118 deaths, 25 occurred amongst residents under one month. The mortality in Kamathipura, although higher than in the three previous years, is less than in 1883 and 1884; allowing for the increase of population, it would be still less; the mortality from fevers and dysentery has increased, while the mortality from diseases of the nervous

system and of the respiratory system and from diarrhœa has decreased.

RETURN SHOWING THE DEATH-RATE FROM ALL CAUSES IN EACH SECTION IN 1888.

* Annual increment of population calculated.

37. *Measles.*—The mortality fromMeasles is less than in the previous year; 221 deaths were registered, being 326 less than in the last year and 242 less than the average. As in preceding years, the highest mortality has fallen on females; while the female death-rate is ·35, the male death-rate is ·23. In the preceding year the male death-rate was ·55 and the female ·93. The incidence of measles follows the seasonal

course observed in the appearance of small-pox. The greatest number of deaths were registered in the month of April.

38. The highest mortality occurred within the first two years of life; the mortality of males being higher than of females. Under one year of age the mortality amongst male children was 4·22 and amongst females 3·12, and between 1 and 5 years of age the male death-rate was 1·79 and the female 2·46.

TABLE SHOWING THE NUMBER OF DEATHS FROM MEASLES AND THE RATE OF MORTALITY ACCORDING TO AGE PERIODS DURING 1888.

Ages.	Deaths from Measles.

* Annual increment of population calculated.

39. The highest death-rate has occurred amongst Jains, the mortality being ·87 per thousand. In the previous year I drew attention to the high mortality amongst Jains and referred to the defective sanitary conditions and unwholesome buildings in which the poor live. The three other classes in which the mortality was above the total average are Europeans, Brahmins and the mass of the Hindoo population classified as Hindus of other castes. 4 deaths occurred amongst Europeans giving a mortality of ·38. In four classes deaths from measles were not registered—Lingaets, Eurasians, Negro-Africans, and Buddhists. In these small classes very few deaths inflate the death-rate. The mortality amongst Hindu low-castes is relatively

lower than in the previous year; in that year as in 1886 the mortality in this class from measles was higher than in any other large class.

* Annual increment of population calculated.

40. The highest mortality has occurred in 1st Nagpada. I do not refer to Upper Colaba, a section of small population and of a migratory character. In the previous two years the highest mortality was registered in the insanitary district of 1st Nagpada. In Dongri and in Parel the mortality was high. In 12 districts the mortality was above the average for the whole city. The twelve districts are Colaba, Mandvi, Oomerkhari, Dongri, Bhuleshwar, Khara Talao, Kumbharwada, Khetwadi, Mahalakshmi 1st Nagpada, Parel and Sewri. In Kamathipura and Tardeo—adjoining sections—the mortality was equal, and also in Sion and Mahim and in Dhobi Talao and Fort North, the mortality is equal. In the past year the mortality in Kamathipura and Tardeo was also equal. The relatively low mortality in Girgaum is satisfactory. In the previous year the high mortality in this district

was referred to, and I pointed out that the high mortality indicated the need of improvement and especially of improvement in the drainage of this district. I expect further improvement from construction of more drains; during the past year great improvement has been effected by the construction of drains in extension of the drainage scheme. From this improvement in drainage, better sanitary conditions must follow, and the district made more healthy and attractive.

41. *Small-pox.*—Of the large classes of population the highest mortality occurred amongst Hindu low-castes, 50 deaths equal to a mortality of 1·01. I do not refer to the small and uncertain population of Negro Africans although the highest death-rate occurred amongst them, 1 death giving a death-rate of 1·45, while 323 deaths or ·67 per cent. of the total number of deaths occurred amongst the mass of the Hindu population, the mortality being equal to ·79 per thousand. The mortality amongst Parsees was very favourable, being equal to ·10. The Mussulman mortality was relatively low, being ·34 per thousand.

42. Amongst the European population 4 deaths occurred.

Abstract of Monthly Returns of Vaccination by the Superintendent of Vaccination, Presidency Circle, Bombay, for the year 1888.

| Months. | Total number of persons examined by Vaccinators | SEX. | CASTE. | | | | | | | | | | | | | | | | | | AGE. | | | | | | | | | | | | RESULTS. | | | | | | | | | | | | | | | | | |

45. The hospital was in charge of Dr. Choksey. This is not the first time Dr. Choksey has had charge of special hospitals while small-pox and cholera were prevalent, and he has always ably managed them. The patients were made comfortable, and, I believe, the only complaint they made was of too much ventilation in the excellent open hospital sheds. There was not the slightest smell in the sheds, and the sanitary arrangements were as good as they could be. It cannot be expected that in a temporary hospital the luxuries of the great city charities can be found, but there was comfort, good food and much ventilation.

46. *Cholera*—The highest mortality occurred in the following six sections: Mazagon, Colaba Upper, Esplanade, Girgaum, 1st Nagpada and Fanaswadi. In the previous Annual Report I referred to the decrease of cholera in Girgaum and in Fanaswadi. In this year there has been a resuscitation of cholera in Girgaum, but in Fanaswadi the prevalence of former years has not occurred. In one portion of Fanaswadi, in which cholera has been frequently epidemic, and in which many cases have always occurred when cholera was prevalent in Bombay, very few cases of cholera have occurred for some years. I refer to Zawba's cart, in former years mentioned in all reports as a place of cholera fatality. The improvements have been the removal of huts, the arrangement of other huts in lines, the construction of open drains and the removal of cesspools. It is instructive that while the population has increased, the number of cases of cholera has yearly decreased. The small mortality in 2nd Nagpada is remarkable, as this section is in a bad sanitary condition; but although the mortality from cholera is low, the mortality from other causes as measles and fevers is high. In both Nagpadas, insanitary conditions of dwellings and of drainage of the worst kind exist. The houses are overcrowded, badly ventilated, and badly drained. The drains in the streets are mere water channels built over, and which have to be opened frequently. As the lanes have to be broken frequently to clean the drains, they are in bad order. Eight of the deaths in Colaba occurred in the Lunatic Asylum, the ninth was of a servant in the Lunatic Asylum. Although the total mortality is higher than the previous year, it has decreased in the following sections:—Market, Chuckla, Dhobi Talao and Mahalakshmi.

TABLE SHOWING THE DEATHS AND DEATH-RATE FROM CHOLERA IN EACH LOCALITY DURING 1888.

47. The highest mortality occurred amongst Jains, Native Christians and the large class of the Hindu population. It is not necessary to refer to the Negro-African mortality as it was caused by 1 death. The mortality amongst Europeans, Parsees and Hindu low-castes is 10 less than in the previous year, and amongst Native Christians the same. Amongst Bhatias 3 cases occurred and ended fatally. The other two classes in which the highest fatality to cases occurred are Native Christians and Hindu out-castes ; the lowest amongst Europeans, Mussulman, Brahmins and Jains.

RETURN SHOWING THE NUMBER OF DEATHS FROM CHOLERA BY CLASSES DURING 1888.

Classes.	Population of 1881.	Number of Deaths.	Per 1,000 of Population.
Jains	17,218	17	0·98
Brahmins	35,428	12	0·33

* Annual increment of population calculated.

48. The first year of childhood has not been free from cholera fatality, but as in former years the mortality has been small, only 1 death occurred. Between 1 and 2 years there were no deaths. As in former years the mortality is less during early periods of life than during the later. Under 12 years of age, the mortality is ·15; and from 12 to 40, ·62. The male mortality is higher than the female as in the previous year.

	Total...	260	0·55	119	0·38	379	0·42*

* Annual increment of population calculated.

49. 538 cases of cholera came to my notice and 379 ended fatally. Of the 538 cases, 73 were born in Bombay and 454 were born somewhere out of Bombay; in the previous year 75 were born in Bombay

and 346 somewhere else. The percentage of deaths to attacks was 70·44. The fatality by sex is shown in the following table :—

	Attacked.	Died.	Percentage of deaths to attack.
Males	367	260	70·8
Females	171	119	69·5

50. In the former year the fatality amongst females was higher than amongst males. In the following table the mortality by place of birth is shown. The influence of the immigrant population on incidence of cholera is indicated in the table; 84·3 per cent. of the total cases were strangers. The great labouring mass rolling towards this city is increasing. It seems as if the labouring population who toil, and the poor who do not toil, were increasing enormously. The industrial prosperity of the city is attracting enormous numbers of the poor and indigent who can only profit indirectly by the general prosperity. If the length of residence is grouped into two periods under 3 months, the following results are found :—

	Cases.	Deaths.
Under 3 months	135	85
Under 6 months	88	61

51. A large number of cases amongst well-water drinkers has occurred. In former years the returns indicated that the use of well-water was becoming less common ; the returns now indicate that it is increasing. In the past year owing to increase of population and less pipe water relatively to population, the use of well-water was more general than before. A classification of cases of cholera according to water-supply gives the following results :—

	Attacked.	Died.	Percentage of deaths to attack.
Vehar and Tulsi Water consumers...	397	297	74·8
Well-water drinkers	62	33	53·2
Unknown	79	49	62·02

52. An examination of the dwellings of those who suffered from cholera gives very interesting information. As many as 396 of the cases, *i.e.* 73·60 per cent., lived on ground-floors. In the previous year 61·59 per cent. lived on ground-floors. The number on ground-floors who suffered from cholera was more than in 1887, but the number on the 1st and 2nd floors was less, although the total number of cases of cholera was 538 in 1888, whereas in 1887 the total number was 427. While 73·60 per cent. of the cases occurred on ground-floors and 14·49 per cent. on the 1st and 2nd floors, it has to be remembered that the percentage of ground-floors to all houses is 40·01 and of 1st floors 26·34.

53. The figures show a connection between residence and material conditions and the incidence of cholera and indicate that persons living on ground floors and who are poor are most susceptible to cholera. It has to be remembered that persons living on ground-floors are generally of the poorer classes and the conditions of dwelling amidst which the poor live and the conditions that control their lives are not so favourable to

vitality as the conditions under which the classes of more opulence who reside on the higher floors live. The condition of dwelling mostly observed during the last year where cases of cholera occurred is dampness—dampness from imperfect drainage and imperfect ventilation, the condition of life found influencing most of the cases—bad dwelling and bad living—and this has always been so in Bombay.

54. The average number of persons to a room is 3·5, and to a house 59·5. The house crowding is fearful, and the contamination from it terrible. Overcrowding is a condition most difficult to influence in this city. In the last Annual Report I wrote that it appeared to me that it is not practically possible to prevent overcrowding, but although it may not be possible to prevent overcrowding, the effects of overcrowding may be made less hurtful by more openings for the escape of foul air and the entrance of pure air.

* There are 7 cases in Tarwaree section, registered as having been treated in the J. J. Hospital.

55. During this year an extraordinary importation of cholera cases occurred. On Monday, the 2nd of April, 23 persons returning from a pilgrimage were landed without the knowledge of the Harbour Authorities from the S.S. "Bhownugger," ill from choleraic symptoms and diarrhœa. On the 6th April I found 15 of the passengers ill from cholera in a Dharamshala where they had gone to live. There were 100 other persons in that Dharamshala, four in a building in which there were 715 people, two in a building in which there is a school; and of the children in that school, two were attacked within three days of the arrival of the passengers and one died, three in a house in which there were 160 other persons, and one in a house in which there were 152 other persons. The buildings to which the pilgrims had gone, and in which they were suffering from cholera, were close to each other. I have never seen a more appalling sight than the 15 persons ill from cholera in the hall of the Dharamshala. They were of all ages and of both sexes. I at once wrote to the Health Officer of the Port.

56. Our attention was drawn to the cases by the people living near them, for the occurrence of so many cases had caused some alarm. On making enquiries from pilgrims who had been passengers on board the steamer, and who were not ill, we were informed that deaths had occurred on board the steamer, and other deaths had occurred amongst the pilgrims at the place of pilgrimage, and also while the pilgrims were waiting to embark at Bhownugger on the S.S. "Bhownugger."

57. The facts appear to be as follows :—About 200 passengers had embarked on board the S.S. "Bhownugger," but some of them were sent ashore, because they were ill from cholera, and between Bhownugger and Bombay one male and two females died and their bodies were cast overboard. The master of the vessel was prosecuted by Government, and we gave evidence, and he was fined Rs. 200. The excuse which the master put forward was, that he thought that somebody would have reported what he should have reported himself—the occurrence of the cases. The concealment of the cases was bad enough, but the departure of the steamer from Bombay to Bhownuggar with other passsengers without having been disinfected aggravated the offence.

58. Had it not been for the vigilance of Inspector Glover, the cases would not have been discovered so soon as they were, and the prompt measures taken would not have been possible. It is remarkable that from the time of the importation of the cases by the S.S. "Bhownugger," cholera was more prevalent; there were only two deaths from cholera in the week ending 20th March, one in the week ending 27th March, and two in the week ending 3rd April, while there were 8 in the week ending 10th April, 8 in the week ending 17th April, and 10 in the week ending 24th April.

59. This is not the only case of importation of cholera cases, but in the second case the steamer was disinfected before leaving the port.

60. The plan and table indicate the course of the cases of cholera in Ghorapdev and give interesting information. The figures in red show the order of occurrence.

61. *Fevers.*—The mortality from fevers is 479 more than the average, and the death-rate is 7·45 against 6·36 in 1887. In 1886 there was a remarkable reduction in the mortality from fevers; 5,820 deaths were registered, being 822 less than in the year before; and in 1887 there was a further reduction in the mortality from fevers, 208 deaths less than in 1886 being registered. The increase of mortality is chiefly amongst Hindu low-castes and Hindu out-castes; amongst Brahmins the number of deaths is the same, but the rate of mortality is less; amongst Europeans, Jews, Bhatias and Lingaets the mortality is less than in the previous year. Of the total deaths from fevers, 5,001 were referred to remittent fever, being 283 more than the average; 250 were ascribed to ague, being 16 more than the average; 1,381 were referred to simple continued fever, being 188 more than the average; 10 were ascribed to enteric fever, being 7 less than the average.

62. The incidence by race of the fever mortality has nearly the same direction as in the previous year. Excluding Negro-Africans, the highest mortality has been registered amongst Jains and Hindu low-castes, and the lowest amongst Europeans and Parsees. The mortality amongst the small class of Lingaets is low, but the class is a small one having only a population of 1,167. The European mortality from fevers is less than half the number of deaths in 1887. The deaths amongst Brahmins are the same as in the previous year, but the mortality is less, allowing for the increase of population. The fatality of Mussulman from fevers is a little more, being 8·74 against 8·07 in the previous year.

RETURN SHOWING THE NUMBER OF DEATHS FROM FEVERS AND THE RATE OF MORTALITY IN 1888.

Classes.	Population.	Number of Deaths.	Rate of Mortality per 1,000 of Population.

* Annual increment of population calculated.

63. The mortality from fevers is higher amongst females than males. The greater mortality from fevers amongst females has been observed in former years; while the female mortality is 9·93, the male death-rate is 7·7. As in former years the fatality from febrile conditions is high during the first year of life. The mortality of male children under 1 year is higher than of females, and this unequal distribution of mortality by sex has been observed in former years. Between the first and eight years, the mortality of male and female children is more nearly equal than in the earlier periods of life. From 8 to 41 the mortality of females is higher than of males, but over 40 the female mortality relatively decreases and at some life periods is less than of males.

TABLE SHOWING THE RATE OF MORTALITY FROM FEVERS AMONGST MALES AND FEMALES AT DIFFERENT PERIODS OF LIFE.

Ages.	Mortality from Fevers.

64. It is noteworthy that the increased mortality from fevers is chiefly in the suburbs and in the districts in which the population has rapidly advanced, and in which the advance of population has been greater than the advance of works and of channels to carry away the refuse and liquids brought to these districts in pipes. In some of the most densely populated portions of the city the mortality is less than in the previous year. In the Fort North and South, Esplanade, Chuckla and Bhuleshwar the mortality is less than in the previous year, but in the districts in which the population has most rapidly advanced and the drainage is worst, the mortality has increased most; the incidence of mortality by districts indicates that the absence of drainage with expanding population is the chief cause in districts in which there is an influx of population. The expansion of population has to be remembered; but however great the expansion may be, it has not influenced most the high fever mortality. The highest mortality has been registered in Parel, a section in which the highest fever death-rate was registered in the previous year. Sewri occupies the second place in the fever death-rate. In Parel and Sewri there are no drains, the liquid refuse is absorbed in the soil, and there is great sewage pollution; in Parel the drainage which is not absorbed near dwellings flows to trenches by the side of the railway embankments; these trenches are a cesspool from the north to the south—a foul boundary. And beyond sewage pollution there is a rapidly expanding population. In Sewri five new mills are being constructed. In the suburbs where the mortality from fevers ought to be low it is high, and it is to be apprehended that with increasing population the mortality will increase. The great sanitary defect in the suburbs is the absence of drainage. Here is the result that the mortality from fevers in some of the most densely populated portions of the city—some having good drains and some having bad drains—is less than in sparsely populated districts having no drains. In 1886 the highest mortality from fevers occurred in Chuckla, a very densely populated district. In the following year Chuckla occupied the second place having a mortality of 11·28, and in the past year the mortality in Chuckla has further decreased a little, being 10·74 against 11·28. Where Sewri and Tarwadi join, there are trenches or ditches, some dug by the Health Department; these trenches and ditches overflow on to the foreshore, and were it not for them there would be most fearful nuisances. There are pools of sewage, and from these pools trenches to the foreshore have been dug. When the sewage in the pools increases, the trenches carry away the overflow. In the northern portion of the Island there are fearful nuisances from want of drainage; near the sea the nuisance is less because of natural drainage, but where there is not natural drainage, the sewage oozes to lower level and pollutes the ground. A fearful nuisance has been caused at Ghorupdev, and were it not for the overflow and escape of sewage to the sea, Ghorupdev would be in a fearful state. To the east of Ghorupdev there are great sewage pools oozing seawards.

65. The high mortality in Kamathipura is influenced by the large proportion of out-castes in that section. 22·23 per cent. of the out-caste population lived in Kamathipura in 1881, and the mortality from fevers amongst Hindu out-castes is much higher than in any other class.

66. The following diagram shows the mortality from fevers for a number of years before and after the famine period of 1877, and indicates the influence of abnormal seasonal condition on the balance of public health. The diagram traces the influence on public health of conditions without the city and beyond complete control, and indicates the recurrence of abnormal atmospheric conditions of a former period of distress.

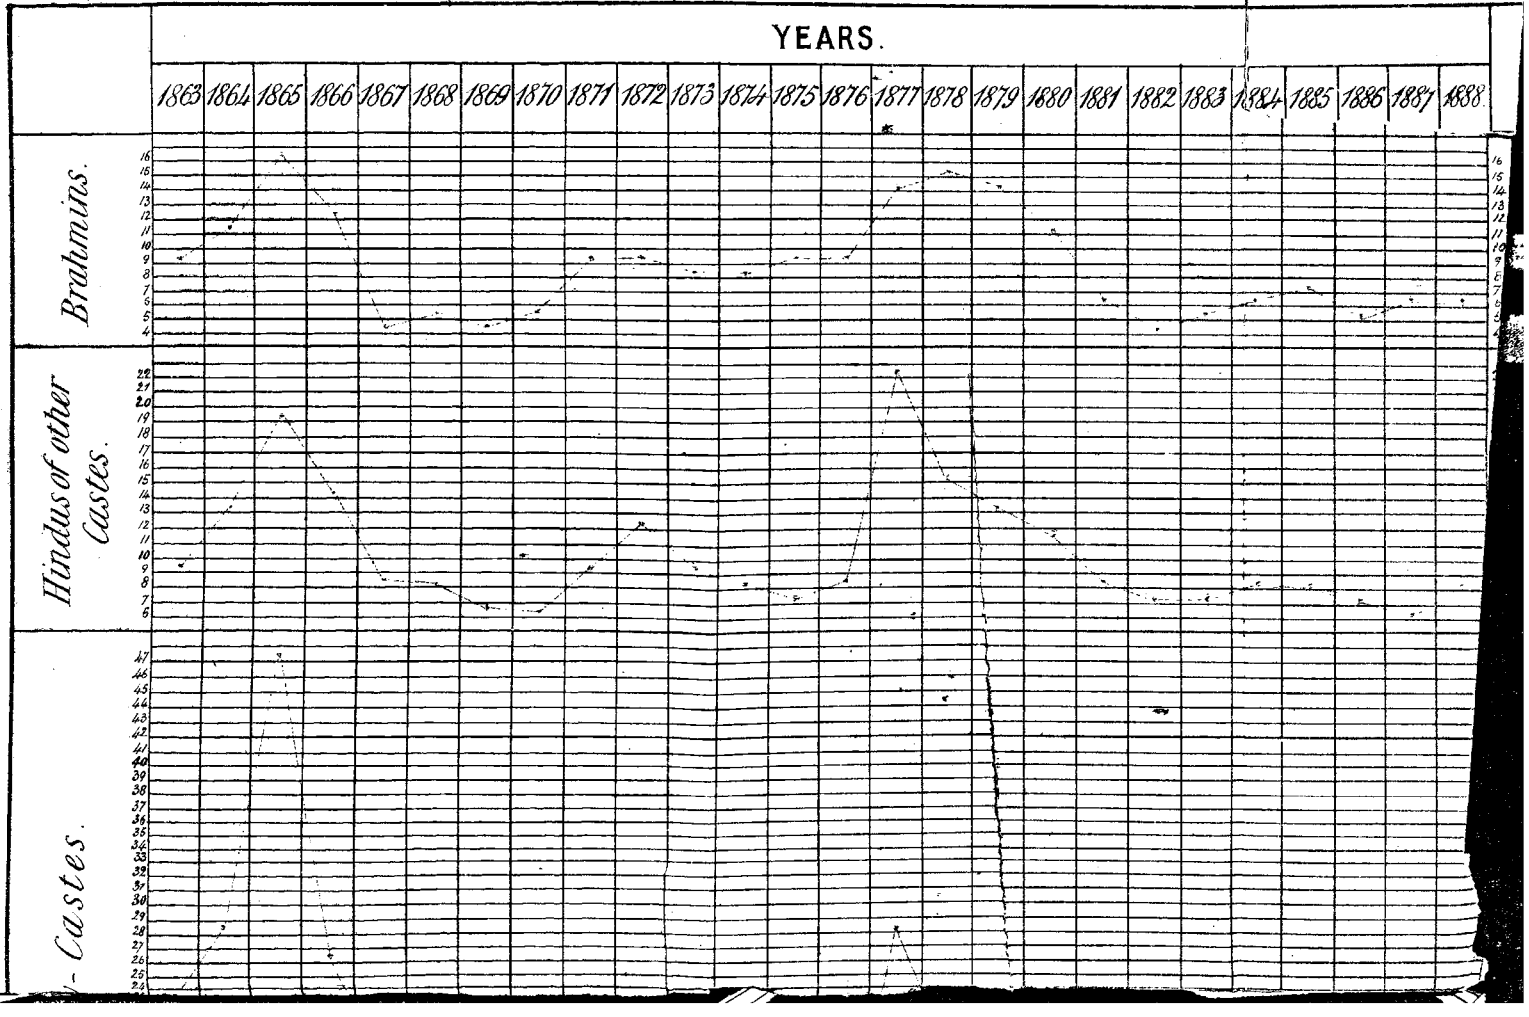
DIAGRAM.

DIAGRAM – Showing mortality from Fevers by class and rain fall in different



67. The mortality from phthisis is 25 more than in the last year, but 177 less than the average of the five previous years. The six sections in which the highest mortality occurred in 1887 are also the six sections in which the highest mortality has occurred in 1888. This is remarkable, and the sanitary value of this record as an indication of unwholesome conditions cannot be misunderstood. The six sections are—2nd Nagpada, Chuckla, Bhuleshwar, Umerkhari, Khara Talao, and Girgaum. Excluding the last section which is Girgaum, the other sections are densely populated. In the following table the street and house crowding in each of the six sections of highest phthisical mortality may be seen :—

Pro. No.	Sections.	Rate of mortality per 1000 of population.	No. of persons to a house.
1	2nd Nagpada	9·35	67·18
2	Chuckla...	6·85	33·43
3	Bhuleshwar	5·95	23·16
4	Umarkhari	5·45	32·53
5	Khara Talao	5·05	19·24
6	Girgaum	4·54	23·38

68. The section of Kamathipura which had descended to the 8th place in 1887 in the phthisical record has again ascended to the 7th place on 1888. In the previous five years there had been a progressive fall in the phthisical mortality in Kamathipura :—

1883	6·18
1884	5·69
1885	4·99
1886	4·32
1887	4·00

69. I would urge that the system of drainage and house connections be completed and extended over Kamathipura. One of the most populous and one of the most unwholesome streets to which the system of drainage has not yet been extended is Duncan Road. It is necessary that the drainage of Kamathipura should be completed, and I hope to see the section of Kamathipura as a registration unit of drainage complete. Until the drainage of the section has been completed it is not possible to estimate the effect of the system of drainage on the health of the people. There is the disturbing factor of an increasing population and secondly an incomplete system of drainage; the old system has not been completely removed nor has the new system been completed. It is unsatisfactory because great improvements have been made, but it is not possible to appraise these improvements.

70. The mortality from diseases of the digestive system is 37 more than in the last year and 57 more than the average. 2,265 deaths were registered. Of the deaths from diseases of the digestive system, 1,006 were referred to diarrhœa, being 64 less than in the last year and 50 less than the average; 710 were ascribed to dysentery, being 140 more than in the last year and 120 more than the average. To all other diseases of the digestive system 549 deaths were referred, being 39 less than in the last year and 15 less than the average.

71. To diseases of the respiratory system 4,132 deaths were referred, being 266 more than in the last year, and 412 more than the average. Of the deaths from diseases of the respiratory system, 2,613 were referred to bronchitis, being 238 more than in the last year and 352 more than the average; 853 were referred to pneumonia, being 13 less than in the last year, and 122 less than the average. The increasing mortality from diseases of the respiratory system indicates the increasing insanitary conditions within and without buildings in many portions of the City. In the previous year there had been an increased mortality from diseases of the respiratory system. The only possible interpretation of the increasing mortality is that house sanitation is not progressing with the population; not only are many insanitary buildings erected, but buildings already insanitary have been made more insanitary in the desire to enclose space and house more people. Open space left round buildings is being contracted, and in the future there will be less open space within and outside buildings than there has been left in the past. I apprehend, unless more real protection can be given, an increasing accumulation of house population and an increasing mortality from diseases of the respiratory system.

72. The mortality from diseases of the nervous system is 15 less than in the last year and 330 less than the average; 1,966 deaths were registered from diseases of the nervous system.

73. 159 deaths were registered from diseases of the circulatory system, being 10 less than in the last year and 2 less than the average.

74. 65 deaths were ascribed to affections of the urinary system, being 5 less than in the last year and 3 more than the average.

75. From diseases of the generative system 222 deaths were registered, being 16 more than in the last year and 31 more than the average.

76. To diseases of the organs of locomotion and cellular tissue 79 deaths were referred, being 18 less than in the last year and 16 less than the average.

77. 19 deaths from affections of cutaneous system were registered, being 4 more than in the last year and 11 less than the average.

78. To dropsy 120 deaths were referred, being 29 more than in the last year and 14 more than the average.

79. There is an increase in the mortality from leprosy; 80 deaths were registered, being 8 more than in the last year and 6 more than the average.

80. If the increased mortality from leprosy is read with the increased mortality from debility and old age, it indicates a serious immigration of disease-susceptible and disease-producing elements.

81. As many as 1,660 deaths were ascribed to debility and old age, being 328 more than in the last year and 380 more than the average.

82. In the last Annual Report, referring to the small increase during 1886 in the mortality from old age and debility, I wrote: "The increasing number of deaths ascribed to old age and debility "indicates the increasing number of poor strangers in this city." During the last year the health of the population has been influenced not only by the fluctuation of population following on normal conditions of development, but by the fluctuation of population following on scarcity or too little rain.

83. In 1877 following on famine there was an immigration of famine-stricken into this city and a great increase in the deaths from debility, and in 1888 as in 1877 a scarcity of food has been followed by an immigration of the poor and an increase of mortality.

84. 385 deaths were registered from accidents and violence, being 21 more than in the last year and 31 more than the average. 72 were referred to poisoning, being 5 more than in the last year and 13 more than the average; of the deaths from poisoning, 30 were reported to be accidental and 41 suicidal. 7 deaths occurred from snake-bite against 3 in the previous year. 98 deaths were referred to drowning, being 12 more than in the last year and 6 more than the average. Of the deaths from drowning, 26 were reported to be accidental and 48 suicidal.

85. The suicides by drowning were reported to have occurred under the following circumstances :—

(1)	Jumping into a well	26	
(2)	Do. Tanks	15	
(3)	Do. Basin		
(4)	Do. Reservoir		

86. Of the dead, 15,319 were buried, 7,071 burnt and 1,213 carried to the Tower of Silence.

87. The number of births is, with one exception, the largest number yet registered in any one year. 16,760 births against 15,429 in the year before were registered, equal to a birth-rate of 21·67. This improvement is satisfactory. Of the living births, 8,669 were males and 8,091 females. The birth-rate fluctuates very much according to class and according to sections. The birth-rate amongst Eurasians is over 81 per thousand, Jains 33·62, Jews 40·95, and Parsees 30·88. In sections it is as high as 46·39 in Parel and 44·49 in 1st Nagpada.

88. The total expenditure on the Health Department came to Rs. 10,22,930-3-0; while the income of the Health Department amounted to Rs. 4,63,365-14-4.

89. The actual cost of the Health Department to the Municipality was Rs. 5,59,564-4-8 against Rs. 5,24,684-11-2 in 1887.

90. On an average 3,974 men and women and 665 scavengering and drain carts and 158 night-soil and cesspool carts were at work each day.

91. The collection of garbage or kutchra is greater than in the previous year by 49 tons a day; 300,249 tons of garbage, equal to 822 tons a day, were collected and removed and disposed of against 282,200 tons in 1887.

92. 127,287 tons of night-soil, equal to 348 tons a day, were collected and removed against 120,841 tons in 1887.

93. 207 miles of covered drains were opened and cleaned against 211 in 1887.

94. 4,240 notices and 6,887 summonses were issued against 5,218 notices and 5,956 summonses in 1887. The amount of fines recovered amounted to Rs. 2,107-4-0 against Rs. 1,928-0-0 in 1887.

95. The number of licenses granted amounted to 5,530, and the amount recovered on account of licenses fees, Rs. 29,638-4-0. The annexed table A will show the details of the licenses.

96. For the use of the Public Dhobeewada, Rs. 11,840-0-0 were recovered against Rs. 11,688 in 1887.

97. In the table following will be found a record of the important work done during the year 1888;—

1887.			Details.	1888.

Appendix A.

AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1888.

TABLE showing for the year 1888 the Sums of Velocities, in miles per hour, of the Winds which blew in each month, from each of the Sixteen Principal Directions, and also the number of Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Winds (as to directions) in the several months, and of different Winds during the same month.

1888.	N.			NNE.			NE.			ENE.			E.			ESE.			SE.			SSE.

2.—MARKETS.

APPENDED hereto are tabulated Statements Nos. 1, 2, 3, 4 and 5 in numerical order.

Statement No. 1 gives the number of Markets with the amount of fees received from squatters and stall-holders in each Market, together with the amount of slaughter fees, &c., derived from each slaughter house during the year under report, and showing the increase and decrease in the total amount of Market and slaughter house fees compared with those of 1887-88.

Statement No. 2 shows the number of animals slaughtered during the twelve months, *viz.* from April 1888 to March 1889, at Bandora and in Bombay, for public and private purposes.

Statement No. 3 shows the amount of revenue derived from the Markets and slaughter houses during the last ten years, *viz.* from 1879 to 1888-89.

Statement No. 4 is a record of the quantity of unwholesome food destroyed during the year 1888-89.

Statement No. 5 shows the number of convictions by the Presidency Magistrates under the Municipal Acts and By-Laws during the year under report.

Remarks on Statements Nos. 1, 2, 3, 4 and 5.

2. In reference to Statement No. 1, it will be observed that there is an increase of Rs. 822-2-6 in the Fort Market. This is attributed partly to the right of collecting squatters' fees having been sold by public auction at a higher rate than in the preceding year, partly to a number of stalls which were vacant during the preceding year being occupied during the year under report, and partly to the rents of many of the stalls having been increased.

The increase of Rs. 721-8-8 in the Arthur Crawford Beef Market is partly due to a number of stalls which were vacant during the preceding year being occupied during the year under report, and partly to the rents of some of the stalls having been increased.

In the same way there is an increase of Rs. 1,239-10-4 in the Arthur Crawford Fish and Mutton Market, due partly to the right of collecting squatters' fees having been sold for a higher sum than in the preceding year, partly to a number of stalls which were vacant during the preceding year being occupied during the year under report, and partly to the rents of some of the stalls having been increased.

The increase of Rs. 5,794-11-4 in the Arthur Crawford Fruit and Vegetable Market is due to the rents of many of the stalls having been increased, and to the shifting of some of the people to other vacant stalls in other sections of the Market during the year under report.

There is a decrease of Rs. 905-8-0 in the Godown Rent owing to the godowns being destroyed by fire on the 29th January 1888; but the decrease would have been double that amount had not nearly all the old occupiers agreed to pay and did pay half the monthly rent of their godowns during the twelve months while they were under reconstruction.

The increase of Rs. 460 in the Fowl Rooms Rent is due to their rents being increased during the year under report.

There is an increase of Rs. 1,158-6-0 in the Erskine Road Fish and Mutton Market. This is due partly to the right of collecting squatters' fees having been sold by public auction at higher rate than in the preceding year, and partly to the rents of many of the stalls having been increased.

An increase of Rs. 5,830-6-9 is shown in the Erskine Road Fruit and Vegetable Market. This is chiefly due to the taking up and pulling down of Mr. Chhabildass' chawl which was formerly used as general shops.

There is an increase of Rs. 372-15-1 shown in the Bhuleshwar Market; this is due to the rents of many of the stalls having been increased and the number of squatters located under the eaves of the Market in 1st Bhoiwada Street during the year under report.

The increase of Rs. 29-4-0 in the Pedder Market is due to the right of collecting squatters' fees having been sold at a higher rate than in the preceding year.

There is a decrease of Rs. 5-5-0 under the head of Prices Current forms; this is due to the very few forms being purchased by private persons and Dubashees owing to the publication of Market prices in the *Bombay Gazette* twice or thrice in a week.

The increase of Rs. 170-10-8 in the contribution of private Markets owners is due to the opening of the new Market at Dhobitalao, called Adamjee Peerbhoy's Market.

The Miscellaneous heading shows an increase of annas 8 on account of garden produce during the year under report.

The Miscellaneous heading also shows an increase of Rs. 31-0-6 in the amount of proceeds of articles found in the Market, and also a decrease of Rs. 203 due to the removal of Telephone Exchange from Arthur Crawford Market office and to the amount of Inspection fees, and fees for attending courts having been less than in the preceding year.

There is an increase of Rs. 4,448-1-0 in the Slaughter Fees owing to a greater number of animals having been slaughtered during the year under report.

Compared with the last year there is a decrease of Rs. 475-8-0 in the License Fees received from butchers, this is due to a reduction in the number of licenses issued to hawkers, outside shop-keepers, Cammattoos and a less number of dealers attending at the Bandora Fairs ground.

The increase of Rs. 706-8-0 under the head of Chawl Rent is due to the rent of the chawl having been increased during the year under report.

The Fair Ground Rent and Feeding Fees show a decrease of Rs. 2,244-8-0 ; this is due to the right of collecting the rent having been sold by public auction at a lower rate than in the preceding year.

The increase of Rs. 25 under the head of Revenue from Toddy trees at Bandora is due to the amount of the preceding year having been recovered during the year under report.

There is a decrease of Rs. 10 under the head of Revenue for the right of catching fish in the quarry holes in the compound. This is attributable to the quarry holes having been filled up during the year.

Under Miscellaneous headings (Slaughter Houses), there is an increase of Rs. 33-14-0; this is on account of the proceeds of the sale of unclaimed animals found during the year, and meat-van bullocks having been sold at a higher rate than in the preceding year.

After deducting the total decrease of Rs. 3,843-13-0 for the whole year under report from the total increase of Rs. 21,844-10-10 under all heads, there is still a net increase of Rs. 18,000-13-10 for the whole year. The total amount of Revenue from Markets and slaughter houses for the year under report is Rs. 3,22,517-6-8 against Rs. 3,04,516-8-10, for the same period of 1887-88.

3. Statement No. 2 shows the number of buffaloes, bullocks, cows, calves, sheep, goats and pigs slaughtered for the Bombay Markets ; also the number of sheep and goats slaughtered for Mahim and Bandora ; the number of horned cattle as well as sheep and goats, slaughtered by the Commissariat Department ; the number of horned cattle, sheep and goats brought alive into Bombay for slaughter for religious purposes, &c., during the year under report.

4. Statement No. 3 is a comparative statement showing the amounts received under the different headings of Markets and slaughter houses revenue during the last ten years, *viz.* from 1879 to 1888-89.

The causes for increases and decreases are already explained in Statement No. 1.

5. Statement No. 4 gives the total amount of unwholesome food destroyed during the year, which amounts to 68 tons, 9 cwt. 0 qr. and 5 lbs. against 23 tons, 4 cwt. and 4 lbs. for the preceding year.

6. Statement No. 5 shows the number of convictions obtained before the Presidency Magistrates under the Municipal Acts and By-Laws during the year. The total number of convictions were 23 against 110 in the preceding year, and the amount of fines is Rs. 269 against Rs. 541-4-0.

There is a serious falling off in the number of convictions for breaches of the Municipal Acts and By-Laws relating to the Markets and slaughter houses, owing to the Presidency Magistrate forcing us to proceed in all cases by Summonses, large number of which cannot be served on the defendants as they generally give wrong names and addresses, and when we do succeed in serving some of them, they refuse to attend the Courts, knowing that the Magistrates will not grant warrants for their arrest, and the Police cannot give any assistance as our cases are not cognizable offences, so that we actually have no remedy.

7. During the year under report European fruit and vegetables were plentiful, large, good and cheap in the Bombay Markets. Native fruits and vegetables were also plentiful and cheap as usual.

In June 1888, four baskets of Peshawar apples were imported for the Markets. They were large, but watery and insipid.

In August 1888, six baskets of Almora apples were imported from General Ramsay's estate. They were small and equal to English russets.

In October 1888, 130 baskets of Muscat sweet limes were imported from Bagdad; they were good, but very dear. Also 84 baskets of Verona apples were imported; as usual they fairly good.

In November 1888, cabbages, caulli flowers and beet were very scarce; but in December, January and February they were plentiful, large and cheap. Also in November 1888 were imported 724 boxes of Verona apples and 82 casks of Malta grapes for the markets.

In December 1888, 250 boxes of Verona apples were imported.

In January 1889, 1,110 boxes of Verona apples and 60 boxes of Cashmere apples were imported. Consequently the markets were well stocked, and apples were cheap.

In February 1889, Malta grapes were scarce. In the same month were imported 297 boxes of Verona apples also.

In March 1889, 290 boxes of Verona apples were imported. Nearly all these apples were imported by the well known French and Italian Dubash Mr. Eduljee Bamanjee.

APPENDICES.

3.—RETURN OF FIRES.

RETURN OF FIRES that occurred in the TOWN and ISLAND of BOMBAY, from 1st April 1888 to 31st March 1889.

No.	Date.	Locality.	Hour.	Nature of Property damaged or destroyed.	Names of Owners of Property destroyed.	Estimated Damage of Property destroyed.	Cause of Fire.	Remarks.
	1888.					Rs. a. p.		
1	4th April	At the back of Mombadevi Tank Road.	5-30 p.m.	6 bales of yarn	Nagari Nuthoobhoy and Walbhaji and Punja.	1,500 0 0	Accidental.	It was caused by some fire falling through from the floor above which is used for electro-plating.
2	9th „	Cumballa Hill.....	9 a.m.	A quantity of grass	Mr. Dady Cowasji Limji	100 0 0	Do.	Cause supposed to be spontaneous combustion.
3	15th „	At the junction of the Masjid Bunder Road and Memonwada Street.	12 midnight	A building	Beg Mahomed Abdul Rahimon	40,000 0 0	Do.	The cause of fire is attributed to the flames of a fire in a milkman's shop being in too close proximity to a wooden partition.
4	21st „	Lower Colaba	5-30 p.m.	A quantity of cotton.....	Dharsi Bhimji	300 0 0	Do.	Through some grit getting in the machinery.
5	24th „	Wodehouse Road...	11 a.m.	A quantity of sulphur...	Mr. Pepit, Supdt., B. B. & C. I. Railway.	8 0 0	Do.	Caused by ignition of some sulphur which was stored away in a corner of the tent.
6	24th „	In the bunker-hold of the S.S. Apollo	7-30 „	.....	.....	.....	Unknown.	
7	25th „	Angraswady in Lohar Street.	11 „	A chawl	Veerjivandas Mahadevji	5,000 0 0	Accidental.	The fire is attributed to the careless use of a fire-place.
8	27th „	Camatipura 9th Lane.	4 „	A box containing silk clothes.	Ramgiri Dilgir	10 0 0	Do.	The rat upset the naked parafin oil lamp which caused some clothes to ignite.
9	6th May	Market Line..... ..	3-45 „	A cudjan roofing	Mr. F. Clark	10 0 0	Do.	The cause of fire is put down to some passer by throwing a lighted *bidee* on the cudjan roofing.
10	10th „	Sankli Tank Road	10-30 p.m.	A jowli hut	Moolji Jetha	10 0 0	Do.	The cause of fire is attributed to the careless use of the fire-place.

No.	Date.	Locality.	Hour.	Nature of Property damaged or destroyed.	Names of Owners of Property destroyed.	Estimated Damage of Property destroyed.	Cause of Fire.	Remarks.
	1888.					Rs. a. p.		
11	13th May	Worli Coliwada...	10 p.m.	A quantity of grass	Haji Bhanji Khoja	150 0 0	Accidental.	It is supposed to have been caused by some one smoking close by.
12	18th „	Haines Road.....	12 Midnight	The whole of the south wing and half of the north wing of a chawl.	Gopal Govind	15,000 0 0	Do.	The cause of fire is attributed to careless *bidee* smoking.
13	20th „	In the compound of Messrs. W. Watson and Co.	Do.	Some packing cases	Messrs. W. Watson & Co.	0 8 0	Do.	It is supposed to have originated by some one carelessly throwing a lighted *bidee* amongst the packing straw in the boxes.
14	25th „	1st Carpenter Street	12 Noon.	A mat and a plank.....	Waman Shunker	1 14 0	Unknown.	
15	31st „	Colaba.....	12-30 p.m.	A quantity of cotton.....	The Bombay Cotton Press Co.	100 0 0	Accidental	It was caused through a stone getting into the machinery.
16	5th June	Chinch Bunder Road.	10-30 „	A bullock shed	Messrs. Mowji Dhunji and Lalji Ramji.	800 0 0	Do.	The origin of the fire is attributed to the explosion of a kerosine lamp.
17	21st „	Panjrapole Road...	6-30 „	A dhotur and whole of a tin of kerosine oil ...	Makunda Kuba	5 0 0	Do.	Makunda Kuba, while lighting a small kerosine lamp set fire to a Dhotur hanging on the wall and in attempting to extinguish it he let the lamp fall out of his hands into a tin of Kerosine oil which blazed up at once.
18	23rd July	Nowrojee Hill	1 a.m.	A jowli hut	Gungaram Limbaji... ..	25 0 0	Unknown.	
19	9th Aug.	Cursetjee Sooklajee Street.	12 night	A sofa and some clothes	Mary Goldenberg	150 0 0	Accidental.	A European, while under the influence of liquor, knocked down a kerosine oil lamp which set fire to a sopha.
20	9th „	Dharavi	8 a.m.	A hut.....	Mahadoo Khundoo.....	8 0 0	Do.	The hut caught fire while the owner was cooking.

No.	Date.	Locality.	Hour.	Nature of Property damaged or destroyed.	Names of Owners of Property destroyed.	Estimated Damage of Property destroyed.	Cause of Fire.	Remarks.
	1888.							
21	12th Aug.	Mody Bunder	6-30 a.m.	A stack of wood.....	Valji Premji	Rs. a. p. 500 0 0	Accidental.	Spontaneous combustion.
22	13th „	Do.	8 p.m.	Four stacks of wood... ..	Do. and 3 others	9,250 0 0	Unknown.	
23	17th „	Near the South Fence, Victoria Dock.	8-30 „	Some huts and coir ropes	Shiriput Wakoji contractor.	170 0 0	Accidental.	The huts were occupied by some Purdashis who were cooking their food inside, and a spark from their fire must have caught the rope.
24	19th „	Carnac Bunder.....	6 a.m.	A goods wagon containing some piece-goods &c.,	B. B. & C. I. Ry. Company	3,000 0 0	Do.	Spontaneous combustion.

To

H. W. BARROW, Esq.,

Municipal Secretary,

BOMBAY.

SIR,

In accordance with the 137th Section of the Bombay Municipal Act III. of 1888, we have the honour to send in our Report on the whole of the Municipal Accounts for the official year 1888-89, for submission to the Standing Committee.

We have the honour to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

BOMBAY, 8*th October* 1889.

REPORT OF THE CONCURRENT AUDITORS ON THE MUNICIPAL ACCOUNTS FOR THE YEAR 1888-89.

THE Municipal Corporation, at their Special Meeting held on the 12th day of December 1887, having appointed us Concurrent Auditors to audit the Accounts of the Municipality for the year 1888-89, we have the honor to submit our report thereon for the information of the Standing Committee and of the Council.

2. The official year under report comprises twelve months, commencing from 1st April 1888 and ending on the 31st day of March 1889.

3. We have examined the whole of the vouchers and papers relating to Receipts and Disbursements and have compared the Day Book with General Ledger and Subsidiary Ledgers, Journal, Bank Receipts for Deposits, Investments of Loans and Building Funds, &c., and found them all in order.

4. In compliance with the direction of the Corporation contained in their Resolution passed on the 19th November 1888, and communicated to us by the Municipal Secretary in his letter No. 5374 of 1888-89, dated 30th November 1888, we have at the end of the financial year examined all Sinking Fund Investments proper to the year, and beg to certify that they have all been duly and properly made.

5. The number of Receipts and Disbursements Vouchers which have passed our scrutiny amounted in 1888-89 to 48,956 against 49,251 in 1887-88 and against 16,907 in 1876.

6. We have been able from our daily attendance on an average from four to five consecutive hours, owing to our work having greatly increased to keep the concurrent audit of the daily accounts as close up to date as they were booked.

7. In addition to the concurrent audit, we have examined weekly statements of receipts and disbursements of Municipal accounts at the end of each week before they were published in the *Government Gazette*. The accuracy of this weekly audit was further tested at the end of each month by our preparing a summary of all accounts *directly* from the General Ledger and independently of the weekly statements. The summary contained totals of receipts and disbursements of each account as it stood in the Ledger at the end of the last week in each month, and which totals were tallied with the aggregate total of each head of accounts given in the weekly statements of the month. By this method of scrutiny, any error or omission or a wrong posting of an item in the Ledger could not remain undetected for more than a month at the most.

8. The summary so prepared by us was forwarded every month to the Secretary for submission to the Standing Committee.

RECEIPTS.

9. The total receipts of the Municipal Fund from all sources, except Water Works Fund, amounted, during the 12 months ending 31st March 1889, to Rs. 40,01,558-5-8; and adding to this the income of Water Works Fund for the year, amounting to Rs. 9,64,634-1-2, the whole total of all receipts amounted to Rs. 49,66,192-6-10 (*vide*

Statement A of the Municipal Accounts given by the Chief Accountant at pages 40 and 41 of his Report).

10. The total receipts, compared with the total receipts of 1887-88, give an increase of Rs. 6,83,387-2-2.

EXPENDITURE.

11. The total expenditure of Municipal Fund and of Water Works Fund, during the 12 months ending 31st March 1889, amounted to Rs. 52,01,257-14-5 (*vide* Statement C). Out of this total, Rs. 37,92,956-15-11 were paid on account of the Municipal Fund only, including expenditure of all departments (except that of the Water Works) and payments made on account of Interest on Loans and Sinking Fund, and redemption of Municipal Debentures, less Rs. 72,715-14-11, which were debitable to Water Works Funds on account of General Superintendence.

12. Rs. 12,84,190-13-9 were disbursed on account of Water Works Fund, including the above-mentioned Rs. 72,715-14-11, and Rs. 1,87,632-8-8, which were paid towards the reduction of Water Works Loans (particulars as per margin), and Rs. 10,23,842-6-2 paid on account of the maintenance of Vehar Water Works, New Works, and interest on account of the Water Works Loans, including Rs. 27,288-13-9, being the interest on Tansa Loan invested in Government Papers, tallied as per margin.

Total ...Rs.	9,68,661	9	7
Less—Refunds and adjustment errors under sub-head	4,027	8	5
Total Receipts ...Rs.	9,64,634	1	2

18. *Consolidated Rate at 8 per cent.*—The total amount under this head, comprising *house*, *police*, and *lighting* rates and contribution from Government and Port Trust, amounted to Rs. 14,66,024-8-1 against Rs. 14,07,013-6-4 in 1887-88, being Rs. 59,011-1-9 more than the revenue last year, the increase being chiefly due to the payment of several consolidated bills which were disputed by the G. I. P. Railway Company, were fully paid by them in July last, and also on account of increased valuation and erection of a number of new large buildings and mills in the city.

Budget Estimate, Rs. 14,27,000.

19. Refunds amounted to Rs. 6,272-11-5 in 1888-89 against Rs. 5,428-7-1, being Rs. 844-4-4 more than paid in previous year.

20. Collections under this head recovered by the Collector and Assessor amounted to Rs. 12,39,994-2-5 for 1888-89, and Rs. 19,314-10-2 for previous years up to 1882 ; Government and Port Trust having paid the usual annual sums of Rs. 50,000 and Rs. 1,62,990 respectively.

21. *Wheel Tax* amounted to Rs. 3,00,360-6-0 in 1888-89 against Rs. 3,22,659-0-7, in 1887-88 being Rs. 22,298-10-7 less than the receipts of the previous year.

Budget Estimate, Rs. 3,06,000.

22. The Assessor and Collector recovered Rs. 1,75,850-14-0 for the year 1888-89 and Rs. 2,902-6-0 for previous years up to 1883-84, in all Rs. 1,78,753-4-0 against Rs. 1,72,454-11-0, being Rs. 6,298-5-0 more than the receipts of the preceding year. The Superintendent of Wheel Tax, however, collected only Rs. 1,21,633-2-0 in 1888-89 against Rs. 1,44,289-4-0 in 1887-88, being Rs. 22,656-2-0 less than the collections of the previous year.

23. The decrease is said to be owing to cartsmen and owners of public conveyances not applying for license at the commencement of the year, but prolonging their application until half the period of the year has expired, thereby evading payment of half the amount of their annual payment of the tax. The new Act, however, has been so framed, that they will not be able to evade any portion of their tax leviable upon them.

24. *Toll Fees* levied on carts which pass the Sion and Mahim Causeway, and collected by the officers of the Port Trust Department, amounted to Rs. 14,210-6-0 in 1888-89 against Rs. 14,333-8-0 in 1887-88, being Rs. 123 less than the receipts of the preceding year.

Budget Estimate, Rs. 15,800.

25. Establishment for collecting Toll Fees under the Traffic Manager amounted to Rs. 1,680-0-0, same as paid in last year.

26. *Liquor Licenses* amounted to Rs. 1,43,750, the usual annual instalment fixed by Government according to Section 63 of Act V. of 1878 in lieu of Liquor Licenses.

Budget Estimate, Rs. 1,43,750.

27. Representations have been made to Government by the Municipal Corporation in 1884 and 1885 to increase the amount of the annual instalment, submitting that this source of revenue had yielded to Government about Rs. 1,80,000 in 1884, and subsequently the revenue had increased to Rs. 2,56,000 in 1885 and to Rs. 3,00,000 in 1889. The Municipality had thereby been deprived of a portion of its share of the revenue derived from this source, and calculating from the year 1878 up to the present day, the Municipality had been a loser of nearly upwards of 11 lakhs of rupees. As no satisfactory reply has hitherto been received, it is, therefore, highly desirable that a further

respectful representation should again be made to Government, soliciting their favourable consideration on this subject and to allow the Municipality a reasonable increase in their annual instalment of Liquor Licenses.

28. *Land Conveyance Licenses.*—Under this head were collected Rs. 3,933-9-5 in 1888-89 against Rs. 4,049-12-9 in 1887-88, being Rs. 116-3-4 less than the receipts of the last year.

Budget Estimate, Rs. 4,200.

29. *Halalkhore Cess* yielded Rs. 3,90,038-9-5 in 1888-89 against Rs. 3,72,257-11-0 in 1887-88, being Rs. 17,780-14-5 more than the receipts of the last year. This increase was due to construction of new buildings, increase of rents, and partly due to enhancement in the rate charged for special service.

Budget Estimate, Rs. 3,71,000.

30. Collections recovered by the Assessor and Collector on account of Halalkhore Cess amounted to Rs. 3,83,062-8-11 for 1888-89 and Rs. 10,423-9-2 for previous years up to 1882, in all Rs. 3,93,486-2-1. The Health Officer collected Rs. 122-4-2, which increased the total to Rs. 3,93,608-6-3.

31. Out of this amount, refunds were paid amounting to Rs. 3,567-10-5 and Rs. 2-2-5 on account of adjustment of errors in sub-heads, in all Rs. 3,569-12-10 against Rs. 2,169-1-5 in 1887-88, being Rs. 1,400-11-5 less paid in 1888-89.

32. *Town Duties.*—The receipts under this head amounted to Rs. 16,04,227-11-0 in 1888-89 against Rs. 21,12,912-0-9 in 1887-88, being Rs. 5,08,684-5-9 less than the receipts of the previous year, mostly due to the reduction of rates levied on grain from 5 annas to 3 annas per candy ; also on sugar from 7 annas to 6 annas per cwt., and from 10 annas to 6 annas per maund on ghee ; at the same time the import of grain being less by about 3½ lakhs of candies, sugar being 1,83,074 cwts. and Ghee being about 40,000 maunds less imported than the previous year.

Budget Estimate, Rs. 7,89,000.

33. The decrease of Rs. 5,08,684-5-9 in the receipts of the Town Duties is explained as follows :—

		Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
Port Trust yielded ...	1887-88...	13,44,243 5 9		
	1888-89...	11,76,993 14 6		
			.....	1,67,249 4 3
B. B. & C. I. Ry. Co. ..	1887-88...	1,11,500 3 0		
	1888-89...	97,556 5 0		
			.....	13,943 14 0
G. I. P. Ry. Co.	1887-88...	6,57,168 11 0		
	1888-89...	3,29,677 7 6		
			.....	3,27,491 3 6
			Decrease...Rs.	5,08,684 5 9

34. Grain yielded Rs. 3,44,535 against Rs. 7,49,814 in 1887-88, being Rs. 4,05,279 less; Sugar yielded Rs. 4,41,980 against Rs. 5,95,739 in 1887-88, being Rs. 1,53,759 less; Ghee yielded Rs. 1,31,294 against Rs. 2,18,827 in 1887-88, being Rs. 87,533 less; and Firewood and Timber yielded Rs. 1,81,767 against Rs. 2,07,192 in 1887-88, being Rs. 25,425 less than the receipt of the last year; on the other hand, Petroleum yielded Rs. 2,30,271 in 1888-89 against Rs. 1,06,733 in 1887-88, being Rs. 1,23,538 *more*, and Beer, Wines and Spirits yielded Rs. 2,576 *more* than the receipts of the previous year.

35. *Refunds of Town Duties* amounted to Rs. 8,78,330-8-0 in 1888-89 against Rs. 11,16,161-12-0 in 1887-88, being Rs. 2,37,831-4-0 less than refunds paid in previous year.

36. Charges on account of commission paid for collecting Town Duties, including collection of extra Town Duty for Tansa, amounted to Rs. 58,197-4-11 in 1888-89 against Rs. 72,265-2-7 in 1887-88, being Rs. 14,067-13-8 less paid than in preceding year.

37. *Tobacco Duty Licenses.*—Receipts under this head amounted to Rs. 1,91,296-11-4 in 1888-89 against Rs. 1,84,168-4-8 in 1887-88, being Rs. 7,128-6-8 more than the receipts of the preceding year.

Budget Estimate, Rs. 1,80,000.

38. *Tobacco Duty Establishment.*—The Commissioner of Customs was paid Rs. 17,571-4-3 in 1888-89, being his charges for the collection of this revenue, against Rs. 18,812-10-8 in 1887-88, being Rs. 1,241-6-5 less paid than in the previous year.

39. *Market and Slaughter-house Receipts.*—Receipts for 1888-89 under this head, amounted to Rs. 3,02,163-6-7 against Rs. 2,88,690-1-0 in 1887-88, being Rs. 13,473-5-7 more than the receipts of the previous year.

Budget Estimate, Rs. 2,70,600.

40. The increase in the receipts was chiefly derived from Slaughter Fees on account of larger number of animals slaughtered; Stall Rents, owing to increased number of stalls and enhancement in their rents; Squatters' Fees, chiefly from the extension of Erskine Road Market, commonly called the Null Bazar Market; and Fees received for weighing goods at the Municipal Scales at the Arthur Crawford Markets. On the other hand, there was a fall in the revenue derived from Fair Ground and Feeding Charges and License Fees.

41. The particulars of increase are given under separate sub-heads as follows :—

Particulars.	Year.	Receipts. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
1 Slaughter Fees	1888-89	95,386 11 0		
	1887-88	90,938 10 0	4,448 1 0	.....

42. *Market and Slaughter-house Establishment.*—The expenditure incurred on account of this establishment amounted to Rs. 1,37,117-2-0 in 1888-89 against Rs. 1,07,660-2-10 in 1887-88, being Rs. 29,456-15-2 more than the expenditure of the preceding year, chiefly on account of the re-construction of godowns destroyed by a fire. The particulars of increase are given below :—

Budget Estimate, Rs. 1,43,145-12-0.

Particulars.	Year.	Expenditure. Rs.	a.	p.	Increase. Rs.	a.	p.	Decrease. Rs.	a.	p.
1. Superintendence ...	1887-88	13,821	11	0

				Total...Rs.	36,248	4	7	6,791	5	5
				Deduct—Decrease ... „	6,791	5	5			
				Net Increase...Rs.	29,456	15	2			

43. *Contribution from Municipal Servants towards Pensions, &c., Fund* amounted to Rs. 14,844-8-10 in 1888-89 against Rs. 15,542-13-3 in 1887-88, being Rs. 698-4-5 less than the receipts of the previous year. Compared with the Budget Estimate, the contributions exceeded the estimate by Rs. 4,844-8-10, and the Chief Accountant explains that out of this excess about Rs. 2,300 were due to an under-estimate of this source of income, and Rs. 500 were recovered on increased salaries, and about Rs. 2,000 on account of contributions in arrears of the Assessment and Fire Brigade Establishments.

Budget Estimate, Rs. 10,000.

44. *Tramway Rent* yielded Rs. 36,192-3-10 in 1888-89 against Rs. 35,919-2-0 in 1887-88, being Rs. 273-1-10 more than the receipts of the previous year. We believe this small increase is still due, as it was in 1887-88 to the extension of the Tramway Lines from the Mint Road to the junction of the Frere and Carnac Roads, inasmuch as this extension yielded last year Rs. 5,193 more than the receipts of 1886-87.

Budget Estimate, Rs. 35,500.

45. *Contribution from Fire Insurance Companies* amounted to Rs. 34,708 in 1888-89 against Rs. 37,856-8-0 in 1887-88, being Rs. 3 148-8-0 less than the receipts of the preceding year. Compared

Budget Estimate, Rs. 32,000.

with the Budget Estimate, the actual receipts exceeded the anticipated income by Rs. 2,708.

46. *Miscellaneous Fines and Penalties* amounted to Rs. 6,731-10-10 in 1888-89 against Rs. 9,213-2-7 in 1887-88, being Rs. 2,481-7-9 less than the receipts of the previous year. The decrease was chiefly due to the remission sanctioned in 1885 of a fine of Rs. 2,000 inflicted on the Bhandarwada Contractors in 1883 for the non-completion of their contract within the prescribed time, and which was adjusted only last year.

Budget Estimate, Rs. 8,600.

47. *Miscellaneous Fees* amounted to Rs. 81,207-14-5 in 1888-89 against Rs. 90,068-7-9 in 1887-88, being Rs. 8,860-9-4 less than the receipts of the preceding year, chiefly on account of Engineers' and Police Commissioner's Fees.

Budget Estimate, Rs. 81,000.

48. It will be seen that there was a falling off of fees in the Assessor and Collector's Department, amounting to Rs. 855-11-3, being Rs. 399 less on account of Battakee, Rs. 101 less on account of inspection, Rs. 315 less on account of Notice, and Rs. 36 on account of Warrant.

49. In the Municipal Engineer's Department, the falling off of fees amounted to Rs. 5,596-0-1, being Rs. 1,411 less on account of projecting galleries ; Rs. 4,612 less on account of projecting rewas ; Rs. 851 less on scaffolding ; and Rs. 69 less on account of supplying copies of office records ; on the other hand there was an increase of Rs. 286 in the fees received for constructing and cleaning drains ; Rs. 41 in weather-frames, and Rs. 1,020 being fees charged to the public for occupying public roads.

50. In the department of the Police Commissioner the decrease of fees amounted to Rs. 2,936, being Rs. 132 less on account of granting license for Coffee and Chandool Shops ; Rs. 1,795 less on account of permission granted for occupying public roads ; Rs. 990 less on account of Music Licenses, and Rs. 25 less in Poison Licenses.

51. In the Health Officer's Department there was an increase of fees amounting to Rs. 816-2-0, being Rs. 424 more in digging graves ; Rs. 705 more in Offensive and Dangerous Trade, and Rs. 35 more in supplying copies of office records ; on the other hand there was a decrease of Rs. 344 in removing dead animals.

52. *Miscellaneous Savings* amounted to Rs. 3,741-1-0 in 1888-89 against Rs. 4,294-3-3 in 1887-88, being Rs. 553-2-3 less than the savings of the last year. These savings were mere unpaid salaries of some of the employés of the Municipality whose wages were retained in the office for various reasons.

Budget Estimate, Rs. 3,000.

53. *Miscellaneous Receipts* amounted to Rs. 1,09,247-15-2 in 1888-89 against Rs. 98,788-0-5 in 1887-88, being Rs. 10,459-14-9 more than the receipts of the preceding year, chiefly on account of sale of lands and Health Department receipts.

Budget Estimate, Rs. 78,600.

54. The increase of receipts is explained below under the several sub-heads :—

	Years.	Receipts.	Increase.	Decrease.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
1. Sale of Lands and Materials.	1888-89	12,899 11 0		
	1887-88	2,531 5 11	10,368 5 1	.....
2. Health Department ...	1888-89	73,327 4 11		
	1887-88	71,132 12 2	2,194 8 9	.....
3. Municipal Engineer's..	1887-88	8,408 13 1		
	1888-89	8,194 15 3	.....	213 13 10
4. Municipal Commissioner's.	1888-89	454 0 0		
	1887-88	113 8 0	340 8 0	.....
5, Rent of Police Quarters.	1887-88	13,708 0 0		
	1888-89	13,492 0 0	.....	216 0 0
6. Sale of Vaccine Lymph.	1888-89	880 0 0		
	1887-88	608 1 0	271 15 0	.....
7. Sundry other receipts which were received last year, but not in this year.	.....	.....	.....	2,285 8 3
		Total...Rs.	13,175 4 10	2,715 6 1
		Deduct—Decrease...Rs.	2,715 6 1	
		Net Increase... Rs.	10,459 14 9	

55. *Public Gardens.*—Receipts under the head of Gardens amounted to Rs. 5,961-7-10 in 1888-89 against Rs. 8,452-2-6 in 1887-88, being Rs. 2,498-10-8 less than the receipts of the previous year.

Budget Estimate, Rs. 8,000.

56. Victoria Garden yielded Rs. 5,961-2-10 against Rs. 8,447-2-0, being Rs. 2,485-15-2 less; Bazar Gate Garden only annas five against Rs. 3-8-0, and Elphinstone Circle Garden *nil* against Rs. 1-8-0 than previous year.

57. The Superintendent of the Gardens considers the decrease of receipts due particularly to short sales of plants, seeds and fruit, which he attributes to the discontinuation of the former practice of

complying executions of up-country orders unaccompanied with remittances, and partly due to want of a printed catalogue of all trees and plants, seeds, &c., growing and cultivated in the gardens.

58. The items of Investments on which interest has been realized for the year 1888-89, are as under, with the amount of interest realized :—

		Rs.	a.	p.
1.	Interest on 44 Lakhs Sanitary Works Loan Deposit Account No. 1	36,184	8	8
2.	Interest on 7 Lakhs Sanitary Works Loan Deposit Account No. 2	8,613	6	2
3.	Interest on 12 Lakhs Drainage and Water Works Loan Deposit	23,774	0	7
4.	Interest on Miscellaneous Works Loan Deposit Account	2,781	0	2
5.	Interest on Surplus Cash Deposit...	39,362	5	3
6.	Do. on Municipal Building Fund Interest ...	55,576	10	10
7.	Do. on Sanitary Works Loan Invested Sinking Fund	679	5	0
		Rs. 1,66,971	4	8

59. *Profit on Municipal Workshops.*—The total receipts of Workshops for the year 1888-89 amounted to Rs. 1,18,446-10-11 against Rs. 1,11,949-7-10 in 1887-88, being Rs. 6,497-3-1 more than the receipts of the previous year. The total expenditure of the Workshops for the year 1888-89 amounted to Rs. 1,14,169-3-8 against Rs. 98,533-2-0 in 1887-88, being Rs. 15,636-1-8 more than the expenditure of the preceding year.

60. Comparing the gross receipts in 1888-89 at Rs. 1,18,446-10-11 against receipts amounting to Rs. 1,11,949-7-1 in 1887-88, with the gross expenditure of Rs. 1,14,169-3-8 against Rs. 98,533-2-0 in 1887-88, there was a gain of Rs. 4,277-7-3 in 1888-89 against Rs. 13,416-5-10 last year.

61. It will be seen from the figures given above that there was an outstanding balance at the end of the last year, which amounted to Rs. 22,477-7-4, but at the end of the year 1888-89 the outstandings have been allowed to swell to Rs. 46,045-8-9 more than double the amount, no satisfactory explanation has been given except that the Chief Accountant applied to the Executive Engineer several times to complete the adjustments, and the Executive Engineer has not replied to the communications of the Chief Accountant.

62. The last credit item of Rs. 18,31,029 is an adjusted amount shown in former years as a Liability of the Municipal Fund on account of 6 per cent. local loan, although certain sums were set apart annually from the revenue as Sinking Fund which were then not adjusted. This same item of Rs. 18,31,029 will be found as payment on the debit side, in Deposit account under the sub-head of Market and House Rate Loan Sinking Fund.

PARTICULARS OF DISBURSEMENTS.

63. *General Superintendence.*—The total expenditure under this head amounted to Rs. 1,69,223-1-8 in 1888-89 against Rs. 1,70,945-3-9 in 1887-88, being Rs. 1,722-2-1 less than the expenditure of the previous year.

Budget Amended Grant, Rs. 1,77,861-5-11.

64. This decrease of expenditure is explained as follows :—

	Year.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
1. Town Council and Corporation Establishment.	1887-88	48,984 9 7

Total...Rs.		1,56,943 2 0	1,56,943 2 0	37,661 10 0
Deduct—Decrease... „			37,661 10 0	
Net Increase...Rs.			1,19,281 8 0	

77. *Improvement of Streets.*—Under this head were expended Rs. 49,033-11-9 against Rs. 59,109-11-3, being Rs. 10,075-15-6 less expended than preceding year.

Amended Budget Grant, Rs. 1,47,294-6-0.

This decrease was due to larger payments having been made in 1887-88 on account of compensation for various plots of land and buildings taken up for street improvement.

78. *Repairs to Municipal Buildings.*—Under this head were expended Rs. 6,805-10-5 in 1888-89 against Rs. 5,537-7-2 in 1887-88, being Rs. 1,268-3-3 more expended than previous year.

Amended Budget Grant, Rs. 7,500.

79. *Cleaning, Lighting and Repairing Port Trust Wharves.*—The whole of the grant of Rs. 32,224 was expended under this head in 1888-89 against Rs. 25,000 in 1887-88, being Rs. 7,224 more expended than in the preceding year. The increase being due to the cost of lighting the Prince's Dock.

Budget Grant, Rs. 32,224.

80. *Drainage, Miscellaneous.*—Rs. 1,05,859-12-7 were expended in 1888-89 against Rs. 80,937-7-10 in 1887-88, being Rs. 24,922-4-9 more expended than in the previous year.

Amended Budget Grant, Rs. 1,23,170-2-0.

81. The increase is explained under the following particulars :—

	Year.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
1. Miscellaneous Drainage and Staff	1888-89	28,507 3 1		
	1887-88	19,778 5 10		
			8,728 13 3	.....
2. Maintenance of Love Grove Pumping Station	1888-89	73,453 10 9

89. *Primary Education.*—A sum of Rs. 31,374 was contributed towards primary education by the Municipality in 1888-89 against Rs. 40,248 in 1887-88, being Rs. 8,874 less than the amount of contribution in the previous year.

Budget Grant, Rs, 31,374.

90. This sum of Rs. 8,874 was provided in the Budget of the year 1886-87 as an additional Municipal Contribution towards Primary Education on the recommendation of the Director of Public Instruction, but it was not drawn by the Educational Inspector in that year but was drawn in 1887-88; hence the increase in that year.

91. With reference to the expenditure to be incurred under the head of Primary Education, we beg to draw the attention of the Corporation that, at the recommendation of the Standing Committee, the Corporation sanctioned the full annual Grant of Rs. 6,150 for the year 1889-90 by their Resolution No. 214 of 25th April 1889, and the amount was handed over to the Bank of Bombay on the 11th May 1889 to be credited to a separate account, and to be operated upon by the Joint Schools' Committee.

92. We respectfully submit that this was a departure from the ordinary practice, and does not seem to be contemplated by section 39 (6) of the New Municipal Act. This section 39 (6) clearly defines that the Corporation shall provide for the Joint Schools' Committee a competent Secretary and such clerks and messengers as shall be necessary, &c., but it does not empower the Corporation to hand over the whole of the annual grant to be expended by the Joint Schools' Committee. The usual course hitherto followed by the Corporation is to pass the amount of annual grant for each department, and the money is paid regularly every month according to Abstracts submitted by the head of each department.

93. As required by the provision of section 137 (1) of the New Act, we had to report this irregularity at once to the Standing Committee on the 15th May 1889, by a letter addressed to the Municipal Secretary. This letter was submitted to the Standing Committee at their meeting held on the 22nd May 1889, and the following resolution was passed by the Committee thereon:—

"That, with reference to the Auditors' letter, dated the 15th May "1889, they be instructed to pass the payment made by the Com- "missioner to the Joint Schools' Committee of Rs. 6,150, being the "full amount of the annual grant for their establishment made by the "Corporation under the terms of section 39 (6) of the Municipal Act.

"That the accounts of the Joint Schools' Committee for the expen- "diture of the above grant be audited by the Auditors in the same "way that the accounts of all establishments under the Commissioner "are audited, the Joint Schools' Committee keeping and furnishing "monthly, or as may be otherwise required, a tabulated statement "showing the expenditure to date under each head of the grant, in "the same way that tabulated statements are kept by the Chief Ac- "countant of the expenditure or other branches of the Municipality."

94. Although this subject refers to the Administration Report for the year 1889-90, we have thought it proper to mention this matter in our report for the year 1888-89, inasmuch as it relates to proceedings which have taken place in May 1889, and would remain unreported for a very protracted period until the report for the year 1889-90 is due, which would probably be about the month of September 1890.

95. *School for Deaf and Dumb Mutes.*—Full grant of Rs. 1,800 was paid to this school in 1888-89, same as was given in the previous year.

Budget Grant, Rs. 1,800.

96. *Veterinary College.*—Full grant of Rs. 2,500 was paid to this institution in 1888-89, same as was given in the preceding year.

Budget Grant, Rs. 2,500.

97. *Victoria and Albert Museum and School of Art.*—Rs. 10,307-8-1 were paid to this institution as Municipal contribution in 1888-89 against Rs. 10,166-12-11 in 1887-88, being Rs. 140-11-2 more than the contribution paid in previous year.

Budget Grant, Rs. 10,724.

98. *Victoria Technical College.*—Rs. 5,000, being the full grant, was paid to this institution in 1888-89 against the most handsome contribution of Rs. 80,000 paid in 1887-88 for celebrating the Jubilee year of our Most Gracious Majesty the Queen.

Budget Grant, Rs. 5,000.

99. *Gokuldas Tejpal Hospital.*—Rs. 30,798-0-2 were paid towards the expenses of this hospital in 1888-89 against Rs. 34,753-1-0 in 1887-88, being Rs. 3,955-0-10 less paid than in the previous year.

Budget Grant, Rs. 36,000.

100. This decrease was due to a larger unexpended balance out of the contribution paid towards the maintenance of the Gokuldas Hospital having remained in the hand of Government and refunded by them during 1888-89 than that refunded in 1887-88.

101. *Jaffer Suleman Dispensary for Women and Children.*—The whole grant of Rs. 6,000 was paid in 1888-89, same as was paid in the preceding year.

Budget Grant, Rs. 6,000.

102. *Pensions, Gratuities and Compassionate Allowances.*—Pensions amounted to Rs. 19,000-3-9 and Gratuity amounted to Rs. 469-5-11 in 1888-89 against Rs. 18,653-10-2 and Rs. 11,877-1-4 respectively in 1887-88, being Rs. 346-9-7 more on account of Pensions and Rs. 11,407-11-5 less on account of Gratuity.

Budget Grant, Rs. 19,469-5-8.

103. *Discretional Contingencies.*—Rs. 4,952-15-11 were expended in 1888-89 under this head against Rs. 4,190-9-2 in 1887-88, being Rs. 762-6-9 more than paid in the previous year.

Budget Grant, Rs. 7,850.

104. We give details of charges paid out of the Discretional Contingent Grant for 1888–89 :—

Paid	to Government on account of compensation for a plot of land at Arthur Road purchased from them and given to Mr. W. F. Farrow in exchange.	Rs.	442	11	2
Do.	on account of wages of Nowgunis employed at the Municipal Stores for taking an inventory of stock in hand during March, April and May 1888	„	86	1	0
Do.	to Kirmally Peerbhoy on account of compensation for damages sustained by him in consequence of his horse having been thrown down, owing to his having stepped on a fire hydrant *cover which was insecure*	„	420	3	9

Do.	on account of rent of stables at Pydhowni from November 1888 to February 1889	„	101	0 0
Do.	on account of the cost of flower pots supplied at the Bhundarwada Reservoir in December 1885...	„	17	8 0
Do.	on account of the cost of fitting up the new sweeping machine with horse shaft.....	„	3	3 10
Do.	on account of the cost of fixing new pieces of glasses to the Victoria Garden Tower Clock.....	„	236	0 0
Do.	on account of extra cost of repairing, cleaning, and lighting Port Trust wharves roads.....	„	8	3 2
Do.	on account of sundry contingent repairs and stores charges in connection with the Victoria Gardens and contingent charges in connection with the Elphinstone Circle Garden.....	„	1,097	5 10
Do.	on account of the cost of putting up iron tanks in the Fort Market	„	184	11 7
Do.	on account of the cost of shifting the Vizlibai Fountain at Arthur Road.....	„	93	7 7
Do.	to Mr. J. Bigmore for professional advice in connection with the Love Grove Pumping Station...	„	200	0 0
	Total ...	Rs.	4,952	15 11

105. It will be observed from the above details that, in two or three instances, excesses over Budget Grants have been met by the Commissioner at the end of the year from his Discretional Grant, which is specially placed at his disposal for the purpose of meeting unforeseen charges.

106. *Auditors' Allowances.*—The whole of this grant was expended in payment of these allowances.

Budget Grant, Rs. 5,000.

107. We think it proper again to observe that our daily work has greatly increased since the last 5 years, and we therefore respectfully repeat what we have so frequently said that neither the Corporation nor the Town Council have paid any attention to the suggestions of the Auditors for the employment of a Clerk to assist them in going through certain clerical work.

108. *Rent of Municipal Office.*—The whole of this grant was expended in payment of rent of the Municipal Office at Rs. 1,400 per mensem.

Budget Grant, Rs. 16,800.

109. *Nesbit Road Bridge.*—A further sum of Rs. 33,293-4-7 was paid to the G. I. P. Railway Company towards the expenses on this Bridge in 1888-89, raising the total of payment on this account to Rs. 2,13,618-15-9 up to 31st March 1889.

Budget Grant, Rs. 83,674-4-10.

110. The following sundry expenditure was incurred during the year 1888-89 :—

	Rs.	a.	p.
Election expenses for the formation of the New Corporation	6,398	5	0
Cost of Engrossing the Address from the Corporation to the Marquises of Lansdowne and Dufferin	1,369	0	0
Establishment for preparations of Plans and Estimates for House-connections in the District of Agripada	3,633	1	4
Loss on account of sale of Government paper belonging to House Rate and Market Rate Loan Sinking Fund	62,047	8	9
Loss on account of the value of stationery ordered out from England and on account of Building Certificate Forms	593	1	8
Rs.	74,041	0	0

111. *New Works.*—Rs. 65,177-14-3 were expended on New Works in 1888-89 against Rs. 97,107-11-10 in 1887-88, being Rs. 31,929-13-7 less expended under this head than in the previous year.

Budget Grant, Rs. 2,29,679-14-4.

112. Rs. 41,453-0-2 were expended under the head of Health Department, principally in the construction of Small-pox Hospital at Arthur Road, Rs. 31,329-4-1 ; Improvement of Bandora Slaughter House premises, Rs. 3,471-6-5 ; Experiments in kutchra burning, Rs. 3,080-3-6 ; New Latrines and Urinals, Rs. 2,475-4-9 ; Carnac Bunder Night-soil Depôt and Sundry other works, Rs. 1,096-13-5.

113. Rs. 8,373-11-8 were expended under the head of Road Department, principally in constructing New Cross Road from Ripon Road to Byculla and laying 9″ pipes ; Rs. 1,595-4-2 Engineer's Chowkies ; Rs. 2,445 Streets' name and number of plates ; the purchase of 638 square yards of land on the flats at Re. 1 per square yard, and for New Ward Office Rs. 2,553; Rs. 12,078-10-11 were expended under Drainage Department, principally in constructing water entrances in Khetwadi 12th Lane and in Main Road from 1st to 3rd Lane, in Charni Road, Junction of Bapu Khote Street and Erskine Road, in Bellasis Junction Road, in Nesbit Road, and east side of Parel Road, costing Rs. 9,790-1-7 ; constructing two culverts at Malabar Hill near Chowpati, costing Rs. 945-2-4 ; and in constructing Ventilating shafts, in Marine Lines Mayo Road and Queen's Road, costing Rs. 1,343-7-0.

114. Rs. 3,272-7-6 were expended as proportionate cost of filling in the portion of the Tank at the Victoria Gardens with materials excavated from Drainage works.

115. *Lighting Account.*—Cost of lighting the Town and Island of Bombay amounted to Rs.2,91,554-10-1 in 1888-89 against Rs. 2,85,949-8-10 in 1887-88, being Rs. 5,605-1-3 more than expended in the previous year.

Budget Grant, Rs. 2,92,260-14-8.

116. This increase of Rs. 5,605-1-3 is explained as under :—

	Year.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
1. Inspector	1888-89	1,560 0 0		
	1887-88	1,560 0 0	.....	.....
2. Gas Lighting (Streets and Bunders)	1888-89	2,66,512 13 7		
	1887-88	2,64,977 14 8	1,534 14 11	.....
3. Queen's Statue	1888-89	1,118 4 11		
	1887-88	1,116 4 11	2 0 0	.....
4. Lighting Wadia Fountain Clock	1888-89	773 0 0		
	1887-88	636 0 0	137 0 0	.....
5. Contingencies	1888-89	3,481 7 0		
	1887-88	810 11 11	2,670 11 0	.....
6. Kerosine Oil Light in Streets.....	1888-89	17,689 0 7		
	1887-88	16,105 15 4	1,583 1 3	.....

121. *Loan Works, Water Works.*—During the year under report the following further expenditure was incurred, amounting to Rs. 26,09,743-13-1, on the undermentioned works in connection with Water Works, sanctioned out of the various Loans :—

Rs.	9,121	7	9	were expended on account of Tulsi Water-supply and works in connection with Malabar Hill Reservoir, paid out of the Rs. 15 Lakhs Loan.
„	1,621	13	0	were expended in constructing a double storied chawl for the Water Works Staff and quarters for the Superintendent, paid out of Rs. 20,88,000 Loan.
„	8,307	4	8	were expended on laying 18" main in Frere Road from Bhandarwada Reservoir on to Carnac Road to Mint.
„	20	8	11	in improving and increasing the distribution of the water-supply and providing higher levels with filtered water, paid out of Rs. 7 Lakhs Loan.
„	92,749	0	7	were expended on constructing concrete trench, waste weir, Vehar Lake ; mainsin 14 streets west of Frere Road, and in various other streets and purchase of Decon's Meters, paid out of the Rs. 68,200 Loan.
„	1,736	12	9	were expended in sinking trial-pits outside the walls of the Malabar Hill Reservoir.
„	399	0	0	extension of Catch-water Channel at Tulsi.
„	24,95,787	13	5	were expended during the year in further progress of Tansa Water Works, raising the total from the commencement of the work to Rs. 56,55,486-4-2 paid out of Tansa Loans.
Rs.	26,09,743	13	1	

122. *Surface Drainage Works.*—The further sum expended on these works during the year amounted to Rs. 4,774-0-1 only, which sum, when added to the total of the previous year, Rs. 13,08,004-3-10, makes a total of Rs. 13,12,778-3-11 up to 31st March 1889.

123. *New Drainage Works.*—The further sum expended during the year on these works amounted to Rs. 2,95,899-13-5, which sum, when added to the total of last year, Rs. 27,23,160-3-6, makes a total of Rs. 30,19,060-0-11 up to 31st March 1889.

124. *New Road from Bellasis Road across the old Race Course, and Cross Road at Mahaluxmi Station from Clerk Road to Haines Road.*—A further sum of Rs. 4,165-11-3, out of the Loan of Rs. 20,88,000, was expended on this road during the year, making, with the sum expended in the previous year, Rs. 1,37,116-12-6, a total of Rs. 1,41,282-7-9 up to 31st March 1889.

125. *Extension of Erskine Road Market.*—A further sum of Rs. 2,41,185-2-4 was expended on this market out of the Loan of Rs. 5 lakhs during the year, raising the total expenditure to Rs. 2,86,570-15-4 up to 31st March 1889.

126. A further sum of Rs. 6,677-0-3, out of the Loan of Rs. 20,88,000, was expended during the year on the construction of Health Department Stables at Bori Bunder ; Rs. 14,140 on the New Ward Office erected at Dadur ; Rs. 7,247-4-0 for the purchase

of 5,000 square yards of land near the Junction of DeLisle and Carrol Roads for a Night-soil Depôt ; and Rs. 8,263-0-5 on survey of House-Connection in the district of Agripada.

127. *Municipal Building Fund.*—A sum of Rs. 90,088 was expended on the construction of the Municipal Building up to the 31st March 1889.

128. *Liabilities and Assets.*—In accordance with the provision of the Municipal Act, the accounts of the Vehar Water Works Fund are kept entirely separate and distinct from other accounts of the Municipal Fund ; hence the Assets and Liabilities of the Municipal Fund are shown separately in Schedules Nos. 4 and 5 and of the Water Works Fund in Schedule No. 7.

129. From Schedules Nos. 4 and 5 it will appear that the total Liabilities of the Municipal Fund amounted to Rs. 85,60,677-12-3 in 1888-89 against Rs. 90,49,930-7-10 in 1887-88, being Rs. 4,89,252-11-7 less than the Liabilities of the previous year.

130. The Assets of the Municipal Fund amounted to Rs. 2,02,67, 044-7-10 in 1888-89, including Rs. 14,64,653-2-8, being the balance due by the Water Works Fund to the Municipal Fund, against Rs. 2,04,74,979-14-9, including Rs. 14,89,199-2-10, balance due by the Water Works Fund in 1887-88, showing Rs. 2,07,935-6-11 less Assets and Rs. 24,546-0-2 less balance due by Water Works than in the preceding year.

131. From Schedule No. 7 it will appear that the total Liabilities of the Water Works Fund amounted to Rs. 1,80,39,708-3-1 in 1888-89 against Rs. 1,51,97,985-6-1 in 1887-88, being Rs. 28,41,722-13-0 more than the Liabilites of the preceding year.

132. The Assets of the Water Works Fund amounted to Rs. 1,99,61,050-0-5 in 1888-89 against Rs. 1,70,13,444-7-4 in 1887-88, being Rs. 29,47,605-9-4 more than the Assets of the previous year.

133. The total Liabilities of the Municipal Fund are summarized as follows :—

		Total Assets...Rs.	1,99,61,050	0	5

137. *Scrutiny of Collections and Outstanding Bills of Rates and Taxes for the year* 1888-89 *and of previous years.*

Collections.—During the year under report, there were issued by the Assessor and Collector 78,410 net demand assessment bills, amounting in value to Rs. 27,90,194-14-9.

To the abovementioned number of bills were added 587 additional bills for the year 1887-88 and for previous years up to 1882 inclusive, of the value of Rs. 13,507-15-0, making the total of all collection bills to 78,997 and amounting to Rs. 28,03,702-13-9. Adding to this the amount of Government and Port Trust Bills of the value of Rs. 2,12,990, and the amount of Rs. 1,33,397-12-2, being the outstandings of the last year 1887-88, the whole total amount of collection bills for the year 1888-89 amounted to Rs. 31,50,090-9-11.

Out of the abovementioned Rs. 31,50,090-9-11, Rs. 27,37,465-1-0 were collected by the Assessor and Collector, and Rs. 2,12,990-0-0 were paid by Government and Port Trust *direct* to the Municipality, making a total of collections received to Rs. 29,50,455-1-0, which left a balance of Rs. 1,99,635-8-11.

From this balance of outstanding, Rs. 24,806-5-10 were deducted on account of old bills cancelled and placed on the file of irrecoverable bills by the order of the Municipal Commissioner, and reduced in

value for the year 1887-88 and for former years, there remained Rs. 1,74,829-3-1 as the outstanding on the 31st day of March 1889.

138. We give in detail in the annexed form of Appendices, marked A, B, C and D, the result of our scrutiny of the outstanding balances for the year 1888-89 and of previous years.

Appendix A shows outstandings for 1888-89, amounting to 1,569 bills, of the value of Rs. 1,14,209-4-1.

Appendix B shows outstandings for the year 1887-88 and of previous years up to 1882 inclusive, amounting to 493 bills of the value of Rs. 58,830-12-8.

Appendix C shows outstandings of disputed and law-suit bills, amounting to 37 bills of the value of Rs. 1,789-2-4.

Appendix D is a summary of the abovementioned three Appendices A, B and C, and which will show the grand total of all outstandings on the 31st day of March 1889, being 2,099 bills of the aggregate value of Rs. 1,74,829-3-1, showing Rs. 41,431-7-11 more than the outstandings of the year 1887-88.

139. We give below a *resumé* of the above in the following figures:—

			Rs.	a.	p.	Rs.	a.	p.
78,410 Bills were issued in 1888-89 of the value of						27,90,194	14	9
Add—381 Bills issued for 1887-88.....			10,023	7	4			
89	do.	1886-87.....	1,912	0	3
